

TRUST BOARD – 7th MAY 2015

QUALITY AND PERFORMANCE REPORT – MARCH 2015

DIRECTOR:	Carol Ribbins, Acting Chief Nurse Andrew Furlong, Interim Medical Director Richard Mitchell, Chief Operating Officer Emma Stevens, Acting Director of Human Resources Darryn Kerr, Director of Estates and Facilities
AUTHOR:	
DATE:	7th May 2015
PURPOSE:	The following report provides an overview of the March Quality & Performance report highlighting NTDA/UHL key metrics and escalation reports where required. It includes a Chief Executive's summary of key issues.
PREVIOUSLY CONSIDERED BY:	Integrated Finance, Performance and Investment Committee Quality Assurance Committee
Objective(s) to which issue relates *	<input checked="" type="checkbox"/> 1. Safe, high quality, patient-centred healthcare <input checked="" type="checkbox"/> 2. An effective, joined up emergency care system <input checked="" type="checkbox"/> 3. Responsive services which people choose to use (secondary, specialised and tertiary care) <input checked="" type="checkbox"/> 4. Integrated care in partnership with others (secondary, specialised and tertiary care) <input checked="" type="checkbox"/> 5. Enhanced reputation in research, innovation and clinical education <input checked="" type="checkbox"/> 6. Delivering services through a caring, professional, passionate and valued workforce <input checked="" type="checkbox"/> 7. A clinically and financially sustainable NHS Foundation Trust <input type="checkbox"/> 8. Enabled by excellent IM&T
Please explain any Patient and Public Involvement actions taken or to be taken in relation to this matter:	
Please explain the results of any Equality Impact assessment undertaken in relation to this matter:	
Organisational Risk Register/ Board Assurance Framework *	<input checked="" type="checkbox"/> Organisational Risk Register <input checked="" type="checkbox"/> Board Assurance Framework <input type="checkbox"/> Not Featured
ACTION REQUIRED *	
For decision <input type="checkbox"/>	For assurance <input checked="" type="checkbox"/>
	For information <input type="checkbox"/>

- ♦ We treat people how we would like to be treated
- ♦ We do what we say we are going to do
- ♦ We focus on what matters most
- ♦ We are one team and we are best when we work together
- ♦ We are passionate and creative in our work

CHIEF EXECUTIVE'S HIGHLIGHT REPORT – AN OVERVIEW OF 2014/15

For this report I have focussed on providing an overview of performance in the year just completed. **Green** indicates compliant performance or that good progress was made, **yellow** that there was some progress but there remains more to do and **red** that there was either no progress or performance actually deteriorated. All figures are for the whole year unless otherwise stated, and comparisons are with 2013/14.

It will be seen that whilst there has been progress in a range of areas, that progress is not universal and there remains work to be done to achieve consistently high performance.

Clostridium difficile

We ended the year on 73 cases against a "limit" of 81. However, in 2014/15 we had only 66 cases so although we met the target our performance deteriorated slightly.

MRSA

We had 6 cases compared with 3 in 2013/14. However, only one of those was avoidable.

Never events

There were 3 never events, the same number as in 2013/14.

Serious incidents

The number of serious incidents dropped from 60 to 41.

Falls

Our falls rate fell from 7.1 to 6.9, indicating some progress particularly in the second half of the year.

Pressure ulcers

The total number of Grade 2, 3, and 4 avoidable pressure ulcers fell by 16%, indicating the impact of work in this area. Evidence indicates that there is a direct correlation between pressure ulcer numbers and staffing levels, emphasising the need to maintain the programme of investment in nurse staffing.

Friends and Family Test

There was positive progress across all of the Inpatient, A&E and maternity tests. A&E was most striking, rising from 58.5 to 69.3. There were also major improvements in coverage, with a new high of 44.8% inpatient coverage achieved for March.

Staff Appraisal

Staff appraisal rates were maintained at a healthy 91.4% but judging by the staff survey there is more to do to make these more valued by staff themselves.

Mandatory Training

We met our target to achieve 95% compliance by the end of March 2015. This compares to 76% in March 2014.

Fractured Neck of Femur

There was no real progress on this issue during the year, with performance actually deteriorating from 65.2% to 61.4%. This area is subject to a Listening into Action intervention and should also benefit from investment in 2015/16 into a new trauma service model.

RTT Waiting Times

All three RTT standard showed in improvement in year. Both the non-admitted and incomplete targets were compliant by year end on a sustainable basis. Admitted backlog reduced by over 900 patients (63%) between March 2014 and March 2015 and admitted performance improved from 76.7% to 84.4% over the same period. This standard is planned to reach the 90% standard by May 2015.

Emergency Care 4 hour target

Overall performance for the year was 89.1% compared to 88.4% in 2013/14. Although our absolute performance was broadly stable, our relative performance improved markedly, moving us from the bottom 10 of the 140 A&E providers to mid-table. Nevertheless, the standard is 95% and we need to do more to get there, hence the continued focus on emergency care in our priorities for 2015/16.

Cancer

After a strong performance in 2013/14, we struggled all year to meet our cancer standards, only starting to make real progress in the second half of the year. We do not yet have full year validated data but the 14 and 31 day standards are expected to be met in March. 62 day compliance is expected to be achieved in July 2015.

Operations Cancelled on the Day for Non-Clinical Reasons

The percentage of operations cancelled on the day for non-clinical reasons reduced to 0.9% in 2014/15 compared to 1.6% in 2013/14, resulting in 736 fewer patients having their operation cancelled.

Delayed Transfers of Care

There was very good progress with DTOCs in the second half of the year, reaching a record low of 1.8% in March 2015. The overall rate for the year was 3.9% compared to 4.1% in 2013/14.

Ambulance Handover

There was a major deterioration in reported performance against this indicator in 2014/15. There were 3,067 over 60 minute delays compared to 868 in 2013/14 and there were 11,315 over 30 minute delays compared to 7,075. Although there have been concerns about data accuracy, this is clearly an unacceptable position and we need to focus our efforts on improving it significantly. This specific area has been identified as one of the Trust's corporate priorities for 2015/16.

Mortality Rates

The SHMI data for the most recent quarter has not yet been published. It is hoped that we will be able to give a verbal update at the Trust Board.

Compliance Forecast for Key Responsive Indicators

Standard	March actual	April predicted	Month by which to be compliant	RAG rating of required month delivery	Commentary
Emergency Care					
4+ hr Wait (95%) - Calendar month	91.1%				
Ambulance Handover (CAD)					
Ambulance Handover >60 Mins (CAD)	418	320			
Ambulance Handover >30 Mins and <60 mins (CAD)	1023	1056			
RTT (inc Alliance)					
Admitted (90%)	84.4%	88.0%	May		87% current prediction for April. Will require significant improvement to deliver April. Informed TDA and CCG of slip to May due to Orthopaedics and ENT.
Non-Admitted (95%)	95.5%	95.6%	Continued Delivery		March including Alliance has achieved. Predicting ongoing compliance.
Incomplete (92%)	96.7%	96.2%	Continued Delivery		Backlog clearance improving sustainability. Performance is now 29 out of 148 trusts.
Diagnostic (inc Alliance)					
DM01 (<1%)	0.9%	0.9%	March		March delivered. Predicted April delivery.
Cancelled Ops (inc Alliance)					
Cancelled Ops (0.8%)	0.9%	0.8%	Continued delivery		April currently being validated.
Not Rebooked within 28 days (0 patients)	1	2	March		April currently being validated.
Cancer (predicted)					
Two Week Wait (93%)	91.5%	91.2%	March		Patient choice now the dominant reason for failure all UHL tumour sites compliant for capacity and speed of offering patients dates.
31 Day First Treatment (96%)	93.6%	89.5%	May		Skin patients have chosen to wait longer and no clock pause can be applied in non-admitted setting. Currently reviewing the 20 breaches to understand the potential recovery actions in month.
31 Day Subsequent Surgery Treatment (94%)	81.0%	88.5%	April		Urology backlog clearance during March.
62 Days (85%)	83.3%	77.7%	July		62 Day backlog increasing in LOGI, Lung and Gynae. Urology reducing as per plan. All tumour sites have returned with confidence about return to trajectory.

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly / end of year)	Latest month performance	YTD performance	Forecast performance for next reporting period										
<p>The cases of CDT have been the subject of Post Infection Reviews and there are no discernible factors that link these cases to date.</p> <p>Concerns in relation to compliance with the National Minimum Cleaning frequencies have been expressed from colleagues within all CMGs and have been identified by the IPT.</p> <p>Repeated requests for the current cleaning frequencies and hours aligned to each area to be made available have not been received to date. UHL is therefore not in a position to verify that the Interserve transformation team correctly implemented NCS,</p> <p>Interserve audits previously carried out to date did not report 1st failures and therefore a false reassurance as to the standard of cleaning in some areas is felt to have been given Interserve has been instructed to stop reporting audits based on re-testing of cleaning inspections and to report only the result of the first inspection. This should give a more accurate picture of any inadequate cleaning practice, allowing focused attention on these areas with the intention that this will raise the standard of cleaning, including spore removal, in these areas.</p>	<p>Action plans that have resulted from the PIR should be presented to the CMG Infection Prevention Groups and should follow the PIR process flow chart as described in the Infection Prevention Toolkit</p> <p>In line with the 'updated guidance in the diagnosis and reporting of Clostridium difficile' the cases have been sent to Commissioning Group that has been established to review each case individually. The comments from this group will be received within seven working days. This process commenced in October and sample positive cases that are the subject of PIR will be sent monthly for review.</p> <p>A thematic review of CDT cases with an action plan was presented to the February TIPAC. This will also be presented to the EQB and CQRG meetings in April.</p> <p>The number of cases to date mirrors last year's numbers at this time however we continue to strive for a further reduction in cases.</p> <p>The Director of Facilities will chair a newly formed monthly Infection Prevention Operational Group who in conjunction with a quarterly TIPAC have as their remit the review of current cleanliness forums in place, to ensure these are fit for purpose and are monitoring cleanliness and ensuring performance delivery effectively.</p>	5	7	73	N/A

S6 Overdue CAS alert

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly / end of year)	Latest month performance	YTD performance	Forecast performance for next reporting period																																								
<p>One NHS England NPSAS alert deadline was breached by Musculo-Skeletal and Specialist Surgery (MSS). This was due to unplanned absence of Head of Nursing and PA who would normally administer the alerts.</p> <p>All actions had been taken to comply with the alert however on day of deadline there were no staff in MSK/SS who could confirm the status of the alert to the UHL CAS team.</p>	<p>CMG has been requested to review its management arrangements for these alerts and to consider increasing the number of staff involved in managing the alerts in order to provide additional resilience for unplanned absences.</p>	100% of alerts completed in deadline	1 breached deadline	10 breached deadlines	No breaches

S12 and S13 Hospital Acquired Pressure Ulcers (Grade 4 and Grade 3)

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly)	Latest month performance	YTD performance	Forecast performance for next reporting period																																																								
<p>S12 – In March 2015 there was a Grade 4 avoidable HAPU on R36, believed to be as a result of incorrect prescription and use of Anti-embolic stockings (AES). Lessons were identified for medical staff as well as the nursing staff, around ensuring that all safety checks are undertaken prior to decision to use AES for VTE prevention. Another lesson is around inconsistent approach to ensuring twice daily checks of pressure areas under the AE stockings.</p> <p>S13 - During the April 2015 validation process 3 additional cases from February 2015 were confirmed as avoidable pressure ulcers (two grade 3s for R41 and R17 and one grade 2 for R17). These ulcers should have been reported and validated in March and therefore have been added retrospectively to the February HAPU figures (in red in the adjacent table) resulting in the number of Grade 3s going over trajectory.</p> <p>The themes are confirmed as inconsistent approaches to BEST SHOT skin checks resulting in poor quality skin inspection and failure to recognise deterioration in the pressure areas; staffs' inability to recognise pressure damage in a patient with dark skin; skin damage not reported in a timely manner; failure in MDT communication and failure to comply with UHL policy for reporting all Grade 3 Pressure Ulcers on Datix.</p>	<p>S12 -The Acting Chief Nurse is holding a performance management meeting with staff in relation to the Grade 4 HAPU. A robust action plan is in place, led by the ward sister and some of the actions have been already implemented e.g. bespoke Pressure Ulcer prevention and Tissue Viability update for all medical SpRs, additional AES trouble shooting training for all clinical staff on R36; review of the EPMA process.</p> <p>As avoidable Grade 4 HAPUs are considered to be 'local Never Event', a proper MDT meeting is being organised and will be led by the Quality and Safety team as per UHL Policy.</p> <p>S13 - On-going actions via the CMG team and Head of Safeguarding to increase monitoring of documentation.</p> <p>The UHL podiatry team have also been involved in one of these cases (R41) and personal statements issued to ensure appropriate lessons have been learned.</p>	<p>S12 - G4 = 0</p> <p>S13 – G3= 7</p>	<p>G4 = 1</p> <p>G3 = 6 (below threshold). However, retrospective data submitted for February which increased incidence to 9 (above threshold)</p>	<p>G4 = 2</p> <p>G3 = 69</p>	<p>G4 = 0</p> <p>G3 = <= 7</p>

S16 Nutrition and Hydration Metrics - Fluid Balance and Nutritional Assessment

What is causing underperformance?	What actions have been taken to improve performance?	Target	Latest performance	YTD performance	Forecast performance																																			
<p>The Nutrition and Hydration metric is made up of a suite of indicators which include both nutritional assessment, care planning, monitoring of fluid balance. For the Quality Commitment, staff knowledge is also included.</p> <p>Following a baseline period in Q1 it was agreed that improvement threshold would be to achieve 90% by Q4 across all the metrics within each bed holding CMG.</p> <p>There has been an improvement from the Q1 baseline for all CMGs with all metrics (with the exception of CHUGS for Fluid Balance Chart).</p> <p>However, the 90% threshold has not been achieved for ESM in respect of the Nutritional Assessment metric for any month within Quarter 4 and therefore the Indicator is RAG rated Red for the Trust as a whole.</p> <p>The specific metrics that are not being achieved include the Fluid Balance Chart (patient assessment) and Nutrition and Hydration (patient assessment). It is the acute medical wards and assessment unit that appear to need additional support.</p>	<p>Nutrition training was completed across all CMGs with the exception of ITAPs in November last year. One of the actions will be to revisit ESM wards and assessment areas for 'refresher' training.</p> <p>Nutrition training has also been delivered to</p> <ul style="list-style-type: none"> • HCA Induction Programme • International nurses • Preceptorship. • Housekeeper forums • Volunteers <p>Further nutrition education sessions are delivered to specialised areas such as Tissue Viability, renal, critical care, and nutrition link nurses as requested.</p> <p>There is intensive work being undertaken across all CMGs</p> <p>Priority in Q1 will be to support ESM with specific actions around nutritional assessment and maintaining fluid balance charts.</p>	<p>90% across all metrics within each CMG for Q4</p>	<p>83% for Nutritional Assessment for ESM</p> <p>89% for Fluid Balance Charts for CHUGS, ESM & MSS</p> <p>>= to 90% for all other metrics</p>	<p>3 CMGs have achieved 90% for all metrics.</p>	<p>>90% across all metrics within each CMG</p>

W9 Sickness absence

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly / end of year)	Latest month performance	YTD performance	Forecast performance for next reporting period																										
<p>1. There has been an increase in sickness absence from July 2014. (Table 1).</p> <p>2. We have seen a reduction in sickness absence in February to 4.17 %</p> <p>3. Sickness absence reporting highlights an adjustment of around 0.5% due to late closures. The January rate has now reduced from 4.53% to 4.27%. It is therefore expected the February 2015 sickness absence rate will be reduce next month to 4% or below.</p> <p>4. In the last year the Trust has seen an increase in staff taking absence, 'triggers' and long term absences. (Table 2)</p> <p>5. Feedback from Clinical Management Group and Directorates Leads indicates that the increased sickness absence is due to :-</p> <p>a. Increased operational pressures / activity</p> <p>b. Seasonal variations</p> <p>c. Inaccurate data – delays in closing absences</p> <p>d. Management changes / handovers</p> <p>e. Vacancies and other absences reducing management time</p> <p>f. Service pressures delaying sickness absence management</p>	<p>1. Improved data through weekly SMART reports and monthly ESR reports highlighting open absences, closed absences and triggers (3 episodes / more than 10 days / 2 working weeks)</p> <p>2. Discussion at CMG / Directorate Boards and across services / areas with specific actions confirmed</p> <p>3. Making it Happen Reviews, to discuss and agree actions for the management and support of open absences, 'triggers' and complex cases with line managers.</p> <p>4. 6 monthly CMG Sickness Performance Reviews / Case reviews with Occupational Health and Senior and independent HR colleagues.</p> <p>5. Sickness Absence training for managers and administrators</p> <p>Further Actions:</p> <p>6. Local training is facilitated for CMG's / Directorates in response to specific needs – management of long term absence, documentation etc.</p> <p>7. Local actions to address high sickness absence include CMG Management Team 'Hot Spot' meetings, Staff Engagement events to reduce sickness absence and improve the management of sickness absence.</p> <p>8. Improvement plans including timescales are discussed and agreed at CMG / Directorate level to reduce sickness absence and increase performance in the management of sickness absence.</p> <p>9. Specific staff support and targeted management of stress related absences.</p> <p>10. Review of the UHL Sickness Absence in comparison with other NHS organisations in the region. From the information available, UHL has set the lowest sickness absence target and has the second lowest sickness absence levels in the region.</p>	<p>UHL Stretch target 3%</p> <p>(previous SHA target 3.4%)</p>	<p>4.53% (February 2015)</p>	<p>3.75% (average)</p>	<p>3.50% average (April 2015)</p>

E12 – No. of # Neck of femurs operated on 0-35 hrs - Based on Admissions

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly / end of year)	Latest month performance	YTD performance	Forecast performance for next reporting period																														
<p>All of the issues set out in previous reports continue in the service and are exacerbated at times of heightened activity.</p> <p>Significant increases in activity though December and January have had an impact on delivery of the target and ability to operate on patients within target. The current scheduled theatre capacity is insufficient to cope with this level of trauma demand and increasing spinal work. Short notice additional operating sessions continue to be arranged as necessary.</p> <p>The acceptance of out of area elective and emergency spinal work continues to have a detrimental effect on the main trauma capacity as spinal patients are medically prioritised over 'other' trauma which has a knock on effect on #NOF capacity.</p>	<p>An action plan is to be presented to the CMG board in April which details the work that is currently being scoped and implemented from the various outputs of the LiA and other improvement projects within the specialty. Specific blockers include Theatre List start and finish times, Orthogeriatric capacity and Theatre process delays.</p> <p>The listening into action process continues the themes and detailed actions will be published in the action plan to be presented to the CMG board in April.</p> <p>Work continues within the spinal network with regards to capacity across the region and how UHL fits into the future plans.</p>	72%	63%	62%	62%

R3 – RTT Waiting Time - Admitted

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly / end of year)	Latest performance	YTD performance	Forecast performance for next reporting period														
<p>The Trust commitment to deliver the admitted standard from May 2015 onwards remains, but this is not without its risks due to the level of backlog remaining.</p> <p>The graph opposite illustrates the significant admitted backlog reduction achieved from end October 2014 (1218) to the end of March (546). This has been achieved by additional in house activity and outsourcing to the local independent sector providers. The commitment to ensure that the longest waiters are treated remains our priority.</p> <p>By key speciality:</p> <ul style="list-style-type: none"> General surgery, backlog continues to reduce as planned with weekend working in March Urology the backlog has reduced significantly Paediatric Max fax and ENT have been hampered by lack of paediatric elective capacity. Adult ENT, the residual backlog has increased paediatric surgery and urology delivered their target reductions Gynaecology, is on track to deliver its target reduction. Orthopaedics, backlog has remained static. It is a significant risk due to the unsustainable non admitted backlog position 	<p>The Trust is achieving 2 of the 3 RTT standards: Non admitted and incompletes performance are both compliant.</p> <p>The actions been taken in admitted are clearly the right actions evidenced by the backlog reductions seen in recent weeks and months.</p> <p>The revised weekly access meeting is working well as is the predictive ability of ensuring delivery.</p> <ul style="list-style-type: none"> Additional activity at weekends continues in April Urology additional in house and independent sector Additional weekend work across the paediatric specialities Additional in house activity Additional work in house but also with the local independent sector. Orthopaedics remains a significant risk to the Trust. Weekend working continues, additional outsourcing to the local Independent sector. 	90% treated within 18 weeks	84.4% (UHL and Alliance)	85%	86%														
<p>The graph below illustrates the backlog reduction at Trust level</p>																			
<div style="text-align: center;"> <p>Admitted backlog actual</p>  <table border="1" data-bbox="1077 368 2033 943"> <caption>Admitted backlog actual data</caption> <thead> <tr> <th>Month</th> <th>Backlog</th> </tr> </thead> <tbody> <tr> <td>Oct-14</td> <td>1218</td> </tr> <tr> <td>Nov-14</td> <td>1150</td> </tr> <tr> <td>Dec-14</td> <td>950</td> </tr> <tr> <td>Jan-15</td> <td>920</td> </tr> <tr> <td>Feb-15</td> <td>800</td> </tr> <tr> <td>Mar-15</td> <td>546</td> </tr> </tbody> </table> </div> <p>Risks to delivery of the admitted 90% standard in May</p> <p>There are now 2 specialities that poses the greatest risk to delivery of the Trust level admitted standard in May orthopaedics (as detailed in last month's report) and ENT adult and paediatric due to the residual backlog volumes:</p> <p>Mitigation</p> <p>All key speciality plans being reviewed by Director of Performance and Information. ENT is undergoing a detailed review of their admitted pathways with input from corporate team</p> <p>Orthopaedics on daily reporting of key improvement metric.</p> <p>Re modelling of anticipated performance.</p> <p>Ongoing additional activity in key specialities.</p> <p>Additional outsourcing of activity in orthopaedics</p>						Month	Backlog	Oct-14	1218	Nov-14	1150	Dec-14	950	Jan-15	920	Feb-15	800	Mar-15	546

R15	95.6%	78%	85%	89.2%																																					
<p>R14, 15</p> <p>The system for the integration of complex cancer pathways remains in place (R14, R15) Access to cancer diagnostics remains good.</p> <p>The delivery of timely treatments (R10, R12) lies within the gift of services for surgery, and the oncology department for chemotherapy and radiotherapy. Chemotherapy and radiotherapy treatments have remained timely for the most part. The issue is adequate access to surgical capacity.</p> <p>There is no shortage of overall surgical capacity, the poor performance results from the failure to appropriately prioritise cancer pathways in the face of competing priorities.</p>	<p>R14, 15</p> <p>Trajectory for recovery by tumour site agreed with CMGs to deliver recovery of the standard at trust level monthly by month 4 and cumulatively by month 6.</p> <p>Additional administrative appointments to Cancer Centre to support services pulling patients through pathways.</p> <p>Development of SOP for cancer pathway management between cancer centre and services to commence in June 15.</p>	<p>Expected date to meet standard / target</p> <p>R8 – Recovered December R10,12 – Recovery expected M12 2014/15 R14,15 – Recovery expected M6 2015/16</p>	<p>Revised date to meet standard</p> <p>As Above, 2WW vulnerable to patient choice</p>	<p>Lead Director / Lead Officer</p> <p>Will Monaghan, Director of Performance and Information Matt Metcalfe</p>																																					

R17 - cancelled operations not booked within 28 days

INDICATORS: The cancelled operations target comprises of three components: 1. The % of cancelled operations for non-clinical reasons On The Day (OTD) of admission 2. The number of patients cancelled who are offered another date within 28 days of the cancellation 3. The number of urgent operations cancelled for a second time.																																												
What is causing underperformance?	What actions have been taken to improve performance?	Target (monthly)	Latest month performance – Mar 14	YTD performance (inc Alliance)	Forecast performance for next reporting period																																							
<p>Causes of OTD cancellations changed this month due to paediatric bed pressures and emergency/high priority admissions.</p> <p>Thirteen paediatric patients were cancelled due to paediatric ward bed unavailability in LRI.</p> <p>Patients cancelled due to admissions of emergency/high priority admissions went up to 20 this month which is an increased of 13 compared to last month.</p> <p>Seven patients were cancelled due to adult ward beds unavailability in LRI (6) and LGH (1).</p> <p>There was one, 28 day breach. The patient was given a date for treatment within 28 days but due to ITU/HDU pressures the patient was cancelled for a second time. The patient had the operation on the 22nd of March.</p> <p>In March 2014, UHL had 128 OTD cancellations (1.4%). There were 26 fewer cancellations in March 2015.</p>	<p>A number of work streams have started aimed at reducing OTD cancellations including a LIA project.</p> <p>A successful LIA event was completed with participation of 48 staff in all three sites. Lots of useful feedback and a number of new ideas were provided by the staff to reduce cancellations. The LIA team are working to implement the changes suggested which include changes to the existing escalation policy and minimising number of list overruns.</p> <p><u>Risks to delivery of recovery plan</u> The key action to ensure on-going performance is the daily escalation of patients at risk of cancellation, on the day as part of the UHL escalation policy. For those who may be cancelled on the day, it is vital that staff adhere to the Trust policy of escalating to CMG General Managers for resolution prior to agreeing any cancellations.</p>	<p>1) 0.8%</p> <p>2) 0</p> <p>3) 0</p>	<p>1) 0.9%</p> <p>2) 1 (UHL)</p> <p>3) 0</p>	<p>1) 0.9%</p> <p>2) 44</p> <p>3) 0</p>	<p>1) 0.8%</p> <p>2) 2</p> <p>3) 0</p>

RS6A : Proportion of NHS Trusts recruiting each year into non-commercial NIHR CRN Portfolio studies

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly / end of year)	Latest month performance	YTD performance	Forecast performance for next reporting period
<p>Proportion of NHS Trusts recruiting each year into non-commercial NIHR CRN Portfolio studies</p> <p>The NIHR Clinical Research Network has an HLO with the Department of Health for 99% of Trusts in England to recruit to CRN Portfolio research each year. This has been passed down to local research networks.</p> <p>There are 16 Trusts within the East Midlands region, with 14 Trusts currently reporting recruitment. The two who have not reported any recruitment are:</p> <ul style="list-style-type: none"> • East Midlands Ambulance Service NHS Trust (EMAS) • Lincolnshire Community Health Services (LCHS) 	<ol style="list-style-type: none"> 1. EMAS: have received funding in 2014/15 for a Research Paramedic. This post currently supports two NIHR Portfolio studies that do not report recruitment in the traditional way due to patient assent taken rather than consent. EMAS have four studies in the pipeline that are due to open in 2015/16 including the AIRWAYS 2 study. Therefore it is unlikely that EMAS will report any recruitment before April 2015. 2. LCHS: this Trust supports several CRN Portfolio studies, however the consent event occurs in the primary care setting so the recruitment is attributed to Clinical Commissioning. There is scope for research within the community services (paediatrics, district nursing) that is being investigated, however it is unlikely that this Trust will report recruitment this financial year. 	99%	88% (red)	88% (red)	88%
		Expected date to meet standard / target		This target will not be met in 2014/15.

RS6b Proportion of NHS Trusts recruiting each year into commercial NIHR CRN Portfolio studies

What is causing underperformance?	What actions have been taken to improve performance?	Target (monthly / end of year)	Latest month performance	YTD performance	Forecast performance for next reporting period
<p>Proportion of NHS Trusts recruiting each year into commercial NIHR CRN Portfolio studies</p> <p>There are 16 Trusts within the East Midlands region, with 9 Trusts currently recruiting to commercial studies. The seven who have not reported any recruitment are:</p> <ul style="list-style-type: none"> • East Midlands Ambulance Service NHS Trust (EMAS) • Derbyshire Community Health Services NHS Foundation Trust (DCHS) • Lincolnshire Community Health Services (LCHS) • Leicestershire Partnership NHS Trust (LePT) • Lincolnshire Partnership NHS Trust (LiPT) • Nottinghamshire Healthcare NHS Foundation Trust (NHFT) • Derbyshire Healthcare NHS Foundation Trust (DHFT) 	<ol style="list-style-type: none"> 1. EMAS: Currently no open commercial studies nationally run by ambulance services on the NIHR portfolio, therefore unlikely that EMAS will open a commercial study this financial year. Industry team currently reviewing studies previously run at other ambulance services across the country to gain insight. Met and sent potential examples to review 2. DCHS: Due to the nature of research within this Trust, they are unlikely to be involved in commercial research, Have met with Trust and a preliminary plan is in place to take this forward. 3. LCHS: Due to the nature of research within this Trust, they are unlikely to be involved in commercial research. Met on the 18th December and a preliminary plan is in place to take this forward. 4. LePT: Selected for one study, logistics being explored but study now suspended globally 5. LiPT: Have been involved in commercial research in the past and the site is actively seeking commercial opportunities. One sponsor in touch looking to take a study forward. 6. NHFT: One trial initiated at the end of November 2014, 2nd UK site to open no recruits to date as study now suspended globally but did have recruits lined up. One further site selection visit completed in March 2015 and site now selected 7. DHFT: 2 potential studies in the pipeline. One had site selection visit in February 2015 awaiting confirmation if selected. 	70%	56% (red)	56% (red)	56%

E&F 7- Percentage of Cleaning audits in clinical areas achieving NCS audit scores for cleaning above 90%

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly / end of year)	Latest month performance	YTD performance	Forecast performance for next reporting period																
<p>Percentage of audits in clinical areas achieving NCS audit scores for cleaning above 90%</p> <p>Feb 15 – 94% Mar 15 - 96%</p> <p>7 Audits failed to achieve the required standard in the following areas Leicester General - Hydro Pool Leicester Royal Infirmary - Balmoral Ward 22, Test Centre, OP Clinic 3; Windsor Building - Ward 37; Kensington Building – Gynae Theatres; Osborne Building – Palliative Care. The key reason for failure was the noted presence of dust. Each of these issues was rectified and subsequent audits passed.</p> <p>Under the current Management of Change process, there is potential impact that may be felt from staff consultation that is underway, however we are actively managing this process to limit impact on morale.</p>	<p>The current review of cleaning rosters and tasks across the Acute Estate is underway and this process alongside investment in equipment will support cleaning standards within the UHL. This review and changes have been documented and shared with the EFMC.</p> <p>We have addressed the site based failings with our staff through team meetings and to individuals working within the ward / department. We will continue to monitor and drive performance forward.</p>	100%	96.1%	98.5%	100%

CQC – Intelligent Monitoring Report

The latest CQC Intelligent Monitoring Report (IMR) was published on the CQC website on the 3rd December 2014.

The IMR evaluates against a range of indicators relating to the five key questions used by the CQC as part of their inspections - is the organisation safe, effective, caring, responsive, and well-led?

Within each area of questions a set of indicators has been developed and each indicator has then been analysed to identify the following levels of risk for each organisation:

- 'no evidence of risk'
- 'risk'
- 'elevated risk'

The next publication date is May 2015.

Priority banding for inspection	Recently inspected
Number of 'Risks'	7
Number of 'Elevated risks'	1
Overall Risk Score	9
Number of Applicable Indicators	94
Percentage Score	4.79%
Maximum Possible Risk Score	188

Elevated risk	Whistleblowing alerts (18-Jul-13 to 29-Sep-14)
Risk	PROMs EQ-5D score: Groin Hernia Surgery (01-Apr-13 to 31-Mar-14)
Risk	Composite indicator: A&E waiting times more than 4 hours (01-Jul-14 to 30-Sep-14)
Risk	All cancers: 62 day wait for first treatment from NHS cancer screening referral (01-Apr-14 to 30-Jun-14)
Risk	Proportion of ambulance journeys where the ambulance vehicle remained at hospital for more than 60 minutes (01-Apr-14 to 30-Apr-14)
Risk	TDA - Escalation score (01-Jun-14 to 30-Jun-14)
Risk	GMC - Enhanced monitoring (01-Mar-09 to 22-Jul-14)
Risk	Patient Opinion - the number of negative comments is high relative to positive comments (28-May-13 to 27-May-14)

Quality Schedule and CQUIN Schemes

Confirmed RAG's for Quarter 3 and predicted RAG's for Quarter 4.

Ref	Indicator Title	Q1 RAG	Q2 RAG	Q3 RAG	Q4 Predicted RAG	Commentary
QUALITY SCHEDULE						
PS01	Infection Prevention and Control Reduction. - C Diff	G	A	A	tbc	Q2 and Q3 remain as Amber RAG'd as not all additional information provided around CMG IP Plan updates. Q4 RAG will be dependent upon submission of all required information to include thematic review findings for C Diff cases and MRSA and MSSA bacteraemias. C Diff. threshold achieved with 73 reported cases for 14/15 which is below the NTDA trajectory (81) but above UHL's own threshold.
PS02	HCAI Monitoring - MRSA	0	1	3	2	1 'avoidable' Bacteraemia in February and 1 'unavoidable' in March
PS03	Patient Safety – SIs, Never Events	G	G	2	1 (Jan)	Q3 & Q4 Red RAG for Never Events. (relating to 'wrong sized hip prosthesis, retained Swab ties and wrong site surgery) Number of incidents reported continues to rise. But there has been a reduction in number that resulted harm.
				G	G	
PS04	Duty of Candour	0	0	0	0	No breaches during 14/15.
PS05	Complaints and user feedback Management (excluding patient surveys).	A	A	G	G	Complaints responses performance improved and achieved for December. Commissioners noted improvement made with response times in Q3 and Green RAG given. Improved performance sustained in Q4.
PS06	Risk Assurance and CAS Alerts	A	A	G	G	Amber RAG for Q2 relates to overdue CAS alerts for July. All risks scoring 15 or above have been reviewed within their required timeframe and have up to date action plans. Breach due to delayed receipt of confirmation that all actions completed in response to NPSA alert.
					1	
PS07	Safeguarding – Adults and Children	G	G	G	G	Assurance documentation due to be sent to CCG Safeguarding leads for their review ahead of their observational visit to the Trust.
PS08	Reduction in Pressure Ulcer incidence.	G	G	R (Nov & Dec)	R (Feb & Mar)	Monthly thresholds met for G2 HAPUs during Q4. Above the monthly trajectory of 7 for Grade 3 HAPUs in Feb following further validation (9). Grade 4 HAPU identified for March – related to use of Anti-embolic stockings.
PS09	Medicines Management Optimisation	A	G	A	G	Commissioners noted improvement in Controlled Drugs audit report and also Medicines Code but thresholds not fully achieved. Progress made with developing LLR Medicines Optimisation Strategy.
PS10	Medication Errors	G	G	G	G	Increased reporting of errors and actions being taken.
PS11	Venous Thromboembolism (VTE) and RCAs of Hospital Acquired Thrombosis	95.7%	96.1%	95.2%	96.1%	RCAs in progress for Hospital Acquired Thrombosis. Q4 RAG dependent upon achievement of 100% threshold.
PS12	Nutrition and Hydration	G	>80%	>85%	>83%	Work programme on track for nutrition, some delays with hydration actions. 90% threshold for Nutrition Assessment not achieved for any month in Quarter 4 in ESM and therefore overall Red RAG.

Ref	Indicator Title	Q1 RAG	Q2 RAG	Q3 RAG	Q4 Predicted RAG	Commentary
PE1	Same Sex Accommodation Compliance and Annual Estates Monitoring	2	0	2	1 (Jan)	Jan breach relates to patient on HDU at Glenfield. No breaches reported for Feb or March.
PE2	Patient Experience, Equality and Listening to and Learning from Feedback.	G	G	G	G	Good progress made with triangulation of data. Waiting time main area for improvement.
PE3	Improving Patient Experience of Hospital Care (NPS)	N/A	N/A	N/A	tbc	Not due to be reported until March 15. RAG dependent upon results in the National Patient Survey.
PE4	Equality and Human Rights	G	G	G	G	Progress reported to the September CQRC with further information provided in October – relating to actions being taken to capture BME data
CE01	Communication – Content (ED, Discharge & Outpatient Letters)	A	A	A	tbc	Clinical Problem Solving Group held to agree key priorities. Letters policy launched end of Jan 15. Amber RAG as audit not undertaken so unable to demonstrate improved compliance with Letter standards.
CE02	Intra-operative Fluid Management	G	>80%	<80%	tbc	Performance deteriorated during Oct/Nov. 80% achieved for December. Remedial actions in place to maintain. Q4 data to be confirmed.
CE03	Clinical Effectiveness Assurance – NICE and Clinical Audit	A	A	G	G	Responses for NICE Clinical Guideline / Quality Standards documents on track and actions being taken where audits behind schedule
CE04	Women's Service Dashboard	A	A	A	tbc	Amber RAG for Q2 relates to increase in C Section Rate. Q3 Amber RAG due to not achieving thresholds for Medical Staff Core Skills Training and C Section Rate.
CE05	Children's Service Dashboard	A	A	A	tbc	Q2 Amber RAG relates to SpR training Q3 Amber RAG due to non achievement of thresholds for SpR training and Management plans within 2 hours on the assessment unit.
CE06	Patient Reported and Clinical Outcomes (PROMs and Everyone Counts)	A	A	G	G	Groin Hernia PROMs improved, although still below the national average. Varicose Vein and Hip/Knee Replacement PROMs better or same as national. Consultant Outcomes published and all consultants in line with national average.
CE07	#NOF - Dashboard	51%	67.9%	62.1%	62.2%	72% threshold not met for any month in Q3. Mainly relates to peaks in activity and spinal patients. Improvement in February ((62.7%) from 57.9% in Jan. LiA programme in place and business case submitted to support increased theatre capacity.
CE08a	Stroke monitoring	G	G	72% Avg tbc	82.5 (Jan 15)	Improvements made for Stroke indicators (time to Scan, admission to stroke unit, thrombolysis). Green RAG for Q4 will be dependent upon achievement of the 90% stay (Jan performance >80%) and improvement in SSNAP Domain Scores.
CE08b	TIA monitoring	76%	67%	73.4%	74%	Threshold exceeded for high risk patients and performance improved for low risk patients being seen within 7 days.
CE09	Mortality (SHMI, HSMR)	A	A	A	A	Latest published SHMI = 105 (104.7) and is slowly reducing but is still above 100 (albeit within expected).
CE10	Making Every Contact Count (MECC)	A	G	G	G	Referrals to STOP and ALW continue. 'Healthy Eating and Physical Activity' publicity campaign due to commence in General Surgery and Sleep Clinics. Commissioners noted all the Staff Wellbeing initiatives

Ref	Indicator Title	Q1 RAG	Q2 RAG	Q3 RAG	Q4 Predicted RAG	Commentary
AS01	Cost Improvement Programme (CIP) Assurance	A	G	G	G	Q4 RAG dependent upon provision of sufficient assurance that quality and safety issues being reviewed and actions taken where applicable..
AS02	Ward Healthcheck (Nursing Establishment, Clinical Measures Scorecard)	G	G	G	G	Recruitment of additional nurses continues. Not all wards meeting 'Nurse to bed Ratio' but actions in place. Support being provided to those wards not meeting thresholds in the Clinical Measures Scorecard.
AS03	Staffing governance	A	A	A	A	Internal thresholds not met for Appraisal, Sickness and Corporate Induction or Turnover although improvement noticed. Medical Staffing Strategy submitted.
AS04	Involving employees in improving standards of care. (Whistleblowing)	G	G	G	G	Actions taken to address concerns raised.
AS05	Staff Satisfaction	G	G	G	G	Work undertaken through the LiA process noted.
AS06	External Visits and Commissioner Quality Visits	G	G	G	G	Actions in response to Reviews being taken.
AS07	CQC Registration	A	G	A	G	2 Actions in response to CQC visit findings behind schedule – remedial actions being taken.
NATIONAL CQUINS						
Nat 1.1a	F&FT 1a - Staff	G	G	G	G	Implemented during Q1/2
Nat 1.1b	F&FT 1b - OutPt & Day Case	G	G	G	G	F&FT already happening in Day Case and has started in Outpatients.
Nat 1.2	F&FT 1.2 - Increased participation - ED	16.0%	15.1%	16.2%	22.8% (Avge)	20% Q4 threshold achieved to date
Nat 1.3	F&FT 1.3 - Inpt increase in March	35.8%	31%	34.7%	44.8% (Mar)	Both the Q4 30% threshold and also the 40% threshold for March 15 achieved.
Nat 2.1	ST 2.1 - ST data submission	G	G	G	G	Data collection continues for all 4 harms.
Nat 2.2	ST 2.2 - LLR strategy	G	G	G	tbc	UHL contributing to the LLR Pressure Ulcer group and workstreams. Q4 RAG to be confirmed upon review of UHL's actions.
Nat 3.1	Dementia 3.1 - FAIR	G	G	G	G	90% thresholds met for all parts of the Dementia FAIR CQUIN.
Nat 3.2	Dementia 3.2 - Training & Leadership	G	N/A	N/A	G	Nicky Morgan is new Clinical Lead Dementia Training Programme reviewed and revised. Q4 RAG dependent on evidence of increased staff attending training.
