<b>Date:</b>	<b>30 January 2014</b>
<b>CQC regulation:</b>	Outcome 16 – Assessing and Monitoring the Quality of Service Provision

<b>Title:</b>	<b>UHL RISK REPORT INCORPORATING THE BOARD ASSURANCE FRAMEWORK (BAF) 2013/14</b>
---------------	--

**Author/Responsible Director: Chief Nurse**

**Purpose of the Report:**

The report provides the Board with an updated BAF and oversight of any extreme and high risks within the Trust. The report includes:-

- a) A copy of the BAF as of 31 December 2013.
- b) An action tracker to monitor progress of BAF actions
- c) A summary diagram of BAF risk score movements from the previous month.
- d) New extreme and/ or high risks opened during the reporting period.
- e) Excerpt from the organisational risk register showing all current UHL extreme and high risks.

**The Report is provided to the Board for:**

Decision		Discussion	<b>X</b>
Assurance	<b>X</b>	Endorsement	

**Summary :**

- There have been no changes to BAF risk scores during the reporting period.
- Risk number six has been removed from the BAF.
- Action 6.11 will be removed from future iterations of the action tracker.
- Action 8.11 is no longer relevant and has been removed from the BAF and will be removed from future iterations of the tracker.
- Action 10.1 has been integrated within action 10.5 and has been removed from the BAF and will be removed from future iterations of the action tracker.
- The lack of progress with actions 11.8 and 11.11 due to poor engagement from Interserve has been escalated to '*NHS Horizons*' for resolution.
- Action 13.8 has moved from a red RAG rating to green (on track).
- Seven new high risks have opened during December 2013 as described below.
- The Board is asked to note a moderate risk in relation to the NIHR Clinical Research Network: East Midlands transition plan. As the appointed host organisation, UHL is now leading and facilitating the transition process. The associated risk is reported as an exception to normal reporting due to the contractual obligation with the NIHR and Department of Health to report associated risks to the host Trust Board.

**Recommendations:**

Taking into account the contents of this report and its appendices the Board are invited to:

<p>(a) review and comment upon this iteration of the BAF, as it deems appropriate;</p> <p>(b) note the actions identified within the framework to address any gaps in either controls or assurances (or both);</p> <p>(c) identify any areas which it feels that the Trust's controls are inadequate and do not, therefore, effectively manage the principal risks to the organisation achieving its objectives;</p> <p>(d) identify any gaps in assurances about the effectiveness of the controls in place to manage the principal risks and consider the nature of, and timescale for, any further assurances to be obtained;</p> <p>(e) identify any other actions which it feels need to be taken to address any 'significant control issues' to provide assurance on the Trust meeting its principal objectives;</p>	
<b>Board Assurance Framework</b> Yes	<b>Performance KPIs year to date</b> N/A
<b>Resource Implications (eg Financial, HR)</b> N/A	
<b>Assurance Implications:</b> Yes	
<b>Patient and Public Involvement (PPI) Implications:</b> Yes	
<b>Equality Impact</b> N/A	
<b>Information exempt from Disclosure:</b> No	
<b>Requirement for further review?</b> Yes. Monthly review by the Board	

**UNIVERSITY HOSPITALS OF LEICESTER NHS TRUST**

**REPORT TO: TRUST BOARD**

**DATE: 30 JANUARY 2014**

**REPORT BY: RACHEL OVERFIELD - CHIEF NURSE**

**SUBJECT: UHL RISK REPORT INCORPORATING THE BOARD  
ASSURANCE FRAMEWORK (BAF) 2013/14**

---

**1. INTRODUCTION**

- 1.1 This report provides the Board with:-
- a) A copy of the BAF as of 31 December 2013.
  - b) An action tracker to monitor progress of BAF actions.
  - c) A summary diagram of BAF scores to show any changes from the previous month.
  - d) Notification of any new extreme or high risks opened during the reporting period.
  - e) Excerpt from the organisational risk register showing all open extreme and high risks.

**2. BAF POSITION AS OF 31 DECEMBER 2013**

- 2.1 A copy of the BAF is attached at appendix one with changes to narrative since the previous version shown in red text.
- 2.2 The progress of actions associated with the BAF is monitored by reference to the action tracker attached at appendix two. Actions completed prior to December 2013 have been removed from the tracker however a full audit trail of these is available by reference to previous documents.
- 2.3 Appendix three provides a summary of changes to BAF scores and the Board is asked to note that there have been no changes to BAF risk scores since the previous report.
- 2.4 The Board is asked to note the following points:
- Following discussion and agreement at the December 2013 Board meeting, risk number six has been removed from the BAF.
  - As a consequence of the above, action 6.11 will be removed from future iterations of the action tracker.
  - Action 8.11 is no longer relevant and has been removed from the BAF and will be removed from future iterations of the tracker.
  - Action 10.1 has been integrated within action 10.5 and has been removed from the BAF and will be removed from future iterations of the action tracker.
  - The lack of progress with actions 11.8 and 11.11 due to poor engagement from Interserve has been escalated to '*NHS Horizons*' for resolution.
  - Action 13.8 has moved from a red RAG rating to green (on track) following confirmation that Odames ward will be handed over to

Clinical Education on 1<sup>st</sup> February 2014 for work to begin in conversion to a library /learning centre.

- 2.5 In order to provide an opportunity for more detailed scrutiny the following three BAF entries are presented for Board members to review against the parameters listed in appendix four.
- Risk 8 – Failure to achieve and sustain quality standards (risk owners; Chief Nurse and Medical Director).
  - Risk 9 – Failure to achieve and sustain high standards of operational performance (risk owner Chief Operating Officer).
  - Risk 10 – Inadequate reconfiguration of buildings and services (risk owner Director of Strategy)

### 3 QUARTER THREE EXTREME AND HIGH RISK REPORT.

- 3.1 In line with the UHL Risk Management Policy, the Board is provided with a quarterly summary of all currently open extreme and high risks. As of 31 December 2013 there are 31 high risks (including those listed in section 3.2) and one extreme risk on the UHL organisational risk register. These are detailed at appendix five.
- 3.2 The Board is asked to note that seven new high risks were opened during December 2013 as detailed below.

Risk ID	Risk Title	Risk Score	CMG/Corporate Directorate
2267	Risk of reduced compliance with DoH requirements in relation to adherence to antimicrobial prescribing policy	20	Corporate Nursing
2271	Failure to achieve compliance of 75% attendance at Safeguarding training may have adverse impact on UHL safeguarding processes	16	Corporate Nursing
2278	Risk that the Leicester Fertility Centre could have its licence for the provision of treatment and services withdrawn	15	Women's & Children's
2270	Failure to achieve compliance of 75% attendance at Fire Safety training may cause UHL to fail to meet its statutory obligation	15	Corporate Nursing
2268	Failure to meet targets for training compliance for moving & handling training may adversely affect patient care /staff safety	15	Corporate Nursing
2272	Failing to meet internal and external targets in relation to undertaking IG training may adversely affect UHL compliance with IP	15	Corporate Nursing
2269	Failure to meet UHL target of a minimum of 75% of clinical staff undertaking IP/Hand hygiene training	15	Corporate Nursing

- 3.3 Finally, the Board is asked to note a moderate risk in relation to the National Institute for Health Research (NIHR) Clinical Research Network: East Midlands transition plan. This plan sets out progress, further actions and risks with respect to the local transition process from existing NIHR research network structures to the NIHR CRN: East Midlands structure by April 1, 2014. As the appointed host organisation, UHL is now leading and facilitating the transition process. The associated risk is reported as an exception to normal reporting due to the contractual obligation with the NIHR and Department of Health to report associated risks to the host Trust Board. Details of the risk are attached at appendix six.

#### **4. RECOMMENDATIONS**

- 4.1 Taking into account the contents of this report and its appendices the Board is invited to:
- (a) review and comment upon this iteration of the BAF, as it deems appropriate;
  - (b) note the actions identified within the framework to address any gaps in either controls or assurances (or both);
  - (c) identify any areas which it feels that the Trust's controls are inadequate and do not, therefore, effectively manage the principal risks to the organisation achieving its objectives;
  - (d) identify any gaps in assurances about the effectiveness of the controls in place to manage the principal risks and consider the nature of, and timescale for, any further assurances to be obtained;
  - (e) identify any other actions which it feels need to be taken to address any 'significant control issues' to provide assurance on the Trust meeting its principal objectives;

Peter Cleaver,  
Risk and Assurance Manager,  
21 January 2014.

**UNIVERSITY HOSPITALS OF LEICESTER NHS TRUST – BOARD ASSURANCE FRAMEWORK DECEMBER 2013**

RISK NUMBER/ TITLE:		RISK 2 – FAILURE TO TRANSFORM THE EMERGENCY CARE SYSTEM					
LINK TO STRATEGIC OBJECTIVE(S)		b. - To enable joined up emergency care.					
EXECUTIVE LEAD:		Chief Operating Officer					
Principal Risk	What are we doing about it?	Current Score 1 x L	How do we know we are doing it?	What are we not doing?	How can we fill the gaps or manage the risk better?	Target Score 1 x L	Timescale
(What could prevent the objective(s) being achieved)	(Key Controls)  What control measures or systems we have in place to assist secure delivery of the objective (describe process rather than management group)		(Key Assurances of controls)  Provide examples of recent reports considered by Board or committee where delivery of the objectives is discussed and where the board can gain evidence that controls are effective.	(Gaps in Controls C) / Assurance (A)  What gaps in systems, controls and assurance have been identified?	(Actions to address gaps)		When will the action be completed?
Failure to transform emergency care system leading to demands on ED and admissions units continuing to exceed capacity.	Health Economy has submitted response plan to NHSE requirements for an Emergency Care system under the A&E Performance Gateway Reference 00062.	5x5=25	Once plan agreed with NTDA, it will be circulated to the Board	No gaps	No actions	4x3=12	
	Emergency Care Action Team formed. Chaired by Chief executive to ensure Emergency Care Pathway Programme actions are being undertaken in line with NHSE action plan and any blockages to improvement removed.		Action Plan circulated to the Board on a monthly basis as part of the Report on the Emergency Access Target within the Quality and Performance Report	Gaps described below	Actions described below		
	Development of action plan to address key issues						
	A new plan has been submitted detailing a clear trajectory for performance improvement and includes key themes from plan: Single front door		Project plan developed by CCG project manager Risks from 'single front door' to be escalated via ECAT and raised with CCG Managing Director as required	No gaps	No actions		
	ED assessment process is being operated.		Forms part of Quality Metrics for ED reported daily update and part of monthly board performance report	No gaps	No actions		
	Recruitment campaign for continued recruitment of ED medical and nursing staff including fortnightly meetings with HR to highlight delays and solutions in the recruitment process.		Vacancy rates and bank/agency usage reported to Trust Board on a monthly basis  Recruitment plan being led by HR and monitored as part of ECAT	(c) Difficulties are being encountered in filling vacancies within the emergency care pathway. Agency and bank requests continue to increase in response to increasing sickness rates, additional capacity, and vacancies.  (c) Staffing vacancies for medical and nursing staff remain high.	Continue with substantive appts until funded establishment is achieved (2.7)		Review Jan 2014 COO

# UNIVERSITY HOSPITALS OF LEICESTER NHS TRUST – BOARD ASSURANCE FRAMEWORK DECEMBER 2013

	Formation of an EFU and AFU to meet increased demand of elderly patients		'Time to see consultant' metric included in National ED quarterly indicator.	No gaps	No actions		
	Maintenance of AMU discharge rate above 40%		Reported to Operational Board twice monthly and will be included in Emergency Care Update report in Q&P Report.	No gaps	No actions		
	New daily MDT Board Rounds on all medical wards and medical plans within 24hrs of admission		Reported to Operational Board twice monthly and will be included in Emergency Care Update report in Q&P Report.	No gaps	No actions		
	EDDs to be available on all patients within 24 hours of admission. Review built in to daily discharge meetings to check accuracy of EDDs (from 2/09/13).		Monitored and reported to Operational Board twice monthly and will be included in Emergency Care Update report in Q&P report	No gaps	No actions		
	Maintain winter capacity in place to allow new process to embed		All winter capacity beds are to be kept open until the target is consistently met	No gaps	No actions		
	DTOCs to be kept to a minimal level by increasing bed capacity. 24 Additional beds available from December 2013		Forms part of the Report on Emergency Access in the Q&P Report.	No gaps	No actions

Principal Risk  (What could prevent the objective(s) being achieved)	What are we doing about it?  (Key Controls)  What control measures or systems we have in place to assist secure delivery of the objective (describe process rather than management group)	Current Score 1 x L	How do we know we are doing it?  (Key Assurances of controls)  Provide examples of recent reports considered by Board or committee where delivery of the objectives is discussed and where the board can gain evidence that controls are effective.	What are we not doing?  (Gaps in Controls C) / Assurance (A)  What gaps in systems, controls and assurance have been identified?	How can we fill the gaps or manage the risk better?  (Actions to address gaps)	Target Score 1 x L	Timescale  When will the action be completed?
Failure to achieve and sustain quality standards leading to failure to reduce patient harm with subsequent deterioration in patient experience/ satisfaction/ outcomes, loss of reputation and deterioration of 'friends and family test' score.	Standardised M&M meetings in each speciality.	4x4=16	Routine analysis and monitoring of out of hours/weekend mortality at CMG Boards.	No gaps.	No action needed.	4x3=12	
	Systematic speciality review of "alerts" of deterioration to address cause and agree remedial action by Mortality Review Committee. Reports to Executive Quality Board, QAC, and by exception to ET and TB.  All deaths in low risk groups identified. Working with DFI to ensure data has been recorded accurately		Quality and Performance Report and National Quality dashboard presented to ET and TB. Currently SMHI "within expected" (i.e. 106).	(a) UHL risk adjusted perinatal mortality rate above regional and national average.	Women's CMG to work with Dr Foster and other trusts to better understand risk adjustment model (8.2).		Jan 2014 MD
	Robust implementation of actions to achieve Quality Commitment (save 1000 extra lives in 3 years).		SHMI remains "within expected" (i.e. 106).  Independent analysis of mortality review performed by Public Health. Results reported at November 2013 TB meeting.	No gaps identified.	No action needed.		
	Agreed patient centred care priorities for 2013-14: - Older people's care - Dementia care - Discharge Planning		Quality Action Group meets monthly.  Achievement against key objectives and milestones report to Trust board on a monthly basis. A moderate improvement in the older people survey scores has been recorded.	No gaps identified.	No action needed.		
	Multi-professional training in older peoples care and dementia care in line with LLR dementia strategy.		Quality Action Group monitoring of training numbers and location.	No gaps identified.	No action needed.		

# UNIVERSITY HOSPITALS OF LEICESTER NHS TRUST – BOARD ASSURANCE FRAMEWORK DECEMBER 2013

	Protected time for matrons and ward sisters to lead on key outcomes.		CMG/ specialty reporting on matron activity and implementation or supervisory practice.	(c) Present vacancy levels prevent adoption of supervisory practice.	Active recruitment to ward nursing establishment so releasing ward sister –for supervisory practice (8.5).		Sep 2014 CN
	To promote and support older peoples champions network and new dementia champions network.		Monthly monitoring of numbers and activity.	No gaps identified.	No action needed.		
	Targeted development activities for key performance indicators - answering call bells - assistance to toilet - involved in care - discharge information		Monthly monitoring and tracking of patient feedback results.  Monthly monitoring of Friends and Family Test reported to the TB (70.3% at M8). England average 71%  Older Peoples Quality Outcomes: all scores increased from M7 to M8 Discharge: All scores except for the question on being informed of problems/dangers signals increased from M7 to M8				
	Quality Commitment 2013 – 2016: <ul style="list-style-type: none"> <li>Save 1000 extra lives</li> <li>Avoid 5000 harm events</li> <li>Provide patient centred care so that we consistently achieve a 75 point patient recommendation score</li> </ul>		Quality Action Groups monitoring action plans and progress against annual priority improvements.  A Quality Commitment dashboard has been developed to present updates to the TB on the 3 core metrics for tracking performance against our 3 goals. These metrics will be tracked up to 2015.  Impressive drops in fall numbers have been observed in Datix reports and in the Safety Thermometer audit.				
	Relentless attention to 5 Critical Safety Actions (CSA) initiatives to lower mortality.		Q&P report to TB showing outcomes for 5 CSAs.  4CSAs form part of local CQUIN monitoring. RAG rated green at end of quarter 2. M&M CSA removed from CQUIN monitoring due to full implementation  100%CQUIN funding for CAS programme for quarter two of 2013/14.	(c) Lack of a unified IT system in relation to ordering and receiving results means that many differing processes are being used to acknowledge/respond to results. Potential risk of results not being acted upon in a timely fashion.	Implementation of Electronic Patient Record (EPR). (8.10)		2015 CIO

# UNIVERSITY HOSPITALS OF LEICESTER NHS TRUST – BOARD ASSURANCE FRAMEWORK DECEMBER 2013

	NHS Safety thermometer utilised to measure the prevalence of harm and how many patients remain 'harm free' (Monthly point prevalence for '4 Harms').  Monthly meetings with operational/clinical and managerial leads for each harm in place.		Monthly outcome report of '4 Harms' is reported to Trust board via Q&P report. The percentage of Harm Free Care for M8 was 93.86% reflecting a reduction in the number of patients with newly acquired harms.	(a) There is some concern that the revised DH monitoring tool is still not an effective measure to produce accurate information. Local actions to resolve this are not practicable.

3.3	Development of Pay Progression Policy for Agenda for Change staff.	DHR	DDHR	<del>October</del> <del>November</del> December 2013 February 2014	Initial staff side comments acquired and specific meeting to discuss on 16 December 13. A number of points of agreement were made at this meeting. The Policy has been amended to reflect these and further discussions will take place at the JSCNC on 15 January 2014 with a view to reaching agreement on remaining points of difference. The proposal for Agenda for Change staff in Band 8C, D and 9 was agreed in principle and a listening event will be held with affected staff at the beginning of February 2014. Timescales have been amended to reflect these changes.	3
3.5	Ensure Statutory and Mandatory training is easy to access and complete with 75% compliance by reviewing delivery mode, access and increasing capacity to deliver against specific subject areas.	DHR	ADLOD	March 2014	Performance improved to 62%. First seven newly designed e-learning packages have been completed:- All other e-learning packages will be available from the end of December 2013.	4

**BAF RISK SCORE MAP – DECEMBER 2013**

Appendix Three

**AREAS OF SCRUTINY FOR THE UHL BOARD ASSURANCE FRAMEWORK  
(BAF)**

- 1) Are the Trust's strategic objectives S.M.A.R.T? i.e. are they :-
  - **S**pecific
  - **M**easurable
  - **A**chievable
  - **R**ealistic
  - **T**imescaled
- 2) Have the main risks to the achievement of the objectives been adequately identified?
- 3) Have the risk owners (i.e. Executive Team) been actively involved in populating the BAF?
- 4) Are there any omissions or inaccuracies in the list of key controls?
- 5) Have all relevant data sources been used to demonstrate assurance on controls and positive assurances?
- 6) Is the BAF dynamic? Is there evidence of regular updates to the content?
- 7) Has the correct 'action owner' been identified?
- 8) Are the assigned risk scores realistic?
- 9) Are the timescales for implementation of further actions to control risks realistic?

# UNIVERSITY HOSPITALS OF LEICESTER NHS TRUST

**OPERATIONAL RISKS SCORING 15 OR ABOVE FOR THE PERIOD ENDING 31/12/13**

CMG	ED	There is a medical staffing shortfall resulting in a risk of an understaffed Emergency Department	04/10/2013	31/01/2014 Consultant vacancies. Poor quality care, continued lack of retention. Stress and burnout. Increased incidents and complaints. Inability to do the general work of the department. 4 hour target. Increased sickness. Middle grade vacancies. Poor quality care, reputation. Risk of losing trainees due to incorrect service/training balance. Trainee attrition. Stress, poor morale. Trainees not wanting to apply for consultant positions. Reduced cohesiveness as a trainee group. Risk to four hour target. Increased sickness Junior grade vacancies. Poorer quality care. 4 hour target. Stress. Juniors defecting to other specialities. Increased sickness. Poorer quality of training resulting in poor deanery reports. Non ED medical consultants. Increased incidents. Serious incidents. Stress. Locums.Financial. Poor quality care. Increased complaints, incidents, claims, serious incidents. Increased consultant workload. Lack of uniformity. Risk to 4 hour target. Paediatric medical staffing. Poorer quality care for paediatric population. Increased number of incidents, complaints and claims. Reduced ability to maintain CPD co	Patient safety	The chief executive and medical director have met with senior trainees in Leicester ED to invite them to apply for consultant positions. The East Midlands Local Education and training board has recognised middle grade shortages as a workforce issues and has set up several projects aiming to attract and retain emergency medicine trainees and consultants. Advanced nurse practitioners and non-training CT1 grades have been employed in order to backfill the shortage of SHO grade junior doctors. There has been shared teaching sessions in which non ED consultants and ED consultants have shared skills, (i.e. ED consultants learning about collapse in the elderly and elderly medicine consultants doing ALS). The non ED consultants have been set up on a specific mailing list so that new developments and departmental 'mini-teaches' (= learning cases from incidents) can be shared. Only approved locum agencies are used for ED internal locums and their CVs are checked for suitability prior to appointing them. Locums receive a brief shop floor induction on arrival and also must s Locum doctors are only placed in paed ED in excep The grid paediatric trainees shift pattern has change ED employs medical registrars to work night shifts in ED consultants have extended their shop-floor hours	20	Review of shift vs rota and the required number of juniors per shift - 01/03/14	BTD	3

2267	Infection Prevention Corporate Nursing	Risk of reduced compliance with DoH requirements in relation to adherence to antimicrobial prescribing policy	31/01/2014 09/12/2013	<p><b>Causes:</b> Change over from paper prescription chart which contains a dedicated section for prescribing antimicrobials, with a prompt for only a 5 days duration, extended duration verification code requirements, and dedicated boxes for documentation of the indication and duration. The current EPMA system does not allow antimicrobials to be differentiated from any other drug and hence duration cannot be mandated, and there is no section to record indication - the lack of this information leads to poor compliance with the duration policy.</p> <p><b>Consequences:</b> On the EPMA wards there has been a reduced compliance with the antimicrobial duration policy and antimicrobial documentation requirements compared to non EPMA wards. Increased risk of C. difficile infection. Increased resistance to anti-microbials. Potential financial penalty via CQUINS in relation to C difficile cases (£50k per patient above C Diff. target). Poor Trust reputation with Commissioners in relation to quality of care.</p>	Patient safety	Education and training of prescribers (including educating prescribers to record duration for antimicrobials). Monitoring of progress (including weekly telecommunications) in relation to including an antimicrobial section within EPMA and exception reports to TIPAC if there is a failure to progress. Attendance on EPMA board to review progress.	Major	20 Almost certain	<p>Mandate use of indication and duration fields in EPMA - 30/04/14</p> <p>Create second microbial tab within EPMA - to be advised</p>	KDA 4	8

2194	Theatres ITAPS	Risk of unplanned loss of theatre, recovery or Critical Care capacity across UHL due to insufficient nursing staffing	13/01/2014 28/06/2013	<p><b>Causes:</b> Locally, ITU and theatre nursing staff have been historically difficult to recruit and retain. Turnover regularly negates recruitment efforts and the effects of a poor working environment in a high stress and risk area has meant difficulties in resolving the issue previously.</p> <p><b>Consequences:</b> 1. Increased overtime and waiting list payments required to run the core service 2. Tired and unmotivated staff in post 3. Poor staff morale working in an aged and difficult working environment 4. Difficulty in recruiting and retaining specialised staff (theatre and Critical care ) due to poor working environment and low staff morale in general 5. Reduction in critical care capacity across UHL 6. Inability to respond to increases in demand in theatre, recovery and critical care capacity 7. Elective patient cancellations including cancer patients 8. Critical Care alternatives becoming the norm for high level of care patients e.g. Kinmonth, overnight PACU and specialty "HDU's". 9. Poor patient and carer experience for some of our sickest patients</p>	HR	<p>1. Use of Bank and Agency staff with block contracts for consistency and cost effectiveness. 2. Regular team and leadership meetings/training events 3. Rolling adverts in place 4. International recruitment with HRSS and relevant agencies commenced 5. Exit interviews used regularly and in line with trust policy to understand issues exacerbating higher than wanted turnover of staff</p>	Major	16	<p>1. Continuation of monthly rolling adverts - monthly monitoring</p> <p>2. Introduction of electronic rostering to standardise shift patterns and maximise efficient use of theatre, recovery and ITU staff - due 30/04/14 (slippage on action due to roll out plans and implementation of theatre off duty into current system)</p>	4	JHOL	10

607	Blood Transfusion Clinical Support and Imaging	Failure of UHL BT to fully comply with BCSH guidance and BSRs may adversely impact on patient safety and service delivery	01/02/2014 22/12/2006	<p><b>Causes:</b> Failure to implement electronic tracking for blood and blood products to provide full traceability from donor to recipient. At UHL blood is tracked electronically up to the point of transfer of blood from local fridge to patient with a manual system thereafter which is not 100% effective (currently approximately 1 - 2% (approx 1200 units) of all transfusion recording is non-compliant = 98% compliance). Non-compliance with blood transfusion policies resulting in incorrect identification processes resulting in sample identification and labeling error resulting in wrong blood cross-matched and / or provided for patient (last incident of ABO incompatibility by wrong transfusion approx. 4 years ago (yr 2008); approximately 6 near misses per year).</p> <p>New British Committee for Standards in Haematology (BCSH) guidelines require 2 samples from a patient where manual pre-transfusion compatibility testing is performed. An electronic system would require only 1 sample. Critical report received from MHRA in relation to UHL having no credible strategy for compliance with Blood Safe</p> <p><b>Consequences:</b> Potential loss of blood bank licence (via MHRA) with severe Financial penalty for non-compliance. Delay in timely supply of blood and blood components for n Increased potential for 'Never event' (i.e. wrong transfusion) Potential loss of Trust's good reputation via publication of c Inefficiencies in service delivery.</p>	Quality	<p>Policies and procedures in place for correct patient identification and blood/ blood product identification to reduce risk of wrong transfusion.</p> <p>Paper system provides a degree of compliance with the regulations.</p> <p>Training and competency assessment for UHL staff involved in the transfusion process including e-learning and induction training with competency assessment for key staff groups.</p> <p>Fortnightly monitoring and reporting system to CBU Managers in relation to blood/ blood product traceability performance.</p>	Major	16	<p>Submit briefing paper to UHL Executive Team and EMPATH. 31/01/14</p> <p>IM&amp;T project approval. 31/1/14</p> <p>Obtain Board approval for funding. 31/01/14</p> <p>Develop implementation plan for electronic tracking system. 31/01/14</p> <p>Complete SOP's and quality documentation. 31/1/14</p> <p>Training within clinical areas. 31/1/14</p> <p>Implement system start date - tba</p>	4	KJON	8

2248	Medical Physics	Clinical Support and Imaging	Lack of IR(ME)R training records held across the Trust	28/02/2014 14/11/2013	<p>Although the Trust Radiation Protection Policy states that "IRMER training records must be managed and maintained by individual Directorates (to be changed to Clinical Business Units in the current review) involved in the use of radiation" audits carried out routinely find that these training records are not sufficient, particularly for medical staff. Audits therefore suggest the policy is not being followed.</p> <p><b>Causes</b> Current training records are poorly designed and / or incomplete / do not exist Inadequate or missing training records for IR(ME)R defined roles due to lack of compliance with the Trust policy in some areas. Staff working independently without reaching full competency No central records are kept of which staff have responsibilities under IRMER</p> <p><b>Consequences</b> Lack of suitable training records may result in a failure to comply with standards set by regulatory and healthcare agencies (e.g. HSE / CQC). Failure at assessment might result in financial penalty and / or warning notices being issued. Non-compliance with national standards leading to enforcement action taken on the Trust following a routine inspection Increased patient radiation doses due to lack of training. Increased staff doses due to lack of awareness of the potential Potential damage to expensive equipment if training on how to use equipment is inadequate Management unable to easily identify which staff are trained Breach of statutory duty Negative effect on the reputation of the Trust</p>	Quality	<p>There is a defined method of recording training across the Trust in the Trust Radiation Safety policy. Although this is working in some areas it is not working consistently in all areas. The issue has been raised at the Trust Radiation Protection Committee numerous times where representatives of each Division have been in attendance. This has not so far led to an increase in compliance. Radiation Protection produced a specific plan of what is required to demonstrate compliance. Mock audit completed 2/12/13.</p>	16	Likely	Major	<p>1. Identify Trust staff with responsibilities under IRMER - due 28/2/2014 3. Investigate potential of using e-UHL to deliver a centralised record of IRMER training - due 31/3/2014 4. Introduce centralised training records for IRMER compliance - due 31/03/2014 5. Review training in the policy. due 01/04/2014 6. Ongoing monitoring of the effectiveness of the determined method of recording training will be detailed in the new policy. due 01/04/2014 7. CMG and service to manage and maintain records for the staff groups identified due 31/03/2014</p>	4	MNO	12

2153	Paediatrics	Women's and Children's	Children's Hospital including ECMO staffing and Capacity	05/03/2013	<p><b>Causes</b></p> <p>The Children's Hospital is currently experiencing a shortfall in the number of appropriately qualified Children's nurses. This is in part due to the increased numbers of staff on maternity leave and the issues with recruiting Children's trained nurses.</p> <p>The demand for PICU beds currently outweighs capacity. There is an establishment of 6.5 beds but due to vacancies and long-term sickness/maternity leave the unit is currently only able to run at maximum capacity of 6 beds and on specific days only 5 beds (depending on the overall ECMO activity across adults and children). In addition to NHS activity the Trust has contracted to provide cardiac surgery for a cohort of Libyan children. At the time that the contract was developed (Nov-December 2012) it was assessed that there would be sufficient capacity to operate on one child per week without impacting on NHS Activity. However, the current staffing and long-term profile of patients on PICU has resulted in pressures on both NHS work and the delivery of the Libyan contract. Currently there are vacancies for 5.82 wte qualified and 1 v</p> <p><b>Consequences</b></p> <p>There is a short fall in the number of appropriately qualified</p> <p>Balancing the demand for PICU beds between NHS contra</p> <p>Unsafe staffing levels, therefore unable to provide the reco</p> <p>Staff from PICU are moved to cover ward shifts to ensure n</p> <p>Elective surgery cases have to be cancelled on the day of t</p> <p>Nurses without the key ITU or paediatric skills may be used</p> <p>Children's medication can be delayed.</p> <p>Communication with parents is not optimum.</p> <p>Staff miss breaks in order to facilitate care.</p> <p>There has been an increase in staff sickness levels and mo</p> <p>There are an increased number of complaints being receive</p>	HR	<p>The bed base in Leicester Royal infirmary has been reduced. There is an active campaign being undertaken to recruit new nurses from around the country. Additional health care assistance have been employed to support the shortfall of qualified nurses.</p> <p>No further Libyan patients are being operated on until agency staff can be recruited to support their PICU stay or until the patient flow changes on PICU to allow week-end operating which does not compromise week-day operating or access to PICU.</p> <p>Active Recruitment in progress</p> <p>Educational team cover clinical shifts</p> <p>Cardiac Liaison Team cover Outpatient clinics</p> <p>Overtime, bank &amp; agency staff requested</p> <p>Lead Nurse, Matron and ECMO Co-ordinator cover clinical shifts</p> <p>Children's Hospital &amp; Adult ICU staff cover shifts</p> <p>The beds on Ward 30 have been reduced from 13 to 10</p> <p>PICU beds are closed where necessary</p>	Major	16	Likely	Income from the Libyan Ministry of Health programmer will be used to fund agency nursing staff to open an additional PICU bed - 30/04/2014. Recruitment of suitably trained/experienced agency PICU nurses - 30/04/2014.	8	LBLA	3
