# INTEGRATED RISK AND ASSURANCE REPORT AS AT 30 JUNE 2017

Author: Risk and Assurance Manager Sponsor: Medical Director

Trust Board paper N

## **Executive Summary**

### Context

This paper informs the UHL Trust Board of the current position with progress of the risk management agenda, including the 2017/18 Board Assurance Framework (BAF) and the operational risk register for items with a current rating of 15 and above. The BAF has been updated by its executive leads and considered at the relevant executive boards during June 2017. The risk register has been scrutinised by CMGs and at the Executive Performance Board in June 2017.

## Questions

- 1. Is the Board fully assured about the current progress with managing strategic risks that may threaten delivering our annual priorities?
- 2. Does the Board have knowledge of new operational risks opened within the reporting period?

## Conclusion

- 1. The BAF format provides focus on controls assurance (what needs to happen to achieve the annual priority), performance assurance (what performance measures are being used to track progress and what do they show is actually happening) and risk assurance (what might threaten the achievement of the annual priority in the form of a strategic risks escalated from the risk register). The strategic risks that threaten delivering the annual priorities are described in risk assurance section in the BAF and will be further worked-up and entered on the risk register. Key risk themes from the quality commitment components of the BAF identify the important role the safe implementation of electronic systems would contribute to delivering the Trust's overall objective of safe, high quality, patient centred, and efficient healthcare.
- 2. During the reporting period of June 2017, six new high risks have been entered on the risk register and are described further in the full paper. Thematic analysis of risks scoring 15 and above on the risk register continues to display the causal factor for the majority of risks is related to workforce capacity and capability with the likelihood to potentially impact on harm.

## Input Sought

We would welcome the Board's input to receive, note and approve this report.

For Reference

Edit as appropriate:

1. The following **objectives** were considered when preparing this report:

| Safe, high quality, patient centred healthcare            | [Yes] |
|---|-------|
| Effective, integrated emergency care                      | [Yes] |
| Consistently meeting national access standards            | [Yes] |
| Integrated care in partnership with others                | [Yes] |
| Enhanced delivery in research, innovation & ed'           | [Yes] |
| A caring, professional, engaged workforce                 | [Yes] |
| Clinically sustainable services with excellent facilities | [Yes] |
| Financially sustainable NHS organisation                  | [Yes] |
| Enabled by excellent IM&T                                 | [Yes] |

2. This matter relates to the following governance initiatives:

a. Organisational Risk Register

[Yes]

[Yes]

| Datix   | Operational Risk Title(s) – add new line | Current | Target | CMG |  |
|---------|--|---------|--------|-----|--|
| Risk ID | for each operational risk                | Rating  | Rating |     |  |
|         | See appendix two                         |         |        |     |  |

#### b.Board Assurance Framework

| BAF entry | BAF Title        | Current<br>Rating |
|-----------|------------------|-------------------|
|           | See appendix one |                   |

3. Related Patient and Public Involvement actions taken, or to be taken: [N/A]

4. Results of any Equality Impact Assessment, relating to this matter: [N/A]

5. Scheduled date for the **next paper** on this topic: [9 September 2017]

6. Executive Summaries should not exceed **1 page**. [My paper does comply]

7. Papers should not exceed **7 pages**. [My paper does not comply]

#### UNIVERSITY HOSPITALS OF LEICESTER NHS TRUST

- REPORT TO: UHL TRUST BOARD
- DATE: 3<sup>RD</sup> AUGUST 2017

**REPORT BY: ANDREW FURLONG – MEDICAL DIRECTOR** 

SUBJECT: INTEGRATED RISK AND ASSURANCE REPORT (INCORPORATING UHL BOARD ASSURANCE FRAMEWORK & RISK REGISTER)

#### 1 INTRODUCTION

- 1.1 This integrated risk and assurance report will assist the Trust Board (TB) to discharge its responsibilities by providing:
  - a. A copy of the 2017/18 Board Assurance Framework (BAF), based on the revised annual priorities.
  - b. A summary of risks on the risk register with a score of 15 and above.

#### 2. BOARD ASSURANCE FRAMEWORK SUMMARY

- 2.1 The BAF sets out the potentially significant risks that threaten the achievement of the Trust's annual priorities and the controls that are in place to mitigate, reduce or transfer these risks. A major priority for the Board is to ensure that risk management is being increasingly used as a key element in the overall governance of the Trust. The BAF arrangements are an embedded tool of the Trust's existing risk management process, therefore ensuring that risk, control and performance assurance processes are considered as one and not disparate activities.
- 2.2 The BAF remains a dynamic and developing document. The BAF has been kept under review during June 2017 and Executive owners have updated their BAF entries to reflect the progress with delivering the annual priorities for 2017/18. Many of the current assurance ratings on the BAF are displayed as amber, recognising that there is a moderate level of risk associated, however at the time of this reporting all priorities are forecast to be delivered by year-end. A copy of the updated BAF is included at appendix one.
- 2.3 Item 1.2.2, concerning the safer use of high risk drugs, is currently graded with a major risk associated due to a delay with progress, in month three, concerning implementing the networked blood glucose monitoring system and links to Nerve Centre.
- 2.4 Thematic analysis of the risks on the BAF associated with delivering our quality commitment continue to show there is a reliance upon safe implementation of appropriate electronic observation systems and processes.

#### 3. UHL RISK REGISTER SUMMARY

- 3.1 For the reporting period ending 30<sup>th</sup> June 2017, there are 47 operational (business as usual) risks open on the risk register scoring 15 and above. A report of these risks is attached in appendix two.
- 3.2 During June 2017, six new 'high' risks have been entered on the risk register:

| Datix<br>ID | Risk Description  | Risk<br>Rating | CMG  |
|-------------|---|----------------|------|
| 3040        | If there are insufficient medical trainees in Cardiology, we may experience an imbalance between service and education demands resulting in the inability to cover rota | 20             | RRCV |
| 3031        | If the MDT activities for vascular surgery are not resolved<br>there is a risk of significant loss of income & activity from<br>referring centres                       | 16             | RRCV |
| 3044        | If under achievement against key CQUIN Triggers, Then income will be affected.  | 16             | ESM  |
| 3041        | If there are insufficient cardiac physiologists then it could result in increased waiting times for electrophysiology procedures and elective cardiology procedures     | 15             | RRCV |
| 3043        | If there is insufficient cardiac physiologists then it could result<br>in reduced echo capacity resulting in diagnostics not being<br>performed in a timely manner      | 15             | RRCV |
| 3023        | There is a risk that the split site Maternity configuration leads to impaired quality of Maternity services at the LGH site   | 15             | W&C  |

- 3.3 Thematic analysis was undertaken in order to ascertain the causation and impact of the operational risks scoring 15 and above.
- 3.4 The results of the analysis are as follows in relation to the causation factors:
  - a. 47% of risks relate to workforce challenges (i.e. recruitment and retention);
  - b. 17% of risks relate to demand and capacity;
  - c. 13% of risks relate to IM&T;
  - d. 13% of risks relate to Estates and Facilities;
  - e. 8% of risks relate to equipment;
  - f. 2% of risks relate to processes and procedures.
- 3.5 The results of the analysis in relation to the potential impact, should the risks occur, displays that the majority of these risks may result in harm involving patients, staff or others. A column to describe the thematic analysis is included in the risk register dashboard report in appendix two.

#### 4 **RECOMMENDATIONS**

4.1 The TB is invited to receive, note and approve this report.

If the physical capacity options at Glenfield are not affordable from a capital and revenue perspective, then it will lead to a demand and capacity imbalance at GH in the winter of 2017/18.

| TB sub Committee | QAC      |                     |  | ition for CHL | ciated with the Elective bed increases required for CHUGGS at LGH, which given the JGGS are unlikely to be able to be opened (4 beds). This gap will have to be mitigated by nis area. |  |  |  |  |
| TB sub Committee | QAC      |                     | The task for 2017/18 is to create additional effective capacity (through actual beds, demand mitigation or improved productivity) of 105 beds. The approach in 17/18 will be different to previous years in that it favours creating capacity sufficient to deal with peak demand and then reducing beds at time when demand is lower than the peak. |               |  |  |  |  |  |
