

To be used in conjunction with the VTE risk assessment pathway

Thromboprophylaxis ADMINISTRATION GUIDE Enoxaparin (Inhixa[®])

Some of the doses below are off label and differ from the SPC.
As this is the recommendation from UHL, prescribers will be protected by UHL vicarious liability

Enoxaparin dosage for Adult, non-pregnant, non-orthopaedic (see specific guidelines) patients deemed to be at risk of thrombosis (medical/surgical)

Actual Bodyweight	Renal Function	
	CrCl \geq 30ml/min	CrCl <30ml/min
<50kg	20mg OD 	20mg OD 
\geq 50-100kg	40mg OD 	20mg OD 
\geq 100-150kg	40mg BD 	40mg OD 
\geq 150kg	60mg BD 	40mg OD 

CrCl <15ml/min Monitor heparin assay on Day 4 (4h post dose) and every 4 days to ensure there is no accumulation. Aim for peak levels <0.3iu/ml

Prescribe by brand name INHIXA[®] as different brands have different injection techniques.
