

Quality and Performance Report

Executive Summary from Acting CEO

Purpose of report:

This paper is for:	Description	Select (X)
Decision	To formally receive a report and approve its recommendations OR a particular course of action	
Discussion	To discuss, in depth, a report noting its implications without formally approving a recommendation or action	X
Assurance	To assure the Board that systems and processes are in place, or to advise a gap along with treatment plan	X
Noting	For noting without the need for discussion	

Previous consideration:

Meeting	Date	Please clarify the purpose of the paper to that meeting using the categories above
CMG Board (specify which CMG)		
Executive Board	23/02/21	Discussion and Assurance
Trust Board Committee	25/02/21	Discussion and Assurance
Trust Board		

Context

This report provides a high level summary of the Trust’s performance against the key quality and performance metrics, together with a brief commentary where appropriate. This complements the full Quality and Performance Report and the exception reports within that which are triggered automatically when identified thresholds are met. The exception reports contain the full detail of recovery actions and trajectories where applicable. Note that the definition of “Good News” and “Performance Challenges” is for headline reporting purposes only and the full Q&P report should be consulted when determining any action required in response. The full Q&P report should also be consulted to monitor the initial impact of COVID-19 and the national restrictions on activity and social distancing.

Question

1. What is the Trust performance against the key quality and performance metrics.

Conclusion

Good News:

- **Mortality** – the latest published SHMI (period October 2019 to September 2020) is 100, and remains within the expected range.

- **CAS alerts** - compliant.
- **C DIFF** – 5 cases reported this month.
- **MRSA** – 0 cases reported.
- **90% of Stay on a Stroke Unit** – threshold achieved with 86.5% reported in January.
- **12 hour trolley wait** - 0 breaches reported.
- **Fractured neck of femurs operated 0-35hrs** – performance is above target at 73.0%.
- **VTE** – compliant at 98.6% in February.
- **Cancelled operations OTD** – 0.9% reported in February.
- **Cancer Two Week Wait** was 93.2% in January against a target of 93%.
- **Cancer Two Week Wait (Symptomatic Breast)** was 93.5% in January against a target of 93%.

Performance Challenges:

- **UHL ED 4 hour performance** – 68.7% for February, system performance (including LLR UCCs) for February is 77.8%.
- **Ambulance Handover 60+ minutes (CAD)** – performance at 4.2%.
- **Cancer 31 day treatment** was 87.2% in January against a target of 96%.
- **Cancer 62 day treatment** was 65.7% in January against a target of 85%.
- **Referral to treatment** – the number on the waiting list (now the primary performance measure) was above the target and 18 week performance was below the NHS Constitution standard at 52.8% at the end of February.
- **52+ weeks wait** – 10,942 breaches reported in February.
- **Diagnostic 6 week wait** was 39.3% against a target of 1% in February.
- **Patients not rebooked within 28 days following late cancellation of surgery** – 32.
- **Statutory and Mandatory Training** is at 88%.
- **Annual Appraisal** is at 78.9%.
- **TIA (high risk patients)** – 53.8% reported in February

Input Sought

I recommend that the Committee:

- Commends the positive achievements noted under Good News
- Note the areas of Performance Challenges and consider by reference to the Q&P and topic-specific reports if the actions being taken are sufficient.

For Reference:

This report relates to the following UHL quality and supporting priorities:

1. Quality priorities

Safe, surgery and procedures	[Yes /No /Not applicable]
Safely and timely discharge	[Yes /No /Not applicable]
Improved Cancer pathways	[Yes /No /Not applicable]
Streamlined emergency care	[Yes /No /Not applicable]
Better care pathways	[Yes /No /Not applicable]

Ward accreditation [Yes /~~No~~ /~~Not applicable~~]

2. Supporting priorities:

People strategy implementation [Yes /~~No~~ /~~Not applicable~~]
 Estate investment and reconfiguration [Yes /~~No~~ /~~Not applicable~~]
 e-Hospital [Yes /~~No~~ /~~Not applicable~~]
 More embedded research [Yes /~~No~~ /~~Not applicable~~]
 Better corporate services [Yes /~~No~~ /~~Not applicable~~]
 Quality strategy development [Yes /~~No~~ /~~Not applicable~~]

3. Equality Impact Assessment and Patient and Public Involvement considerations:

- What was the outcome of your Equality Impact Assessment (EIA)?
Not applicable as purely data reporting.
- Briefly describe the Patient and Public Involvement (PPI) activities undertaken in relation to this report, or confirm that none were required
Not applicable as purely data reporting. What to measure is determined nationally or through priorities.
- How did the outcome of the EIA influence your Patient and Public Involvement ?
N/A
- If an EIA was not carried out, what was the rationale for this decision?
As above.

4. Risk and Assurance

Risk Reference:

Does this paper reference a risk event?	Select (X)	Risk Description:
Strategic: Does this link to a <i>Principal Risk</i> on the BAF?	X	Failure to deliver key performance standards for emergency, planned and cancer care.
Organisational: Does this link to an <i>Operational/Corporate Risk</i> on Datix Register		
New Risk identified in paper: What <i>type</i> and <i>description</i> ?		
None		

5. Scheduled date for the **next paper** on this topic: 29th April 2021
6. Executive Summaries should not exceed **5 sides** My paper does comply

UNIVERSITY HOSPITALS OF LEICESTER NHS TRUST

REPORT TO: PEOPLE, PROCESS AND PERFORMANCE COMMITTEE/QUALITY AND OUTCOMES COMMITTEE

DATE: 25th MARCH 2021

REPORT BY: ANDREW FURLONG, MEDICAL DIRECTOR

DEBRA MITCHELL, ACTING CHIEF OPERATING OFFICER

CAROLYN FOX, CHIEF NURSE

HAZEL WYTON, DIRECTOR OF PEOPLE AND ORGANISATIONAL DEVELOPMENT

SUBJECT: FEBRUARY 2021 QUALITY & PERFORMANCE SUMMARY REPORT

Introduction

The Quality and Performance (Q&P) report provides an overview of Key Performance Indicators (KPI's) mapped to the Becoming the Best priorities.

The KPI's include:-

- those monitored by NHSI/E via the NHS Single Oversight Framework, which sets out the approach to overseeing and supporting NHS trusts and NHS foundation trusts under the Single Oversight Framework
- UHL clinical/quality priorities
- KPI's monitored in the contract with Leicester, Leicestershire and Rutland commissioners.

As part of the refresh of the report all KPI's are presented in Statistical Process Control (SPC) charts instead of graphs or RAG rated dashboards, as recommended by the CQC. Presented in this format will allow the Board to ask the right questions and is a more effective approach to assurance.

Data Quality Assessment – The Data Quality Forum panel is presented with an overview of data collection and processing for each performance indicator in order to gain assurance that it is of suitably high quality. The forum provides scrutiny and challenge on the quality of data presented, via the attributes of (i) Sign off and Validation (ii) Timeliness and Completeness (iii) Audit and Accuracy and (iv) Systems and Data Capture to calculate an assurance rating. Assurance rates key Green = Reasonable/Substantial Assurance, Amber = Limited Assurance and Red = No Assurance.

Statistical Process Control (SPC) charts

SPC charts look like a traditional run chart but consist of:

- A line graph showing the data across a time series. The data can be in months, weeks, or days- but it is always best to ensure there are at least 15 data points in order to ensure the accurate identification of patterns, trends, anomalies and random variations.
- A horizontal line showing the Mean. This is used in determining if there is a statistically significant trend or pattern.
- Two horizontal lines either side of the Mean- called the upper and lower control limits. Any data points on the line graph outside these limits, are 'extreme values' and is not within the expected 'normal variation'.
- A horizontal line showing the Target. In order for this target to be achievable, it should sit within the control limits. Any target set that is not within the control limits will not be reached without dramatic changes to the process involved in reaching the outcomes.

Normal variations in performance across time can occur randomly- without a direct cause, and should not be treated as a concern, or a sign of improvement, and is unlikely to require investigation unless one of the patterns defined below applies.

Within an SPC chart there are three different patterns to identify:

- Normal variation – (common cause) fluctuations in data points that sit between the upper and lower control limits
- Extreme values – (special cause) any value on the line graph that falls outside of the control limits. These are very unlikely to occur and where they do, it is likely a reason or handful of reasons outside the control of the process behind the extreme value
- A trend – may be identified where there are 7 consecutive points in either a pattern that could be; a downward trend, an upward trend, or a string of data points that are all above, or all below the mean. A trend would indicate that there has been a change in process resulting in a change in outcome

Key elements of a SPC dashboard

Appreciation of variance over time

Highlighting special cause and its nature

Reporting will commence once national reporting resumes.			

Metric	Feb 21	YTD	Target
Turnover Rate	9.3%	9.3%	10%
Special cause concern due to COVID-19, very likely to achieve target next month.			

Metric	Jan 21	YTD	Target
Sickness absence (excludes Estates and Facilities)	8.7%	7.2%	3%
Special cause concern due to COVID-19. The target will most likely not be achieved next month.			

Metric	Feb 21	YTD	Target
% of Staff with Annual Appraisal (excludes Estates and Facilities)	78.9%	78.9%	95%
Special cause concern due to COVID-19. Very unlikely to achieve target.			

Metric	Feb 21	YTD	Target
Statutory and Mandatory Training	88%	88%	95%
Special cause concern. Performance decreased in September due to the removal of the extension to the training refresher periods introduced in March due to COVID-19.			

Metric	Feb 21	YTD	Target
Nursing Vacancies	12.3%	12.3%	No National Target
Common cause variation.			

Metric	Oct 19 – Sep 20	Target
Mortality – Published Monthly SHMI	100	100
<p>UHL’s SHMI has been 100 or below for the past two years with some natural variation.</p>		

Metric	Dec 19 – Nov 20	Target
Mortality - Rolling 12 mths HSMR as reported in Dr. Foster)	108	100
<p>Over the past 4 years our HSMR has remained at either below or within the expected range. The recent increase in the HSMR was discussed at the Trust Mortality Review Committee and is thought to be due the increased deaths and reduced activity related to the Coronavirus and the associated risk adjustment methodology changes. The trust is working with our Dr Foster Consultant to better understand the increase.</p>		

Metric	Feb 21	YTD	Target
Crude Mortality	2.6%	2.0%	No National Target
Statistically significant increase in January due to COVID-19.			

Metric	Jan 21	YTD	Target
Emergency readmissions within 30 days	9.8%	9.5%	8.5%
Normal variation, unlikely to achieve target next month.			

Metric	Jan 21	YTD	Target
Emergency readmissions within 48 hrs	1.1%	1.2%	No National Target
No significant variation.			

Metric	Feb 21	YTD	Target
% Neck of femurs operated on under 36 hrs Based on Admissions	73.0%	66.4%	72%
Performance deteriorated significantly in April and May due to COVID-19. No assurance that target will be delivered next month.			

Metric	Jan 21	YTD	Target
Stroke - 90% of Stay on a Stroke Unit	86.5%	86.8%	80%
Common cause variation, consistently achieving target.			

Metric	Feb 21	YTD	Target
TIA Clinic within 24 Hours (Suspected High Risk TIA)	53.8%	68.3%	60%
Common cause variation, target not achieved in February.			

Responsive

<p>UHL has a locally agreed sickness absence target of 3%.</p>	<p>Performance in January was 8.7% excluding E&F</p>																																																												

Description	Performance and Trend	Key Messages	Key Actions
<p>Mortality - Rolling 12 mths HSMR as reported in Dr. Foster Intelligence)</p>	<p>Target – 100 or less</p>	<p>The increase in UHL’s HSMR appears to be due to a significant fall in activity & change in case-mix from March 20.</p>	<p>An in-depth analysis of UHL’s HSMR by DFI was presented to the March MRC. A detailed clinical review is now being undertaken of those diagnosis groups thought to be most contributing to our increased HSMR:</p>
<p>HSMR is risk adjusted mortality where patients die in hospital (either in UHL or if transferred directly to another NHS hospital trust) over a 12 month period within 56 diagnostic groups* (which contribute to 80% of in-hospital deaths).</p> <p>*The HSMR includes COVID activity and deaths where COVID is a secondary diagnosis.</p>	<p>We have been seeing a month on month increase in our HSMR since May 19 to Apr 20</p> <p>Performance for Dec 19 to Nov 20 HSMR has increased further and is now 107.5 and remains higher than expected</p>	<p>We also saw a reduction in the number of patients with a palliative care code which is included in the HSMR risk adjustment. Retrospective coding has been undertaken and our data is being resubmitted to SUS.</p>	<ul style="list-style-type: none"> • Septicaemia • Acute Bronchitis • Acute Renal Failure • Urinary Tract Infection • Senility • Fractured Neck of Femur
