

INTEGRATED RISK AND ASSURANCE REPORT: JANUARY 2019

Author: Risk and Assurance Manager

Sponsor: Medical Director

Trust Board paper H

Executive Summary

Context

The purpose of this paper is to enable the UHL Trust Board to review the current position with progress of the risk control and assurance environment, including the Board Assurance Framework (BAF) and the organisational risk register.

Note - The BAF should be reviewed in the context of the assurances being provided in other reports also being considered at this Board meeting and Trust Board Sub-Committee meetings.

Questions

1. What are the highest rated principal risks on the 2018/19 BAF?
2. What are the significant changes to the BAF since the previous version?
3. What are the significant changes to the organisational risk register since the previous version?
4. What are the key risk management themes evidenced on the organisational risk register?

Conclusion

1. The principal risks on the BAF have been identified by the Board and are linked to Trust objectives. They relate to: PR1 – Quality standards; PR2 – Staffing levels; PR3 – Financial control total; PR4 – Emergency care pathway; PR5 – IM&T service; PR6 – Estates and Facilities service; PR7 – Partnership working. The highest rated principal risks (currently rated at 20) concern staffing levels, emergency care pathway, delivery of the financial control total and estate infrastructure.
2. There have been no new principal risks entered on the BAF during this reporting period. Changes during this period include an increase to the current rating for the Strategy principal risk 7, which has returned to a rating of 16 (high) and a reduction to the current score for the IM&T principal risk 5, reduced to 12 (moderate).
3. There are 249 risks recorded on the organisational risk register (including 1 extreme and 84 high). There have been no new risks scoring 15 and above entered on the risk register during this reporting period.
4. Thematic Analysis of the CMGs risks registers shows the key causation theme as gaps in staffing across all CMGs.

Input Sought

The Board is invited to review and approve the content of this report and to advise as to any further action required in relation to principal risks recorded on the BAF and items on the organisational risk register.

For Reference

Edit as appropriate:

1. The following **objectives** were considered when preparing this report:

- Safe, high quality, patient centred healthcare [Yes]
- Effective, integrated emergency care [Yes]
- Consistently meeting national access standards [Yes]
- Integrated care in partnership with others [Yes]
- Enhanced delivery in research, innovation & ed' [Yes]
- A caring, professional, engaged workforce [Yes]
- Clinically sustainable services with excellent facilities [Yes]
- Financially sustainable NHS organisation [Yes]
- Enabled by excellent IM&T [Yes]

2. This matter relates to the following **governance** initiatives:

a. Organisational Risk Register [Yes]

Datix Risk ID	Operational Risk Title(s) – add new line for each operational risk	Current Rating	Target Rating	CMG
	See appendix two			

b. Board Assurance Framework [Yes]

BAF entry	BAF Title	Current Rating
	See appendix one	

3. Related **Patient and Public Involvement** actions taken, or to be taken: [N/A]

4. Results of any **Equality Impact Assessment**, relating to this matter: [N/A]

5. Scheduled date for the **next paper** on this topic: [Monthly to TB meeting]

6. Executive Summaries should not exceed **1 page**. [My paper does comply]

7. Papers should not exceed **7 pages**. [My paper does comply, excluding appendices]

UNIVERSITY HOSPITALS OF LEICESTER NHS TRUST

REPORT TO: UHL TRUST BOARD

DATE: 7TH MARCH 2019

REPORT BY: ANDREW FURLONG – MEDICAL DIRECTOR

SUBJECT: INTEGRATED RISK AND ASSURANCE REPORT
(INCORPORATING UHL BOARD ASSURANCE FRAMEWORK &
ORGANISATIONAL RISK REGISTER – JANUARY 2019 FINAL)

1 INTRODUCTION

- 1.1 This integrated risk and assurance report will assist the Trust Board (referred to hereafter as the Board) to discharge its risk management responsibilities by providing:-
- a. A copy of the 2018/19 Board Assurance Framework (BAF);
 - b. A summary of the organisational risk register.

2. 2018/19 BOARD ASSURANCE FRAMEWORK SUMMARY

- 2.1 The Board has overall responsibility for ensuring controls are in place, sufficient to mitigate principal risks which may threaten the success of the Trust's strategic objectives. The format of the BAF is designed to provide the Board with a simple but comprehensive method to monitor the management of principal risks to the achievement of its strategic objectives. The purpose of the BAF is therefore to enable the Board to ensure that it receives evidence that all principal risks are being effectively managed and to commission additional review where it identifies a gap in control and/or assurance.
- 2.2 The BAF remains a dynamic document and all principal risks have been reviewed by their leads or delegated officers (to report performance for January), and have been scrutinised and endorsed by their relevant Executive Boards during February 2019. An updated version of the BAF is attached at appendix one.
- 2.3 There have been no new principal risks entered on the BAF during this reporting period. Changes during this reporting period include, the risk score for Principal Risk 6 (Estates) has been increased from 15 to 20 (high) in the light of the assessed increase likelihood of critical infrastructure failure, and taking into account the significant pressures placed on the Trust's capital programme which has a limiting effect on being able to address backlog maintenance.
- 2.4 The highest rated principal risks on the BAF relate to delivery of the financial control total, the emergency care pathway, workforce capacity and capability, and estate infrastructure:

Principal Risk Description 2018/19	Risk Score (IxL)	Objective & Lead Director
PR2: If the Trust is unable to achieve and maintain the required workforce capacity and capability standards, then it may result in widespread instances of poor clinical outcomes for patients and increased staff workloads, impacting business (quality / finance) and reputation (regulatory duty / adverse publicity).	5 x 4 = 20	Our People DPOP
PR3: If the Trust is unable to achieve and maintain financial sustainability , then it will result in a failure to deliver the financial	5 x 4 = 20	Financial Stability

plan, impacting business (finance & quality) and reputation (regulatory duty / adverse publicity).		CFO
PR4: If the Trust is unable to effectively manage the emergency care pathway , then it may result in widespread instances of poor clinical outcomes for patients and sustained failure to achieve constitutional standards, impacting business (quality & finance) and reputation (regulatory duty / adverse publicity).	5 x 4 = 20	Organisati on of Care COO
PR6: If the Trust does not adequately develop and maintain its estate , then it may result in an increased risk of failure of critical plant, equipment and core critical services leading to compliance issues, risk of regulatory intervention, impact upon business and patient critical infrastructure and adverse publicity.	5 x 4 = 20	Key Strategic Enabler DEF

- 2.5 The corporate risk team have a meeting scheduled with the new Chair of Audit Committee, in early March, to review the BAF governance process and discuss opportunities for improvement with the 2019/20 version. The refresh of the BAF will need to reflect what goes into the new Quality Strategy and the changing environment, such as the NHS long-term plan and changes to financing for providers. The BAF will be further worked-up with the Executive Team and the Board (via Board meetings and Development Sessions), with the first draft of the 2019/20 BAF available to go to the Trust Board meeting in June 2019.

3. ORGANISATIONAL RISK REGISTER SUMMARY

- 3.1 The Trust's organisational risk register, consisting of operational and corporately owned risks, has been kept under review by the Executive Performance Board and CMG Boards during the reporting period and displays 249 risks. The risk profile, by current risk rating, is illustrated in Figure 1, below, and a dashboard of the risks rated 15 and above is attached at appendix two.

Fig 1 - UHL Organisational Risk Register Profile

- 3.2 There have been no new risks rated 15 and above entered on the risk register during the reporting period.
- 3.3 No risks rated 15 and above have been closed during the reporting period.
- 3.4 Thematic analysis of the organisational risk register shows the key risk causation theme as workforce challenges (including nursing and medical staff shortages) across all CMGs. Thematic findings from the risk register are reflective of the highest rated principal risks on the BAF.

4 RECOMMENDATIONS

- 4.1 The Board is invited to review and approve the content of this report, noting the position to principal risks on the 2018/19 BAF and local risks on the organisational risk register, and to advise as to any further action required in relation to UHL risk management framework.

Report prepared by Risk & Assurance Manager, 27/02/2019.

UHL Board Assurance Framework 2018/19:

The Board Assurance Framework (BAF) is designed to provide the Trust Board with a simple but comprehensive method for the effective and focused management of principal risks to the achievement of its strategic objectives. The Trust Board defines the principal risks within the BAF and ensures that each is assigned to a Lead Director, as well as to a lead Executive Board for scrutiny, and to a lead Committee of the Board for regular review and assurance.

The principal risk descriptions include, in italics, the key *threats* likely to increase the risk and which may influence the achievement of the Trust’s strategic objectives.

The focus within the BAF is on the effectiveness of the primary controls, which we are relying on, whose impact could have a direct bearing on the achievement of the Trust’s strategic objectives, should the controls be ineffective.

The BAF is linked to performance metrics with detective risk indicators as a further source of evidence to inform the regular review and re-assessment. The assurance sections focus on where internal and external scrutiny of the operation of primary controls takes place, along with a summary of what the evidence received tells us in relation to the effectiveness of the controls which are being relied on.

Through scrutiny of principal risks at the relevant Executive Board meetings attention should be taken to recognise gaps in the primary controls (i.e. what should be in place to manage the risk but is not) and/or assurances (i.e. what evidence should be in place to tell us in relation to the effectiveness of the controls / systems which are being relied on but is not), to endorse risk ratings, and to agree and monitor appropriate actions to treat the gaps through to progression.

The principal risk rating is based on evidence in relation to the effectiveness of the primary controls which are being relied on and will be reviewed at the relevant Executive Boards, as part of a robust governance process to scrutinise the principal risk, in order to endorse a final position for reporting to the Trust Board.

BAF Rating System: rating on the effectiveness of controls / systems which we are relying on (I x L):

	Impact UHL Reputation (if the risk was to materialise)				
	Very Low	Minor	Moderate	Major	Extreme
Very good controls	1	2	3	4	5
Good controls	2	4	6	8	10
Limited effective controls	3	6	9	12	15
Weak controls	4	8	12	16	20
Ineffective controls	5	10	15	20	25

PR Score	PR Rating
1-6	Low
8-12	Moderate
15-20	High
25	Extreme

2018/19 BAF Dashboard

Principal Risk Description	Strategic Objective	Exec Direc	Exec Team	Trust Board Cmttee	Current Rating I x L
1) A) If the Trust is unable to achieve and maintain the required quality and clinical effectiveness standards, caused by inadequate clinical practice and/or ineffective clinical governance , then it may result in widespread instances of avoidable harm to a large number of patients, affecting reputation (breach in regulatory duty / adverse publicity).	Quality Commitment: to deliver safe, high quality, patient centred, healthcare	MD / CN	EQB	AC / QOC	4 x 3 = 12
B) If the Trust is unable to achieve and maintain the required quality and patient safety standards, caused by inadequate clinical practice and/or ineffective clinical governance , then it may result in widespread instances of avoidable harm to a large number of patients, affecting reputation (breach in regulatory duty / adverse publicity).	Quality Commitment: to deliver safe, high quality, patient centred, healthcare	MD / CN	EQB	AC / QOC	4 x 4 = 16
C) If the Trust is unable to achieve and maintain the required quality and patient experience standards, caused by inadequate clinical practice and/or ineffective clinical governance , then it may result in widespread instances of avoidable harm to a large number of patients, affecting reputation (breach in regulatory duty / adverse publicity).	Quality Commitment: to deliver safe, high quality, patient centred, healthcare	MD / CN	EQB	AC / QOC	4 x 3 = 12
2) If the Trust is unable to achieve and maintain the required workforce capacity and capability standards, caused by employment market factors (such as availability and competition to recruit, retain and utilise a workforce with the necessary skills and experience), lack of extensive education, training and leadership, and demographic changes , then it may result in widespread instances of poor clinical outcomes for patients and increased staff workloads, affecting business (finance) and reputation (breach in regulatory duty / adverse publicity).	We will have the right people with the right skills in the right numbers in order to deliver the most effective care	DPOD	EWB / EPB	AC / PPPC	5 x 4 = 20
3) If the Trust is unable to achieve and maintain financial sustainability, caused through delivery of income, the control of costs or the delivery of cost improvement plans , then it will result in a failure to deliver the financial plan, affecting business (finance) and reputation (breach in regulatory duty / adverse publicity).	We will continue on our journey towards financial stability - deliver target 18/19	CFO	EPB	AC / FIC	5 x 4 = 20
4) If the Trust is unable to effectively manage the emergency care pathway, caused by persistent unprecedented level of demand for services, primary care unable to provide the service required, ineffective resources to address patient flow, and fundamental process issues , then it may result in widespread instances of poor clinical outcomes for patients and sustained failure to achieve constitutional standards, affecting business (finance) and reputation (breach in regulatory duty / adverse publicity).	We will improve our Emergency Care Performance	COO	EPB	AC / PPPC	5 x 4 = 20
5) If the Trust is unable to deliver a fit for the future IM&T service, caused by inability to secure appropriate resources (including external capital and workforce), a critical infrastructure failure, ineffective system resilience and preparedness of an external IT supplier or an external shut-down attack , then it may result in a significant disruption to the continuity of core critical services, affecting reputation (breach in regulatory duty / adverse publicity).	To progress our strategic enabler – IM&T	CIO	EIMT / EPB	AC / PPPC	4 x 3 = 12
6) If the Trust does not adequately develop and maintain its estate to meet statutory compliance obligations and minimise the potential for critical infrastructure failure, caused by a lack of resources to address the backlog maintenance programme, insufficient clinical decant capacity and the sheer volume of technical work to address ageing buildings , then it may result in an increased risk of failure of critical plant, equipment and core critical services leading to compliance issues, risk of regulatory intervention, impact upon business and patient critical infrastructure and adverse publicity.	To progress our strategic enabler - Estates	DEF	ESB	AC / QOC	5 x 4 = 20 (↑)
7) If the Trust is unable to work collaboratively with partners to secure the support of community and STP stakeholders, caused by breakdown of relationships amongst partners and ineffective clinical service strategies of the local population , then it may result in disruption to transforming sustainable clinical services, affecting business (finance) and reputation (breach in regulatory duty / adverse publicity).	To develop more integrated care in partnership with others	DSC	ESB	AC / PPPC	4 x 4 = 16

Quality and Clinical Effectiveness Reporting

- 2018/19 UHL Quality Commitment measured through PIDs reported to EQB in relation to:
 - Improve patient outcomes by greater use of key clinical systems and care pathways.
- Quality Framework (Strategy) outlining how quality is managed within the Trust reported in AOP.
- Schedule of external visits maintained and reviewed at CMG service and Exec Team levels
- Deteriorating Adult Patient Board monitors outcomes related to ICU, sepsis, EWS, AKI and diabetes.
- Clinical service structures, resources and governance arrangements in place at Trust Exec and CMG / Specialty levels ensuring appropriate escalation of quality matters.
- Monthly reporting of Mortality Rates and Learning from Deaths (LFD) to the UHL MRC.
- CMG monthly Performance Review Meetings chaired by CN, MD, COO, CFO and DPOD.
- Reporting to Commissioner led Clinical Quality Review Group (CQRG) on compliance with quality schedule and CQUINS – including Commissioner Quality visits schedule for 2018/19.
- CQC improvement plan monitored at CMG Boards, Exec Team and Trust Board.
- NHSI Board to Board performance review meetings.

Quality and Clinical Effectiveness Work Programmes

- Clinical Policies, guidelines, SOPs including NatSSIPs/ LocSSIPs on INsite.
- Trust wide risk management and governance structure in place including: risk register, CAS, incident reporting, Complaints, Claims & Inquest management. Datix risk management software.
- Clinical audit programme, including participation in national audits.
- Consultant outcomes, participation in national clinical registries
- GIRFT and External Peer Reviews.
- Management and assessment against NICE guidance.
- Professional standards and Code of Practice / Clinical supervision.
- Appraisal and Revalidation process.
- Learning from Deaths work stream to include Medical Examiner and Specialty M&M Processes and the Bereavement Support Service.
- Clinical Harm review process - Case note reviews, morbidity reviews and thematic findings.
- Analysis and benchmarking of UHL’s mortality rates using Dr Foster’s Intelligence and HED data.
- Stroke and Fractured Neck of Femur improvement programmes.
- Quality Commitment ‘Improving patient outcomes’ work programmes to include: Implementing the Clinical Frailty Score; Embedding use of Nerve Centre for all medical handover board rounds and escalation of care; Fully implement plans to standardise Red2Green.

	Ref	Indicators	18/19 Target	Jan - 19	18/19 YTD
EFFECTIVE	E1	Readmissions <30 days – Discharge work stream – one month in arrears	Red >8.6%		9.0%
	E2	Mortality (SHMI) – JJ	<=99	Jul 17 to June 18 = 96	96
	E5	Crude Mortality Emergency Spells – JJ	<=2.4%	1.3%	2%
	E6	#NOF <36 hours – CMG / Max Chauhan	Red <72%	87.3%	74.2%
	E7	Stroke – 90% stay on stroke unit – one month in arrears – CMGs/ S SNAP – RACHEL MARSH	Red <80%		83.9%
	E8	Stroke – TIA – RACHEL MARSH	Red <60%	83.5%	58.8%

Internal Assurances	External Assurances	Gaps Identified & Pending Actions
<ul style="list-style-type: none"> • UHL Quality Commitment components monitored at Exec Team and QOC, quarterly. • Both Operational management and Executive/Board reporting is in place for Clinical effectiveness. Reports provide assurance and highlight threats to delivery of the programme along with any mitigating actions. Latest reports received include: <ul style="list-style-type: none"> ➢ NEWS2 NPSA alert (NHS/PSA/RE/2018/003) compliance monitored via ADPB and confirmed to EQB. ➢ Stroke - Actions currently taken have meant the TIA clinic has met the target for high risk referrals of 60% within 24 hours for Aug & Sept. 90% stay on a Stroke Unit has been achieved for 80% of patients for the past 12 months. • Mortality report to QOC and Trust Board - Information Analyst and Bereavement Support Nurse in Post. • LLR Frailty Task Force (led by UHL) is in place with a focus on identifying and responding to the needs of frail multi morbid patients. This group is responsible for the overall embedding of the CFS in ED and the wider hospital, and responding to these patients holistically in the community to ensure better outcomes and prevent readmission into acute care. • A readmission working group has been set up within UHL to understand the data and identify a mechanism to refer these patients to STP provided community neighbourhood teams. Community partners are now involved with this group to ensure a system wide response. Readmissions CQUIN agreed, Q2 successfully delivered. Targeted specialities all involved. Readmission coordinator post - funded by city CCG to provide community follow up for patients at high risk of readmission. (PARR>40) • #NOF Task and Finish group involving senior consultants from Trauma, Anaesthetics, Orthogeriatrics, ED as well as Nursing, Theatres and Management met to discuss problems and develop a new action plan. Fractured Neck of Femur – pilot update and action plan, jointly owned by ITAPS and MSS, presented to QOC in Dec. Risk assessment undertaken and approved by CMG Board (= 16). • Stroke and TIA Clinic performance monitored by CMG. Exception report being submitted to EQB to advise on actions being taken to address the deterioration in TIA Clinic Performance. 	<ul style="list-style-type: none"> • CQC comprehensive review in 2017/18 - inspectors have rated our Trust overall as Requires Improvement; rating us Good for being effective and caring, and Requires Improvement for being safe, responsive and well-led. • CQC unannounced inspection 29.5.18 with written feedback provided. • Human Fertilisation & Embryology Authority Inspection – UHL’s IVF and ICSI success rates in line with national average. • GIRFT review of Orthopaedic Services found UHL has very low revision rates but potential area for reduction in Length of Stay. • Internal Audit Programme 2018/19: <ul style="list-style-type: none"> ➢ Learning from Deaths Programme – Audit report due Jan 2019. • Internal Audit 2016/17: <ul style="list-style-type: none"> ➢ Clinical Audit - medium risk (associated with CMG engagement). • Consultant Outcomes Programme: <ul style="list-style-type: none"> ➢ National Congenital Heart Disease Audit results published for 2014-17 in November – UHL’s survival rates for paediatric CHD are higher than predicted. 	<p>Mortality</p> <ul style="list-style-type: none"> • Information Analyst in Post. M&M Assistant appointed. Due to start end Jan 19 Review Mar 19 (DMD) <p>#NOF</p> <ul style="list-style-type: none"> • A ‘Rapid Cycle Fortnight’ from 1st to 12th October has been completed. The main intervention was to provide team and theatre access over the weekend for NOF patients. The trial identified potential benefits but not possible to draw definitive conclusions due to varying factors. • Continue collaborative working with MSS and ITAPS to achieve best outcomes. • Further improve in-reach to and collaboration with ED to reduce transfer time of patients to ward. Improve the pathway in ED. • Appointment of Associate Physician to work on ward 32 dedicated to NOF ward ensuring flow of NOF patients. • Review job plans to sustain all day seamless operating list. • Business case for dedicated radiographer/Imaging machine for NOF theatre. • Extending weekend theatre capacity. • Move to floating anaesthetic cover for 7 days per week which is going to need investment for the additional anaesthetic time required. • Commit to the concept of ‘holding’ 1 NOF ‘hot beds’ for fast tracking of admissions but bed pressures have significantly impacted on this. Review Mar 19 (MSS CMG CD) <p>Readmissions</p> <ul style="list-style-type: none"> • Although the process for reviewing patients has been agreed in principle, a formal proposal has yet to be designed and tested pre-winter 2018. This includes allowing a field on discharge letters specifying what the readmission risk for patients is and requesting the GP to refer patient for MDT review. This has been agreed by IMT and will be implemented by end of Jan. Review Jan 19 – (HoSD) • Respiratory – plans to reduce the PARR score to >30 for patient follow up – Resources to be discussed / what can be delivered safely in the community? Review Jan 19 – (HoSD) • EoL emergency readmissions increase of 16%/20%, from average baseline, noted in July and August requires further investigation. Review Jan 19 – (HoSD) <p>Frailty</p> <ul style="list-style-type: none"> • The CFS score is now routinely recorded in ED. Plan to roll out to rest of hospital in Q4. Review Feb 19 – (HoSD) <p>TIA Clinic – High Risk Patients</p> <ul style="list-style-type: none"> • Work plan in place to increase capacity for high-risk patients and discussions being held with commissioners to look at deflecting obvious non TIA referrals. Review Feb 19 – (ESM CMG CD)

Internal Assurances	External Assurances	Gaps Identified & Pending Actions
<ul style="list-style-type: none"> • Annual Governance statement providing assurance on the strength of internal control regarding risk management processes endorsed by Audit Committee (May 2018). • Patient Safety Report (Feb 2019) to EQB/QOC: Two Serious Incidents were escalated in January. There continues to be a large number of incidents reported relating to nurse staffing, inappropriate / unsafe transfers between departments and self-discharge against medical advice. Duty of Candour gaps are the least in number since monitoring commenced. There has been a pleasing increase in the rate of PPSIs reported. • Q2 Harms Review - We have seen a slight decrease in the actual number of harm incidents in Q2 2018/19 compared to Q1 but there has been a sustained increased level of moderate plus harm this year to date compared with 17/18. • Triangulation of incident and learning from death themes reviewed. • F2SU clinics and surgeries at all three sites. • Cluster of VTE harms identified in November 2018 – VTE Task Force established December 2018 to report monthly to EQB. • Throughout 2018, the Diabetes team have been auditing insulin prescribing and management every 3 months. Insulin Safety training has been delivered over the same period to doctors, nurses and pharmacists. Results of the audits demonstrate: Insulin errors in UHL have halved since Dec 2017; Improvements across the board in the prescription of insulin, the administration of insulin and in the management of insulin when patients' capillary blood sugars (CBGs) were out of range; In Dec 2018 >200 patients with diabetes were audited, 123 patients were treated with insulin. This was the first time EVER that we found no abbreviations ("u" or "iu")* in the insulin prescriptions. 	<ul style="list-style-type: none"> • CQC comprehensive review in 2017/18 - inspectors rated Trust overall as Requires Improvement; rating us Good for being effective and caring, and Requires Improvement for being safe, responsive and well-led. The Trust must embed learning from never events in order to prioritise safety and reduce risk; • The Trust did not always control infection risk well - Staff did not always adhere to trust policy in relation to cleaning of equipment, completing infection control risk assessments and hand hygiene. • CQC Warning notice issued following unannounced inspection in Nov 2017 – re the care given to diabetic patients in relation to the management of their insulin requires significant improvement. Evidence supports actions have delivered improvements. However, the CCGs visited some of the same wards during April, which the CQC had visited, and found some areas still had some improvements to make. • CQC unannounced inspection 29.5.18 with written feedback provided. • Internal Audit Programme 2018/19: <ul style="list-style-type: none"> ➢ Patient Safety Alert review – low risk, largely reassuring report (Jan 2019). • Internal Audit 2016/17: <ul style="list-style-type: none"> ➢ Risk management – medium risk (associated with CMG processes). ➢ Clinical Audit - medium risk (associated with CMG engagement). • External Audit 2016/17: <ul style="list-style-type: none"> ➢ Incident reporting and evidence of validation of grading of harm – outcome assured (safety nets in place and being monitored). • National Freedom to Speak up Guardian visit in Q3 2017 – positive verbal feedback received about systems and processes in place in UHL. • Parliamentary ombudsman enquires – only 1 partially upheld case in 17/18, reduced from 7 the previous year. • Healthwatch – independent complaints review panel – Feedback received from the Panel that met in June 2018 and actions agreed. • Human Fertilisation & Embryology Authority (HFEA) Inspection June 2018 – Two major areas of non-compliance, 1) Safety and suitability of premises (including inadequate storage facilities including for storage of liquid nitrogen dewars) and 2) Medicines management (carry over stock not recorded in the controlled drugs register and only a single patient identifier used in the controlled drugs register). • CQC (IR)MER inspection to Cath. Lab. On the 23rd November 2018. • Latest NHSI Never Events data published 30th October 2018. • Visit of Dr Aidan Fowler, National Director of Patient Safety (NHSI) on 20/12/18 provided external assurance of approach and performance around QI and Patient Safety. 	<ul style="list-style-type: none"> • Communication of key safety messages to front line staff: develop strategy to embed learning from never events in order to prioritise safety and reduce never events / patient safety culture programme to be developed / increase awareness via website and intranet broadcasting – during 2018/19 (CN / MD). • Overdue RCA actions require urgent attention from relevant CMGs (CMG CDs). Items also monitored at CMG PRMs. • Improve culture and empower staff to 'Stop the Line' in all clinical areas – QC priority 2018/19 – Stop the line audit currently in progress – results expected in Q4 2018 (AMD). • More work required to embed systems to ensure abnormal results are recognised and acted upon – QC priority 2018/19 – Reviewed at EQB quarterly (AMD). • Improve the management of diabetic patients treated with Insulin – QC priority 2018/19 – Reviewed at EQB quarterly (AMD). • Some critical nurse staffing gaps reported in CMGs and monitored via risk register and daily command and control meetings. • Action plan to address the two major non-compliances in HFEA Inspection report - Consultant Embryologist, Leicester Fertility Centre & Medical Director – progress reviewed at EQB meetings. • Non-integrated / weak IT systems remain a patient safety risk – UHL IM&T e-hospital programme established (see PR 5). • Increased ED incidents reported with concerns escalated regarding overcrowding. • Gaps relating to improvement work – to be picked up in the Quality Strategy / Quality Commitment in 19/20 (relating to safe and timely discharge and consistent processes for invasive procedures).

Internal Assurances	External Assurances	Gaps Identified & Pending Actions
<ul style="list-style-type: none"> • UHL Quality Commitment components monitored at Exec Team and QOC quarterly. • Outpatient Programme Board leading and monitoring the improvements in outpatients identified in response to patient feedback. Monthly reports shared at clinic level with CMGs. • End of Life Care and Palliative Care Committee monitors improvements to increase positive patients experience in relation to feeling involvement in care. • The Trust seeks to ensure services develop in response to patient’s feedback and therefore all “suggestions for improvement/complaints/areas that were lacking from the patients perception”, referred to as Sfi’s, are triangulated allowing overall themes at Trust and CMG level to be derived. The CMGs are then able to demonstrate their response to this feedback. • The Clinical Audit Team have streamlined this process facilitating the production of high level themes with minimum workload as it is acknowledged that understanding the themes from feedback from patients and monitoring CMG response to these themes is necessary to ensure patient led services and care. • The areas of improvement identified by patients in the triangulation of feedback are the areas of focus identified in the Trust’s Quality Commitment and overseen at PIPEEAC. • Complaints Data report (Jan 2019): Increase in performance for 10 day complaints to 100%, 25 day complaints performance has remained at 97% and 45 day complaints performance remains at 100%. ENT/Otorhinolaryngology and Neurology are the specialities with the most complaints and concerns this month. Cancellation of appointments is the top theme in complaints this month overtaking medical care for the first time in a couple of years. Increase in the number of formal complaints this month. Increase in the number of re-opened complaints this month. Not received any new PHSO cases this month. No PHSO cases were closed this month. • Independent Complaints Review Panel met in Oct and actions following this include a review of the Terms of Reference for the Independent Complaints Review Panel and the new ToR have been added to the revised Complaints Policy (approved in Oct 2018) in the appendices. 	<ul style="list-style-type: none"> • CQC comprehensive review in 2017/18 - inspectors have rated our Trust overall as Requires Improvement; rating us Good for being effective and caring, and Requires Improvement for being safe, responsive and well-led. • CQC unannounced inspection 29.5.18 with written feedback provided. • Internal Audit Programme 2018/19: <ul style="list-style-type: none"> ➢ Quality Commitment review – scheduled Q3. • Internal Audit 2016/17: <ul style="list-style-type: none"> ➢ Risk management – medium risk (associated with CMG processes). ➢ Clinical Audit - medium risk (associated with CMG engagement). 	<ul style="list-style-type: none"> • Improving experience of care for patients in the outpatient facilities. As part of the Trust’s Quality Commitment there is a Trust wide improvement plan and an Outpatient Group with representatives from all CMGs to drive this forward – QC priority 2018/19 – Reviewed at EQB quarterly. • Improving patient involvement in care in ED. This is being taken forward through the End of Life Care Hospital Improvement Programme (ELCHIP) programme and monitored via the End of Life and Palliative Care Committee – QC priority 2018/19 – Reviewed at EQB quarterly.

<ul style="list-style-type: none"> • CFO’s Financial Reports to EPB (monthly) key issues considered at the meeting for month 10 relate to delivering the revised planned deficit of £51.8m (exc PSF). The financial impact caused by the recent NHSI decision to not allow the LLP alongside a re-forecast of the year end position has been recognised within the monthly reporting. This was submitted as part of the Q2 reporting process and has been communicated to NHSI including compliance with the relevant governance processes. • The income position has over-performed and a corresponding overspend within non-pay has been seen. The pay bill (substantive) is overspent by £20.1m to plan (including £9.1m relating to A4C national pay award). Cost improvement plans show an under-performance to plan at month 10. Capital expenditure has under-spent within the year to date position and will not lead to an over spend within the programme. Cash flow and deficit funding has been received in line with the submitted plan. • FIC Summary to Trust board (Monthly). Key issues are as described above and as reported to EPB. The Committee also reviewed the additional report detailing a more granular analysis of the Trust’s cash position. • Capital Monitoring and Investment Committee (monthly). A detailed review of month 6 capital expenditure was reviewed with key variances explored in the context of the overall capital programme. • Revenue Investment Committee (monthly). The committee had a limited number of business cases for review. All actions are being progressed. • Update on the Commercial Strategy. The Trust Board, at its last thinking day, has an agreed approach to ensure successful delivery of year 2 of the commercial strategy. • Alliance Contract. This quarterly review was discussed and reviewed at an Executive Quality Board in November. 	<ul style="list-style-type: none"> • External Audit of Financial Systems 2018/19: <ul style="list-style-type: none"> ➢ Work programme for 2018/19 to be reviewed and approved at the relevant meeting of the Audit Committee. • Internal Audit 2018/19: <ul style="list-style-type: none"> ➢ Financial systems Q3 - financial systems controls work to meet the requirements of External Audit and to address specific risks identified by management. Work will include data analysis on specific areas of risk in order to identify trends/ anomalies and to direct our controls-based work. ➢ Review of cost improvement programme Q2 - has reviewed the adequacy of arrangements for delivery of the CIP and the robustness of planning for future years. • NHSI Carter Corporate Service review: - <i>Carter Target for back office cost to be no more than 6% of turnover by March 2020.</i> The Trust’s Director of Efficiency and CIP is leading this initiative, as part of the overall review of Model Hospital, and engaging across the Corporate Teams to ensure robust plans are in place to achieve the 2020 target. • Four Eyes support has been deployed within the cross cutting theatre/elective pathway work-stream and the cross cutting outpatient work-scheme. • NHSI increased scrutiny through monthly performance review meetings and specific Finance focused monthly meetings. 	<p>Gap: Effectiveness of budget management and control at CMG and Corporate directorate levels.</p> <p>Actions: 2018/19 planning requires the delivery of a deficit of £29.9m inclusive of a £51m CIP programme. Each CMG and Corporate Directorate has an allocated budget totalling £29.9m however due to the current work in progress with respect of demand and capacity modelling CMGs are yet to sign-off a fully phased month by month budgetary control position in line with the accountability framework. This process has concluded with MSS being finalised as part of month 5 reporting.</p> <p>Within June the Trust received a revised Control Total offer from NHSI. This revised Control Total was subject to review and subsequent approval at a special Trust Board meeting held on 18 June 2018. As a response to this challenge a Financial Recovery Board has been created and is chaired by the CEO. The financial recovery board action plan currently had an identified gap of £11m and included the risk within the Cost Improvement Programme of £3.2m when compared to the target of £51m. The Financial Recovery Board meets fortnightly with each work-stream being sponsored by an Executive Director. As part of Q2 reporting the Trust has reported a revised forecast outturn for 2018/19. This includes the impact of not progressing with the FM LLP and recognition of a further deterioration of £8.7m. A revised deficit of £51.8m was submitted with a recovery action in place to address the remaining financial challenge. This position remains for M10 reporting.</p> <p>The Trust engaged with PWC to complete a review of the financial reforecast, the robustness of the current CIP programme and highlight any potential opportunities that may present themselves within 2018/19 to improve the current financial reforecast position. This report has been finalised, presented to the Trust Board and shared with NHSI. The report concludes that the re-forecast deficit of £51.8m is not risk-free and the scope to improve upon this position is limited.</p> <p>Star chamber process (led by CEO) reviewing the new investment requirements. There is a significant shortfall in available funding compared to the complete list of investment requirements with the Star Chamber prioritising and approving spend. The allocation of funds to investment requirements has been agreed but further scrutiny is required and forms part of the Financial Recovery Board.</p> <p>The capital programme has been approved by CMIC and then further ratification by the Star Chamber. The relevant scheme holders are providing further analysis on a risk based assessment detailing the potential risks due to the limited availability of capital funds.</p> <p>Cash flow and enhanced cash reporting continues to be reviewed and discussed at FIC. Cash for deficit funding has been received in line with planned levels. This planned level of cash excludes any additional working capital requirements that will be required as a result of the revised deficit position. An application for this additional cash has been made in October with cash received in November and planned for the remaining months of the year.</p>

<ul style="list-style-type: none"> IM&T eHospital (previously known as Paperless hospital 2020) strategy including Board structure and clinical leads in place. Overarching 18/19 IM&T strategic plan. Cyber security measures in place including regular assessments and close working relationship with managed business partner. Information Governance arrangements including IG toolkit, IG Steering Group and GDPR plan. Working arrangements aligned with clinical strategies through clinical and medical workforce information officers. Disaster Recover plans in place for IM&T systems. IM&T governance and performance monitoring through IM&T Service Board reporting to Trust Board (via FIC/PPPC), Audit Committee and Executive (EMI&T). IT Network providers early warning notifications monitored. Resources against service demand – IM&T prioritise CMGs work requests/demands against their service constraints through the IT request form and prioritisation matrix. Organisational change capacity – CMGs liaise with IM&T to agree IM&T support required to implement new IT programmes / systems for each (sub) project. Process defined in the PID and LORA (local organisational readiness assessment). CMGs Business Continuity Plans (following BIAs) included in the EPRR work plan and progress monitored through UHL EPRR Board. 						<div style="text-align: center;"> <h3>eHospital - Roadmap 18/19</h3> </div>						
						<p><i>Expected outcome for Q4 - 31st Dec 2018</i></p>						

Internal Assurances	External Assurances	Gaps Identified & Pending Actions
<ul style="list-style-type: none"> • Information Governance IG Toolkit reported to AC – All components of the IGT in relation to data quality were self-assessed as the highest level 3 for 2017-18 – UHL is a trusted organisation as defined in the IG Toolkit. With the move from IGT to the Data Security and Protection Toolkit from April 2018, specific requirements for management of Data Quality are still being finalised. We have contacts with NHS Digital as well as good connections across a network of peer Data Quality leads at other regional Trusts. • GDPR progress reported to Exec Team (EIM&T) and AC – GDPR Project Lead appointed in July 2018. • Paperless hospital 2020 strategy reported to Exec Team and to Trust Board sub-committees on a regular basis - The pace of achievement of the Paperless Hospital 2020 is dependent on available resources to effect the changes and prioritisation of other demands on IT services. • The Trust's avoidance of any significant impact from the WannaCry ransomware has highlighted the good standard of our processes related to cyber security, although with no room for complacency given the speed with which this threat evolves. • IM&T Capital Plan Briefing to PPPC. 	<ul style="list-style-type: none"> • Internal Audit 2018/19: <ul style="list-style-type: none"> ➤ Information Governance – to perform validation work on the Information governance toolkit in line with the annual audit requirement – Audit review completed March 2018 – Medium Risk. ➤ IG / GDPR follow-up - to review the adequacy of the Trust's information governance processes through 1) validation work on the new Data Security and Protection (DSP) Toolkit, which replaces the Information Governance toolkit from April 2018 and 2) Specific follow up work on the actions raised in the 2017/18 GDPR review – Audit commenced in Feb 19 main issues are training (only 65% complete vs target 95% end Mar19) and contracts. ➤ Paperless 2020 programme review - following an initial review of EPR 'Plan B' a follow up to assess how the programme is progressing using a diagnostic 'Twelve elements of programme management excellence' – Audit review completed May 2018 – High risk - progress with actions tracked via the e-Hospital Board, delays against plan but expected to complete by Mar 19. Actions completed except infrastructure which is due to complete Mar 19. New audit by PWC in progress, draft report received Jan 19 – Medium risk on resources for change management and programme dependencies. ➤ Emergency Preparedness, Resilience and Response (EPRR) – to review a selection of the IM&T Disaster Recovery plans – Audit Scheduled for 21 Feb 19. • ISO 27001:2013 – The MBP maintains an accreditation (in 2018) – due for review in March 19 for 2019. • NHS digital Health Check – cyber security audit – Jan 2018 – remediation plan agreed. Cyber essentials plus audit planned for 12th Mar 19 • NHS IT Maturity Index – Completed Q1 2018/19 - scores for UHL higher on all domains than national average. 	<ul style="list-style-type: none"> • Project resource to finance the acceleration of the Trust's IT service including desktop replacement project – <i>Secure adequate resources to fund 18/19 IT strategy</i> – Financial plan confirmed by CIO July 18 for eMeds. Project priorities resource plan to the end of Mar19. Additional funding is due to be received from NHS Digital (HSLI) to fund the eHospital schemes relating to shared health records for the next 3 years. This will support the resource issues as well as development of solutions. • eHospital engagement - <i>Deliver support to the quality commitment by identifying priority work that can be undertaken on existing systems, i.e. nervecentre or ICE as per the agreed UHL annual priorities. For 2018/19 will involve the following 5 areas (Responsible Officers MD & CIO):</i> <ul style="list-style-type: none"> ➤ <i>Replacing old computing/mobile hardware- roll-out started Aug 18 on plan to deliver in 12 months replacing all XP machines</i> ➤ <i>Nervecentre- in progress, assessment forms deployed Q3. Continuation of other nursing forms to Q4.</i> ➤ <i>PACS – completed</i> ➤ <i>ICE– in progress- Implement in Cardiology and ENT - delayed</i> ➤ <i>E-Prescribing – in progress roll-out to start LRI liveNov18, GH commenced Q4, LGH – on plan.</i> • Information Governance plan for implementation of GDPR – gap analysis by Internal Auditors identified there are a number of gaps with regard to the new regulation commenced in May 2018. Mitigating actions include undertaking a Corporate Records Audit by Mar 2019 (CIO). Review commenced Dec 18 for 12 month period. Approach set up and records being added to UHL info Asset Register (IAR) • Cyber security – raising awareness to reduce risk of human factors and on-going medical equipment challenges – IM&T awareness campaigns including IM&T newsletter and new GDPR training - Commenced Oct 18 (CIO). • Cyber security - Reducing risks are dependent on the roll-out of the eEquip hardware refresh programme and in particular replacement of PCs running old operating systems – 12 month project commenced July 2018 and due July 2019. Additional 3 month resources purchased to accelerate the roll-out for eMeds from Nov 18 • CMGs Business Continuity Plans have been identified as a gap in control following the IM&T power failure downtime in Oct 18. Developing effective plans is included as part of the EPRR work programme in 2019/20 and actions assigned to CMGs to develop their plans for all IT systems. • External IT supplier preparedness - UHL to seek assurance from external providers about their system resilience arrangements. CIO linking with CMGs HoOs to request they liaise with their external providers (requested 06/08/18) – Q2 2018/19 (CIO).

Internal Assurances	External Assurances	Gaps Identified & Pending Actions
<ul style="list-style-type: none"> • Internal self-assessment reviews about the efficacy of the controls for this risk have been reported to ESB; Stakeholder meetings; Trust Board sub-committees and have identified gaps in active participation in several related STP work streams – this has been rectified from June 2018, with operations and strategy attendance at key STP meetings. • Multiple CMGs and services now involved in improving this system of care for frail and multi-morbid patients internally and with external partners. Positive engagement noted to date. • Community services redesign model presented to UHL team in December – full response with UHL concerns sent back to Commissioners. New CSR Implementation Group established with UHL representation secured. • The system has responded appropriately to the actions detailed in the Frailty action plan; however internal actions are not progressing at the pace required to enable quality or financial improvement in the acute or planned pathways our own trust, hence maintaining the increased score for Feb 2019. 	<ul style="list-style-type: none"> • Review of the LLR STP has shown that this risk is not fully mitigated as assurance of efficacy of the partnership working is limited at this point. This tells us that the current governance processes are not yet fit for purpose and will not fully mitigate the risk as presented. • The work will be referenced in LLR escalation meetings with NHS England and NHS Improvement, with the LLR frailty programme held up as an exemplar across the regional system. <p>New Integrated Community Services Board formed, covering the duplicative work of the Integrated Locality Teams and the Home First STP work streams. UHL fully engaged at strategic and operational level. Outcomes being aligned to those of the Frailty programme. However, the work plan for the ICB has been under review since December with little progress. This is being worked through but the concern has been escalated via Execs.</p>	<ul style="list-style-type: none"> • First new Integrated Community Services Board met in October 2018 but with limited progress made on action plan. UHL COO escalated that the work programme for the Board was not specific nor tailored enough in November 2018. As an action, HoSD engaged to rewrite action plan with system colleagues, bringing together the requirements needed from community partners using population health methodology. This was presented to the Board in December 2018 with further iterations to be presented in January with the requirements of the NHS 10 year plan to be included. As at Feb 7th, a work programme is still not fully agreed across the system.

Integrated risk paper - Appendix 2 - UHL organisational risk register dashboard (15+) as at end of Jan 2019

Risk ID	CMG	Risk Description	Impact	Likelihood	Current Score	Target Score	Elapsed Date?
2333	ITAPS	If we do not recruit into the Paediatric Cardiac Anaesthetic vacancies to maintain a WTD compliant rota, then it may result in suboptimal patient treatment leading to potential for patient harm.	Extreme	Almost certain	25	8	
1149	CHUGGS	If demand for cancer patients' service exceeds capacity, then it may result in widespread delays with patient diagnosis or treatment, leading to potential for patient harm and waiting time target breach	Major	Almost certain	20	9	
2264	CHUGGS	If an effective solution for the nurse staffing shortages in CHUGGS at LGH and LRI is not found, then it may result in detrimental impact on safety & effectiveness of patient care delivered, leading to potential for patient harm.	Major	Almost certain	20	6	
2565	CHUGGS	If capacity is not increased to meet demand in General Surgery, Gastro and Urology, then it may result in widespread delays with patient diagnosis or treatment leading to potential for patient harm and breach against delivery of national targets	Major	Almost certain	20	9	
3183	RRCV	If Cardiac Surgery is unable to operate on elective patients due to winter pressures and/or availability of ward and ITU beds, then it may result in widespread delays with patients treatment and patients' conditions could deteriorate leading to a need for urgent admission or more complex surgery with potential of complications and harm.	Extreme	Likely	20	15	
3186	RRCV	If RRCV CMG fails to achieve the allocated financial control total then this could result in a deterioration in the Trust overall financial deficit.	Major	Almost certain	20	9	
3354	RRCV	If medical staffing gaps in Allergy Service are not addressed, then it may result in waiting list increases and widespread delays with patient diagnosis or treatment leading to potential for harm and non-compliance of RTT national targets	Major	Almost certain	20	8	
2354	RRCV	If the capacity of the Clinical Decisions Unit is not expanded to meet the increase in demand and reduce overcrowding, then it may result in detrimental impact on safety & effectiveness of patient care delivered leading to potential harm to patients.	Major	Almost certain	20	9	
3359	ESM	If ESM CMG do not recruit and retain into the current nursing vacancies within Specialist Medicine, including the extra capacity wards opened, then it may result in widespread delays with patient diagnosis or treatment, leading to potential harm.	Extreme	Likely	20	6	
3222	ESM	If a member of the public is violent or aggressive outside or inside ED receptions/waiting rooms, then it may result in a detrimental impact on health, safety & security of staff, patients and visitors leading to harm	Extreme	Likely	20	10	
3077	ESM	If there are delays in the availability of in-patient beds leading to overcrowding in the Emergency Department and an inability to accept new patients from ambulances, then it may result in detrimental impact on quality of delivered care and patient safety within the ED leading to potential harm.	Extreme	Likely	20	15	
3114	ITAPS	If we are unsuccessful in recruiting ITU medical and nursing staff to agreed establishment, then it may result in widespread delays with patient diagnosis or treatment leading to potential for patient harm.	Major	Almost certain	20	6	
3115	ITAPS	If there is an IT infrastructure failure or delay in accessing systems due to out of date and obsolete hardware and software in theatres and other clinical areas, then it may result in a detrimental impact on safety & effectiveness of patient care delivered (with delays to access essential patient information or imaging in a timely manner) leading to potential for patient harm.	Major	Almost certain	20	8	
3120	ITAPS	If there is a continued mismatch between capacity and demand for access to emergency theatre, then it may result in cat 2 and 3 patients not receiving surgery within the NCEPOD timeframes, leading to potential for patient harm	Extreme	Likely	20	12	
3113	ITAPS	If the infrastructure in our ITU's is not updated and expanded to meet current standards and demand for all patients requiring level 2 or 3 care, then it may result in detrimental impact on safety & effectiveness of patient care delivered benchmarked against other centres (ICNARC), leading to potential for patient harm.	Major	Almost certain	20	8	
3200	ITAPS	If the practices, workforce, estate and facilities in LRI ITU are not compliant to current standards and expectations, then it may result in a detrimental impact on safety & effectiveness of patient care delivered by clinical teams to all patients requiring level 2/3 care, leading to potential harm	Extreme	Likely	20	10	
3119	ITAPS	If there is a deterioration in our theatre staff vacancies and we are unsuccessful in recruiting ODP's to agreed establishment, then it may result in widespread delays with patient treatment leading to potential for patient harm and service disruption	Major	Almost certain	20	12	
2777	Comms	If the Charity fundraising campaign do not reach target charitable income, then it may result in significant reduction in planned income, leading to financial impact	Major	Almost certain	20	8	
3226	Finance	If we overspend on non-pay, then it may result in us exceeding our annual budget plan, leading to financial and reputational impact	Extreme	Likely	20	10	
3054	Human Resources	If the Trust's Statutory and Mandatory Training data can no longer be verified on the new Learning Management System, HELM, then it may result in non-compliance with training standards, leading to potential harm to patients, reputation impact, increased financial impact and non-compliance with agreed targets.	Extreme	Likely	20	3	
3148	Corporate Nursing	If the Trust does not recruit the appropriate nursing staff with the right skills in the right numbers, then it may result in detrimental impact on safety & effectiveness of patient care delivered leading to potential harm and poor patient experience	Major	Almost certain	20	12	
2404	Corporate Nursing	If the processes for identifying patients with a centrally placed vascular access (CVAD) device within the trust are not robust, then it may result widespread delays with patient diagnosis or treatment leading to potential harm and increased morbidity and mortality.	Major	Almost certain	20	16	
3298	Corporate Nursing	If there are ward and bay closures during the outbreak of Carbapenem-resistant Organisms (CRO), then it may result in widespread delays with patient transfer of care/ flow for emergency admissions leading to potential harm, adverse reputation and service delivery impact.	Extreme	Likely	20	5	
3260	CHUGGS	If medical patients are routinely outlied into the Surgical Assessment Unit at LRI along with surgical admissions and triage, then it may result in widespread delays with surgical patients not being seen in a timely manner therefore not getting pain relief or appropriate treatment in the right place, leading to potential for patient harm and impact on surgical flow.	Major	Likely	16	6	
3300	CHUGGS	If staffing levels in the Haemophilia Centre are below establishment, then it may result in widespread delays with patient diagnosis (breaching the 17 week wait for new appointments) or treatment or patients with life-long bleeding disorders, leading to potential for patient harm	Major	Likely	16	12	
3352	CHUGGS	If staffing levels in Haematology service are below establishment then it then it may result in widespread delays for patients requiring operations who have bleeding or thrombotic problems leading to patient harm.	Major	Likely	16	12	

Risk ID	CMG	Risk Description	Impact	Likelihood	Current Score	Target Score	Elapsed Date?
3355	RRCV	If staffing levels are below establishment (for nursing, technician and admin) within the Home oxygen service, then it may result in patient delays leading to potential harm, reduced quality of life for patients, increased costs of oxygen provision and potential for withdrawal of CCG funding.	Major	Likely	16	8	
3181	RRCV	If the e-obs system settings are not adjustable for Cardio-Respiratory patients to meet the requirements in the Prescribing Administration and Monitoring of Oxygen in Adults Policy, then it may result in detrimental impact on safety & effectiveness of care delivered leading to potential for patient harm.	Major	Likely	16	6	
3109	RRCV	If additional capacity, resource and support are not provided for the Respiratory Consultant Pharmacist, then it may result in widespread delays with patient diagnosis or treatment, leading to potential for patient harm and service disruption	Major	Likely	16	8	
3040	RRCV	If there are insufficient medical trainees in Cardiology, then it may result in widespread delays with patient diagnosis or treatment leading to potential for patient harm and service disruption	Major	Likely	16	9	
3297	RRCV	If cardiac surgery admin staffing levels are below establishment, then it may result in delays with diagnosis or treatment leading to potential harm to patients, service disruption, adverse reputation and financial loss.	Major	Likely	16	9	
2820	RRCV	If a timely VTE risk assessments are not undertaken on admission to CDU, then it may result in detrimental impact on safety & effectiveness of patient care delivered, leading to potential harm and breach of NICE CCG92 guidelines.	Major	Likely	16	3	
3210	RRCV	If staffing levels in the Transplant Laboratory were below establishment and the Quality Management System was not appropriately maintained, then it may result in a prolonged disruption to the continuity of the service, leading to service disruption	Major	Likely	16	4	
3233	RRCV	If VSU diagnostic ultrasound images and reports are not made available on the UHL PACS & CRIS systems, then it may result in widespread delays with patient diagnosis or treatment due to the difficulties associated with not being able to access the relevant patient VSU diagnostic ultrasound images and reports, leading to harm.	Major	Likely	16	4	
3198	ESM	If there is a failure to administer insulin safely and monitor blood glucose levels accurately, in accordance with any prescriber's instructions and at suitable times, then it may result in detrimental impact on safety & effectiveness of patient care delivered, leading to potential harm with patients not having their diabetes appropriately monitored/managed	Major	Likely	16	4	
3203	ESM	If staffing levels in Dermatology are not adequately resourced, then it may result in widespread delays with patient diagnosis or timely care and treatment leading to potential harm and threat of not meeting RTT and skin cancer targets.	Major	Likely	16	4	X
2388	ESM	If Mental Health patients are waiting in the ED & EDU for prolonged periods of time, for further specialist MH assessment and admission to MH beds, then it may result in detrimental impact on safety & effectiveness of patient care delivered leading to potential harm.	Major	Likely	16	6	
3025	ESM	If staffing levels are below establishment and issues with nursing skill mix across Emergency Medicine, then it may result in widespread delays in assessment and in initial treatment/care leading to potential harm.	Major	Likely	16	4	
3121	ITAPS	If operating theatres' ventilation systems fail due to lack of maintenance, then it may result in widespread delays with patient treatment and pressure on other theatres to meet demand, leading to patient harm and cancellations	Major	Likely	16	9	
3341	MSK & SS	If there is a lack of theatre time and lack of acknowledgement of urgency for getting NoF patients operated on, then it may result in widespread delays with patient treatment, leading to harm (mortality and morbidity) with patient outcome compromised the longer they await theatre.	Major	Likely	16	8	
3321	MSK & SS	If MSS CMG has unplanned expenditure, then it may result in non-delivery of its allocated financial control total, leading to financial impact	Major	Likely	16	4	
2989	MSK & SS	If Trauma and Orthopaedics nurse staffing levels are below establishment, then it may result in a detrimental impact on safety & effectiveness of patient care delivered leading to potential harm	Major	Likely	16	4	
3320	CSI	If CSI CMG is unsuccessful in controlling expenditure, finding additional efficiency savings over and above the Trust set target and maximising income, then it may result in non-delivery of its allocated financial control total, leading to unmet financial performance targets, financial escalation, increased pressure on resource allocation, and adverse implications on service delivery through constrained future funding.	Major	Likely	16	4	
3129	CSI	If a 100% traceability (end fate) of blood components is not determined, then it may result in widespread delays with providing blood and blood components for patient treatment, leading to potential patient harm, and breach of legal requirements (BSQR 2005 requirement of 100% traceability will not be met).	Major	Likely	16	4	
3205	CSI	If the breast screening round length is not reduced, then it may result in widespread delays with patients three yearly breast screening appointments, leading to patient harm (impacting early cancer diagnosis), and breach of PHE performance indicators.	Major	Likely	16	8	X
3206	CSI	If staff are not appropriately trained on the usage of POC medical device equipment, then it may result in detrimental impact on safety & effectiveness of patient care delivered with inaccurate diagnostic test results, leading to potential harm to the patient.	Major	Likely	16	6	
3286	CSI	If Consultant Immunologist staffing levels are below establishment, then it may result in widespread delays with acute leukaemia patient's diagnosis or treatment, leading to potential for patient harm and failure in meeting key performance indicators for urgent blood cancer diagnostic testing	Major	Likely	16	6	
3329	CSI	If Pharmacy Technician and Pharmacist staffing levels are below establishment, then it may result in prolonged disruption to the continuity of core services across the Trust leading to service disruption	Major	Likely	16	8	
3335	CSI	If Pharmaceutical products stored in Windsor Pharmacy are contaminated due to the current pest control issues, then it may result in widespread delays with patient treatment due to unavailability of pharmaceutical products, leading to potential for patient harm; or contaminated product may be supplied to patients	Major	Likely	16	4	
3008	W&C	If the paediatric retrieval and repatriation teams are delayed mobilising to critically ill children due to inadequately commissioned & funded provision of a dedicated ambulance service, then it may result in significant delay in reaching the patient and treatment from the specialist team commencing, leading to potential harm, failure to meet NHS England standards, and inability to free-up PICU capacity.	Major	Likely	16	5	
2153	W&C	If the high number of vacancies of qualified nurses working in the Children's Hospital is below establishment, then it may result in widespread delays with patient diagnosis or treatment leading to potential harm.	Major	Likely	16	8	
3201	Comms	If the Mac desktop computers fail/break down or the shared server fails, then it may result in a prolonged disruption to the continuity of photography and/or graphics services across the Trust leading to service disruption.	Major	Likely	16	2	

Risk ID	CMG	Risk Description	Impact	Likelihood	Current Score	Target Score	Elapsed Date?
2237	Corporate Medical	If a standardised process for requesting and reporting inpatient and outpatient diagnostic tests is not implemented, then it may result in widespread delays with patient diagnosis and treatment leading to potential harm	Major	Likely	16	8	
3140	Estates & Facilities	If sufficient 'downtime' for Planned Preventative Maintenance and corrective maintenance is not scheduled into the theatre annual programmes to maintain specialist ventilation systems, then it may result in detrimental impact on safety & effectiveness of patient care delivered leading to potential harm from microbiological contamination in the theatre environment.	Major	Likely	16	8	
3141	Estates & Facilities	If the integrity of fire compartmentation is compromised, then it may result in a detrimental impact on the health and safety of staff, patients and visitors due to fire and/or smoke spread through the building limiting the ability to utilise horizontal and/or vertical evacuation methods leading to potential life safety concerns and loss of areas / beds / services.	Major	Likely	16	8	
3143	Estates & Facilities	If sufficient capital funding is not committed to reduce backlog maintenance across the estate and infrastructure, then it may result in a prolonged disturbance to the continuity of core services across the Trust leading to potential service disruption and patient harm	Major	Likely	16	6	
3144	Estates & Facilities	If Estates & Facilities are unable to recruit and retain staff, or fund posts to deliver services to meet the Trust's expectations, then it may result in a prolonged disturbance to the continuity of core services across the Trust leading to potential service disruption, patient harm, failure to achieve required standards	Major	Likely	16	12	
3145	Estates & Facilities	If there is not a significant investment to upgrade electrical infrastructure across the UHL, then it may result in prolonged disturbance to the continuity of core services across the Trust leading to potential service disruption and patient harm	Major	Likely	16	6	
3138	Estates & Facilities	If there are insufficient management controls in place to meet Regulation 4 of the Control of Asbestos Regulations (CAR), then it may result in failure to achieve compliance with regulations & standards leading to potential reputational impact, enforcement action by the HSE, and significant financial penalties.	Major	Likely	16	4	
3137	Estates & Facilities	If calls made to the Switchboard via '2222' are not recorded, then it may result in a detrimental impact on health, safety & security of staff, patients and visitors as there is limited evidence of vital/critical information passed verbally between caller and call handler for reported situations leading to potential for harm and reputational impact	Major	Likely	16	4	
3180	IM&T	If fragility in the underlying UHL IM&T infrastructure is not addressed, then it may result in limited or no access to Trust IM&T critical systems, leading to potential service disruption and provision of patient care	Major	Likely	16	8	
3155	IM&T	If the PABX system fails, then it may result in limited or no access to Trust telephony system for a range of numbers, leading to potential service disruption and provision of patient care	Major	Likely	16	8	
2621	CHUGGS	If staffing levels on Ward 22 at LRI are below establishment, then it may result in detrimental impact on safety & effectiveness of patient care delivered, leading to potential for patient harm	Moderate	Almost certain	15	6	
3312	RRCV	If recurrent funding is not provided to retain the 2 nursing posts (B6 and B3) for the LTBI programme services, then it may result in a prolonged disruption to the continuity of services across the Trust, leading to service disruption.	Moderate	Almost certain	15	1	
3211	RRCV	If additional appropriately trained sedationists are not provided in Angiocatheter suite, then it may result in detrimental impact on safety & effectiveness of patient care delivered with patients undergoing cardiology procedures receiving an inadequate level of monitoring during conscious sedation, leading to potential harm.	Extreme	Possible	15	8	X
3047	RRCV	If the service provisions for vascular access at GH are not adequately resourced to meet demands, then it may result in patients experiencing significant delays for a PICC, leading to potential harm.	Moderate	Almost certain	15	6	X
2804	ESM	If the ongoing pressures in medical admissions continue and Specialist Medicine CMG bed base is insufficient with the need to outlie into other specialty/ CMG beds, then it may result in detrimental impact on quality of delivered care and patient safety leading to potential for patient harm	Moderate	Almost certain	15	12	
2837	ESM	If migration to an automated results monitoring system is not introduced in the Neurology department, then it may result in delays with treatment for follow-up patients with multiple sclerosis, leading to potential harm.	Extreme	Possible	15	2	X
3317	CSI	If breast care services staffing levels are below establishment, then it may result in widespread delays with patient diagnosis or treatment, leading to potential for patient harm and failure to consistently deliver the 2WW demand targets	Moderate	Almost certain	15	9	X
2615	CSI	If a critical infrastructure failure was to occur in containment level 3 laboratory facility in Clinical Microbiology, then it may result in a prolonged disruption to the continuity of core services across the Trust, leading to service disruption	Extreme	Possible	15	2	
2973	CSI	If the service delivery model for Adult Gastroenterology Medicine patients is not appropriately resourced, then it may result in detrimental impact on safety & effectiveness of patient care delivered by nutrition and dietetic service, leading to potential harm to patients.	Moderate	Almost certain	15	6	
3288	CSI	If no additional storage space can be identified in UHL pharmacy to stock essential filtration fluids, then it may result in delayed treatment or diagnosis to patients that clinically require Continuous Renal Replacement Therapy, leading to potential for suboptimal therapy, significant irreversible harm and increased LOS to AICU patient population	Extreme	Possible	15	5	
3257	CSI	If Physiotherapy staffing levels are below establishment within the 4 Oncology wards at the LRI, then it may result in widespread delays with patient discharge leading to potential for patient harm	Moderate	Almost certain	15	1	
3330	CSI	If the ventilation physiotherapy department is below establishment, then it may result in detrimental impact on quality of delivered care and patient safety in the physiotherapy service leading to potential for harm	Extreme	Possible	15	6	
3331	CSI	If the cardiorespiratory physiotherapy service staffing is below funded establishment at the Glenfield Hospital then it may result in detrimental impact on quality of delivered care and patient safety leading to potential for harm	Moderate	Almost certain	15	9	
3093	W&C	If there is insufficient Midwifery establishment to achieve the recommended Midwife to Birth ratio, in view of increased clinical acuity, then it may result in patient care being delayed leading to potential harm with an increase in maternal and fetal morbidity and mortality rates	Moderate	Almost certain	15	6	
3023	W&C	If the split site Maternity configuration strategy is not enacted, then it may result in a detrimental impact on safety & effectiveness of Maternity services at the LGH site leading to potential harm	Moderate	Almost certain	15	6	

Risk ID	CMG	Risk Description	Impact	Likelihood	Current Score	Target Score	Elapsed Date?
3083	W&C	If gaps on the Junior Doctor rota in the Neonatal Units at both the LRI and LGH reach a critical level, then it may result in widespread delays with patient diagnosis or treatment, leading to potential for harm.	Moderate	Almost certain	15	3	
3332	W&C	If the paediatric asthma service remains below clinic capacity, then it may result in significant delay with reducing the waiting list and patient review or treatment leading to potential patient harm	Extreme	Possible	15	4	
2394	Comms	If there is no service agreement to support the image storage software used for Clinical Photography, then it may result in widespread delays with patient diagnosis or treatment because Clinicians would not be able to view the photographs of their patients leading to potential harm	Moderate	Almost certain	15	3	
3079	Corporate Medical	If there is insufficient capacity with the administrative support for the Learning from Deaths Framework and the Specialty M&M Structured Judgment Review process, then it may result in a delay with screening all deaths, undertaking Structured Judgment Reviews, and speaking to bereaved relatives leading to reputational impact and non-compliance with the internal QC and external NHS England and Statutory Quality Account requirements	Moderate	Almost certain	15	6	
2434	IM&T	If computers operating on Windows XP are not upgraded, then it may result in limited or no access to Trust systems in the event of a cyber attack, leading to potential service disruption and provision of patient care	Moderate	Almost certain	15	6	
1615	IM&T	If flooding occurs in our Data Centre at the LRI site, then it may result in limited or no access to Trust systems, leading to potential service disruption and provision of patient care	Extreme	Possible	15	10	
3172	IM&T	If systems and services provided by IM&T are not continuously maintained to ISO accredited standard and vulnerable to potential cyber attack, then it may result in breach of confidentiality & integrity of information leading to potential reputational impact, significant service disruption, harm to patients and financial loss	Extreme	Possible	15	15	
3289	Operations	If the Trust fails to improve its emergency preparedness, resilience and response (EPRR) arrangements, then it may result in significant disruption to delivery of its critical and essential services in a business continuity, critical or major incident leading to service disruption and potential harm.	Moderate	Almost certain	15	6
