INTEGRATED RISK AND ASSURANCE REPORT: OCTOBER 2018

Author: Risk and Assurance Manager Sponsor: Medical Director **Trust Board paper G**

Executive Summary

Context

The purpose of this paper is to enable the UHL Trust Board to review the current position with progress of the risk control and assurance environment, including the Board Assurance Framework (BAF) and the organisational risk register.

Note - The BAF should also be reviewed in the context of the assurances being provided in other reports also being considered at this Board meeting.

Questions

- 1. What are the highest rated principal risks on the 2018/19 BAF?
- 2. What are the significant changes on the organisational risk register since the previous version?
- 3. What are the key risk management themes evidenced on the organisational risk register?

Conclusion

- 1. The principal risks on the BAF have been identified by the Board and are linked to Trust objectives. They relate to: PR1 Quality standards; PR2 Staffing levels; PR3 Financial control total; PR4 Emergency care pathway; PR5 IM&T service; PR6 Estates and Facilities service; PR7 Partnership working. The highest rated principal risks (currently rated at 20) concern staffing levels, emergency care pathway and delivery of the financial control total.
- 2. There are 226 risks recorded on the organisational risk register (including 76 with a current rating of 15 and above). The Trust's risk profile continues to demonstrate active review across all CMGs and corporate services. There have been four new risks scoring 15 and above entered on the risk register during this reporting period.
- 3. Thematic Analysis of the CMGs risks shows the two key risk causation themes as gaps in staffing levels and demand pressures. Financial challenges, including funding and internal control arrangements, are recognised as key enablers to support the delivery of the Trust's objectives as well.

Input Sought

The Board is invited to review and approve the content of this report, note the updated position to items on the 2018/19 BAF and to advise as to any further action required in relation to principal risks recorded on the BAF and items on the organisational risk register.

For Reference

Edit as appropriate:

1. The following **objectives** were considered when preparing this report:

Safe, high quality, patient centred healthcare	[Yes]
Effective, integrated emergency care	[Yes]
Consistently meeting national access standards	[Yes]
Integrated care in partnership with others	[Yes]
Enhanced delivery in research, innovation & ed'	[Yes]
A caring, professional, engaged workforce	[Yes]
Clinically sustainable services with excellent facilities	[Yes]
Financially sustainable NHS organisation	[Yes]
Enabled by excellent IM&T	[Yes]

- 2. This matter relates to the following **governance** initiatives:
- a. Organisational Risk Register

[Yes]

Datix Risk ID	Operational Risk Title(s) – add new line for each operational risk	Current Rating	Target Rating	CMG
	See appendix two			

b.Board Assurance Framework

[Yes]

BAF entry	BAF Title	Current Rating
	See appendix one	

- 3. Related **Patient and Public Involvement** actions taken, or to be taken: [N/A]
- 4. Results of any **Equality Impact Assessment**, relating to this matter: [N/A]
- 5. Scheduled date for the **next paper** on this topic: [Monthly to TB meeting]
- 6. Executive Summaries should not exceed **2 pages**. [My paper does comply]
- 7. Papers should not exceed **7 pages.** [My paper does comply, excluding appendices]

UNIVERSITY HOSPITALS OF LEICESTER NHS TRUST

REPORT TO: UHL TRUST BOARD

DATE: 6TH DECEMBER 2018

REPORT BY: ANDREW FURLONG – MEDICAL DIRECTOR

SUBJECT: INTEGRATED RISK AND ASSURANCE REPORT

(INCORPORATING UHL BOARD ASSURANCE FRAMEWORK &

ORGANISATIONAL RISK REGISTER - OCT 2018)

1 INTRODUCTION

1.1 This integrated risk and assurance report will assist the Trust Board (referred to hereafter as Board) to discharge its risk management responsibilities by providing:-

- a. A copy of the 2018/19 Board Assurance Framework (BAF);
- b. A summary of the organisational risk register.

2. 2018/19 BOARD ASSURANCE FRAMEWORK SUMMARY

- 2.1 The Board has overall responsibility for ensuring controls are in place, sufficient to mitigate principal risks which may threaten the success of the Trust's strategic objectives. The format of the BAF is designed to provide the Board with a simple but comprehensive method to monitor the management of principal risks to the achievement of its strategic objectives. The purpose of the BAF is therefore to enable the Board to ensure that it receives assurance that all principal risks are being effectively managed and to commission additional assurance where it identifies a gap in control and/or assurance.
- 2.2 The BAF remains a dynamic document and all principal risks have been reviewed by their leads or delegated leads (to report performance for October), and have been scrutinised and endorsed by their relevant Executive Boards during November 2018. There have been no specific concerns about the BAF raised by way of the Executive forums for escalation to the Board meeting today. An updated version of the BAF is attached at appendix one.
- 2.3 The three highest rated principal risks relate to delivery of the financial control total, the emergency care pathway and workforce capacity and are described below:

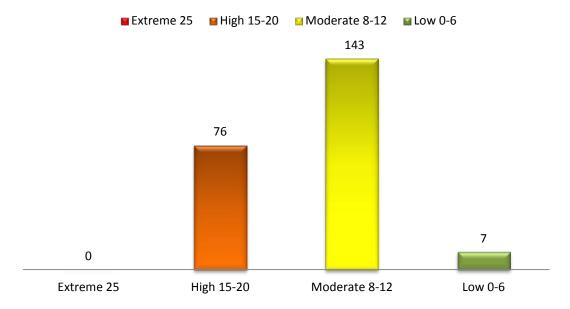

Principal Risk Description 2018/19	Risk Rating	Objective & Lead Director
PR2: If the Trust is unable to achieve and maintain the required workforce capacity and capability standards, then it may result in widespread instances of poor clinical outcomes for patients and increased staff workloads, impacting business (quality / finance) and reputation (regulatory duty / adverse publicity).	20	Our People DPOP
PR3: If the Trust is unable to achieve and maintain <i>financial sustainability</i> , then it will result in a failure to deliver the financial plan, impacting business (finance & quality) and reputation (regulatory duty / adverse publicity).	20	Financial Stability CFO
PR4: If the Trust is unable to effectively manage the <i>emergency care pathway</i> , then it may result in widespread	20	Organisation

instances of poor clinical outcomes for patients and sustained	of Care
failure to achieve constitutional standards, impacting business (quality & finance) and reputation (regulatory duty / adverse publicity).	coo

3. ORGANISATIONAL RISK REGISTER SUMMARY

3.1 The Trust's risk register has been kept under review by the Executive Performance Board and CMG Boards during November and displays 226 organisational risks. The Trust's risk profile, by current risk rating, is illustrated in Figure 1, below and a dashboard of the high risks is attached at appendix two.

Figure 1: UHL Risk Register profile - residual risk rating

3.2 There have been four new risks, rated 15 and above, entered on the risk register during the reporting period and these are described below:

CMG /ID	Risk Description	Current Rating	Target Rating
CSI / 3320	If we are unsuccessful in controlling expenditure, finding additional efficiency savings over and above the Trust set target and maximising income within CSI CMG, then it may result in the CMG exceeding annual budget leading to financial impact.	16	4
RRCV / 3325	If we do not replace the entire lung function equipment, then it may result in widespread delays to provide lung function tests for UHL patients, leading to potential for patient harm.	16	4
CSI / 3288	If no additional storage space can be identified in UHL pharmacy to stock essential filtration fluids, caused by robot rebuild starting summer 2018, then it may result in delayed treatment or diagnosis for patients that clinically require Continuous Renal Replacement Therapy, leading to harm.	15	5
RRCV / 3312	If recurrent funding is not provided to retain the 2 nursing posts (B6 and B3) for the LTBI programme, then it may result in current services (including the TB nurse-led outpatient list and safe community follow-up cases that are treated as part of the Migrant Screening Programme) having to be withdrawn.	15	1

3.3 One risk has increased in rating from moderate to high during the reporting period and is described below:

CMG	Risk Description	Current	Target
/ID		Rating	Rating
RRCV / 3233	If VSU diagnostic ultrasound images and reports are not made available on the UHL PACS & CRIS systems, then it may result in widespread delays with patient diagnosis or treatment due to the difficulties associated with not being able to access the relevant patient VSU diagnostic ultrasound images and reports, leading to harm.		1

3.4 One risk has reduced from 20 to 15 during the reporting period and is described below:

Dept / ID	Risk Description		Target Rating
W&C / 3083	If gaps on the Junior Doctor rota in the Neonatal Units at both the LRI and LGH reach a critical level, caused by fewer junior doctors allocated from HEEM due to national problems with paediatric recruitment at junior level, poor retention at more senior levels, challenges recruiting to our clinical fellow posts due to a decrease in number of available medical personnel, and contract regulations decreasing the availability of in house locums, then it may result in widespread delays with patient diagnosis or treatment, leading to potential for harm.	20→15	3

3.5 Two risks have reduced from high to moderate during the reporting period and are described below:

Dept. / ID	Risk Description		Target Rating
CHU GGS / 3139	If the ageing and failing decontamination equipment in both Endoscopy and theatres is not improved / replaced, then the service may fail to meet national guidelines, diagnostic targets and decontamination and Infection Control requirements, resulting in increased risk of harm to both patients and staff, increasing waiting list size and failure to secure JAG approval.	20→12	3
CSI / 3128	If unfated blood components previously issued (2015 to 2017) are not evidenced, then BSQR 2005 legal requirement of 100% traceability will not be met resulting in regulatory implications and delay in providing blood and blood components.	16→12	4

3.6 One risk, rated 15 and above, has been closed during the reporting period.

CMG /ID	Risk Description		Target Rating
ESM / 3275	If the aging Neurophysiology investigative/diagnostic systems are not replaced, then the EMG, EP, EEG services, including Telemetry, Ambulatory, OP & IP and Portable across UHL and community may become unsustainable resulting in an inability to diagnose patients' disorders of the function of nervous system.	16	6

3.7 The organisational risk register performance against the agreed indicators is detailed in the table, below:

Performance Measure Indicator	Target Level	Risk Register Total (1 – 25)	Risk Register High & Extreme (15 – 25)	Risk Register Moderate & Low (1 – 12)
No. of active risks (open)	N/A	226	76	150

% of risk reviews completed on time / within set review date	>90%	90% (204)	96% (73)	87% (131)
% of risks with mitigating actions in place	>90%	98% (222)	100% (76)	97% (146)
% of risks with mitigating actions elapsed (i.e. beyond target date)	<10%	12% (26)	5% (4)	15% (22)

- 3.8 Thematic analysis of the organisational risk register shows the key risk causation themes as:
 - Staffing shortages;
 - Imbalance between demand and capacity.
- 3.9 A number of operational risks make reference also to financial pressures, as a result of limited funding and challenging internal control arrangements, which are recognised as enablers to support the delivery of the Trust's operational and strategic objectives. These thematic findings on the risk register are reflective of the highest rated principal risks on the BAF.

4 RECOMMENDATIONS

4.1 The Board is invited to review and approve the content of this report, noting the position to principal risks on the 2018/19 BAF and organisational risk register, and to advise as to any further action required in relation to management of the BAF and the organisational risk register.

UHL Board Assurance Framework 2018/19:

The Board Assurance Framework (BAF) is designed to provide the Trust Board with a simple but comprehensive method for the effective and focussed management of principal risks to the achievement of its strategic objectives. The Trust Board defines the principal risks within the BAF and ensures that each is assigned to a Lead Director, as well as to a lead Executive Board for scrutiny, and to a lead Committee of the Board for regular review and assurance.

The principal risk descriptions include, in italics, the key threats likely to increase the risk and which may influence the achievement of the Trust's strategic objectives.

The focus within the BAF is on the effectiveness of the primary controls, which we are replying on, whose impact could have a direct bearing on the achievement of the Trust's strategic objectives, should the controls be ineffective.

The BAF is linked to performance metrics with detective risk indicators as a further source of evidence to inform the regular review and re-assessment. The assurance sections focus on where internal and external scrutiny of the operation of primary controls takes place, along with a summary of what the evidence received tells us in relation to the effectiveness of the controls which are being relied on.

Through scrutiny of principal risks at the relevant Executive Board meetings attention should be taken to recognise gaps in the primary controls (i.e. what should be in place to manage the risk but is not) and/or assurances (i.e. what evidence should be in place to tell us in relation to the effectiveness of the controls / systems which are being relied on but is not), to endorse risk ratings, and to agree and monitor appropriate actions to treat the gaps through to progression.

The principal risk rating is based on evidence in relation to the effectiveness of the primary controls which are being relied on and will be reviewed at the relevant Executive Boards, as part of a robust governance process to scrutinise the principal risk, in order to endorse a final position for reporting to the Trust Board.

BAF Rating System: rating on the effectiveness of controls / systems which we are relying on (I x L):

			Impact UHI	L Reputation	n (if the risk w	as to materi	alise)
ں بو	Λ _		Very Low	Minor	Moderate	Major	Extreme
	ess -	Very good controls	1	2	3	4	5
boo	ntro -	Good controls	2	4	6	8	10
elihoo	2 2	Limited effective controls	3	6	9	12	15
 ` <u> `</u>	of o	Weak controls	4	8	12	16	20
_ •	<u> </u>	Ineffective controls	5	10	15	20	25

PR Score	PR Rating			
1-6	Low			
8-12	Moderate			
15-20	High			
25	Extreme			

2018/19 BAF Dashboard

Pri	ncipal Risk Description	Strategic Objective	Exec Direc	Exec Team	Trust Board Cmttee	Current Rating I x L	Change
1)	A) If the Trust is unable to achieve and maintain the required quality and clinical effectiveness standards, <i>caused by inadequate clinical practice and/or ineffective clinical governance</i> , then it may result in widespread instances of avoidable harm to a large number of patients, affecting reputation (breach in regulatory duty / adverse publicity).	Quality Commitment: to deliver safe, high quality, patient centred, healthcare	MD / CN	EQB	AC / QOC	4 x 3 = 12	\leftrightarrow
	B) If the Trust is unable to achieve and maintain the required quality and patient safety standards, <i>caused by inadequate clinical practice and/or ineffective clinical governance</i> , then it may result in widespread instances of avoidable harm to a large number of patients, affecting reputation (breach in regulatory duty / adverse publicity).	Quality Commitment: to deliver safe, high quality, patient centred, healthcare	MD / CN	EQB	AC / QOC	4 x 4 = 16	\leftrightarrow
	C) If the Trust is unable to achieve and maintain the required quality and patient experience standards, <i>caused by inadequate clinical practice and/or ineffective clinical governance</i> , then it may result in widespread instances of avoidable harm to a large number of patients, affecting reputation (breach in regulatory duty / adverse publicity).	Quality Commitment: to deliver safe, high quality, patient centred, healthcare	MD / CN	EQB	AC / QOC	4 x 3 = 12	\leftrightarrow
2)	If the Trust is unable to achieve and maintain the required workforce capacity and capability standards, caused by employment market factors (such as availability and competition to recruit, retain and utilise a workforce with the necessary skills and experience), lack of extensive education, training and leadership, and demographic changes, then it may result in widespread instances of poor clinical outcomes for patients and increased staff workloads, affecting business (finance) and reputation (breach in regulatory duty / adverse publicity).	We will have the right people with the right skills in the right numbers in order to deliver the most effective care	DPOD	EWB / EPB	AC/ PPPC	5 x 4 = 20	\leftrightarrow
3)	If the Trust is unable to achieve and maintain financial sustainability, <i>caused through delivery of income, the control of costs or the delivery of cost improvement plans</i> , then it will result in a failure to deliver the financial plan, affecting business (finance) and reputation (breach in regulatory duty / adverse publicity).	We will continue on our journey towards financial stability - deliver target 18/19	CFO	EPB	AC / FIC	5 x 4 = 20	\leftrightarrow
4)	If the Trust is unable to effectively manage the emergency care pathway, caused by persistent unprecedented level of demand for services, primary care unable to provide the service required, ineffective resources to address patient flow, and fundamental process issues, then it may result in widespread instances of poor clinical outcomes for patients and sustained failure to achieve constitutional standards, affecting business (finance) and reputation (breach in regulatory duty / adverse publicity).	We will improve our Emergency Care Performance	coo	ЕРВ	AC / PPPC	5 x 4 = 20	\leftrightarrow
5)	If the Trust is unable to deliver a fit for the future IM&T service, caused by inability to secure appropriate resources (including external capital and workforce), a critical infrastructure failure, ineffective system resilience and preparedness of an external IT supplier or an external shut-down attack, then it may result in a significant disruption to the continuity of core critical services, affecting reputation (breach in regulatory duty / adverse publicity).	To progress our strategic enabler – IM&T	CIO	EIMT / EPB	AC / PPPC	4 x 4 = 16	\leftrightarrow
6)	If the Trust does not adequately develop and maintain its estate to meet statutory compliance obligations and minimise the potential for critical infrastructure failure, caused by a lack of resources to address the backlog maintenance programme, insufficient clinical decant capacity and the sheer volume of technical work to address ageing buildings, then it may result in an increased risk of failure of critical plant, equipment and core critical services leading to compliance issues, risk of regulatory intervention, impact upon business and patient critical infrastructure and adverse publicity.	To progress our strategic enabler - Estates	DEF	ESB	AC / QOC	5 x 3 = 15	\leftrightarrow
7)	If the Trust is unable to work collaboratively with partners to secure the support of community and STP stakeholders, caused by breakdown of relationships amongst partners and ineffective clinical service strategies of the local population, then it may result in disruption to transforming sustainable clinical services, affecting business (finance) and reputation (breach in regulatory duty / adverse publicity).	To develop more integrated care in partnership with others	DSC	ESB	AC / PPPC	4 x 4 = 16	\leftrightarrow

Quality and Clinical Effectiveness Reporting

- 2018/19 UHL Quality Commitment measured through PIDs reported to EQB in relation to:
 - > Improve patient outcomes by greater use of key clinical systems and care pathways.
- Quality Framework (Strategy) outlining how quality is managed within the Trust reported in AOP.
- Schedule of external visits maintained and reviewed at CMG service and Exec Team levels
- Deteriorating Adult Patient Board monitors outcomes related to ICU, sepsis, EWS, AKI and diabetes.

Primary Controls

- Clinical service structures, resources and governance arrangements in place at Trust Exec and CMG / Specialty levels ensuring appropriate escalation of quality matters.
- Monthly reporting of Mortality Rates and Learning from Deaths (LFD) to the UHL MRC.
- CMG monthly Performance Review Meetings chaired by CN, MD, COO, CFO and DPOD.
- Reporting to Commissioner led Clinical Quality Review Group (CQRG) on compliance with quality schedule and CQUINS – including Commissioner Quality visits schedule for 2018/19.
- CQC improvement plan monitored at CMG Boards, Exec Team and Trust Board.
- NHSI Board to Board performance review meetings.

Quality and Clinical Effectiveness Work Programmes

- Clinical Policies, guidelines, SOPs including NatSSIPs/LocSSIPs on INsite.
- Trust wide risk management and governance structure in place including: risk register, CAS, incident reporting, Complaints, Claims & Inquest management. Datix risk management software.
- Clinical audit programme, including participation in national audits.
- Consultant outcomes, participation in national clinical registries
- GIRFT and External Peer Reviews.
- Management and assessment against NICE guidance.
- Professional standards and Code of Practice / Clinical supervision.
- Appraisal and Revalidation process.
- Learning from Deaths work stream to include Medical Examiner and Specialty M&M Processes and the Bereavement Support Service.
- Clinical Harm review process Case note reviews, morbidity reviews and thematic findings.
- Analysis and benchmarking of UHL's mortality rates using Dr Foster's Intelligence and HED data.
- Stroke and Fractured Neck of Femur improvement programmes.
- Quality Commitment 'Improving patient outcomes' work programmes to include: Implementing the Clinical Frailty Score; Embedding use of Nerve Centre for all medical handover board rounds and escalation of care; Fully implement plans to standardise Red2Green.

	Ref	Indicators	18/19 Target	Oct - 18	18/19 YTD
	E1	Readmissions <30 days – Discharge work stream – one month in arrears	Red >8.6%		9.1%

address the deterioration in TIA Clinic Performance.

report being submitted to EQB to advise on actions being taken to

	October FINAL		
	Internal Assurances	External Assurances	Gaps Identified & Pending Actions
	 UHL Quality Commitment components monitored at Exec Team and QOC, quarterly. Both Operational management and Executive/Board reporting is in place for Clinical effectiveness. Reports provide assurance and highlight threats to delivery of the programme along with any mitigating actions. Latest reports received include: NEWS2 NPSA alert (NHS/PSA/RE/2018/003) compliance monitored via ADPB and confirmed to EQB. Stroke - Actions currently taken have meant the TIA clinic has met the target for high risk referrals of 60% within 24 hours for Aug & Sept. 90% stay on a Stroke Unit has been achieved for 80% of patients for the past 12 months. Mortality report to QOC and Trust Board (in Sept and Oct respectively) highlighted capacity constraints in the Learning from Deaths programme. LLR Frailty Task Force (led by UHL) is in place with a focus on identifying and responding to the needs of frail multi morbid patients. This group is responsible for the overall embedding of the CFS in ED and the wider hospital, and responding to these patients holistically in the community to ensure better outcomes and prevent readmission into acute care. A readmission working group has been set up within UHL to understand the data and identify a mechanism to refer these patients to STP provided community neighbourhood teams. Community partners are now involved with this group to ensure a system wide response. Readmissions CQUIN agreed, Q2 successfully delivered. Targeted specialities all involved. Readmission coordinator post - funded by city CCG to provide community follow up for patients at high risk of readmission. (PARR>40) #NOF Task and Finish group involving senior consultants from Trauma, Anaesthetics, Orthogeriatrics, ED as well as Nursing, Theatres and Management met to discuss problems and develop a new action plan. Development of a new/reinvigorated Action Plan jointly owned by ITA	 CQC comprehensive review in 2017/18 - inspectors have rated our Trust overall as Requires Improvement; rating us Good for being effective and caring, and Requires Improvement for being safe, responsive and well-led. CQC unannounced inspection 29.5.18 with written feedback provided. Human Fertilisation & Embryology Authority Inspection – UHL's IVF and ICSI success rates in line with national average. GIRFT review of Orthopaedic Services found UHL has very low revision rates but potential area for reduction in Length of Stay Internal Audit Programme 2018/19: Learning from Deaths Programme Review due to commence beginning Nov 18. Internal Audit 2016/17: Clinical Audit - medium risk (associated with CMG engagement). 	Mortality Funding approved for additional administrative and analyst support. Interviews are planned for November 2018 Review Dec 18 (DMD)/ Bereavement Support Nurse to start November 2018. Review Dec 18 (DMD) #NOF A 'Rapid Cycle Fortnight' from 1st to 12th October has been completed. The main intervention was to provide a team and theatre access over the weekend for NOF patients. The outcome of this trial will be reported to EQB in December 2018. Review Dec 18 (MSS CMG CD) Agreement that Fractured Hip Operating lists are to be protected for NOF patients with immediate effect. There has been a drift over time which needs to be stopped. These lists can only be used for other trauma cases if there are no patients with fractured NOF waiting or if the alternative trauma case is life/limb threatening and there is no other trauma theatre available. Introduction of the senior 'Hot' consultant of the week for Trauma commenced beginning of August. This new process should help support the NOF service. Review Dec 18 (MSS CMG CD) Readmissions Although the process for reviewing patients has been agreed in principle, a formal proposal has yet to be designed and tested pre-winter 2018. This includes allowing a field on discharge letters specifying what the readmission risk for patients is and requesting the GP to refer patient for MDT review. Review Dec 18 – (HoSD) Respiratory – plans to reduce the PARR score to >30 for patient follow up – Resources to be discussed / what can be delivered safely in the community? Review Jan 19 – (HoSD) Eol emergency readmissions increase of 16%/20%, from average baseline, noted in July and August, requires further investigation. Review Jan 19 – (HoSD) Frailty The CFS score has been built into NerveCentre and tested through August. It is ready to be formally launched across the Trust. A training and education plan has been devised specifically for ED and will be rolled out through Sept-Oct 2018. Review Nov 18 – (HoSD) Stroke - 90% Stay on Stroke Unit CRO had an effect in August as
- 1	za z		Dec 19 (FCM CMC CD)

Dec 18 – (ESM CMG CD)

Review Feb 19 - (ESM CMG CD)

Work plan in place to increase capacity for high-risk patients and discussions being held with commissioners to look at deflecting obvious non TIA referrals. -

October FINAL

Internal Assurances	External Assurances	Gans Identified & Bonding Actions
UHL Quality Commitment components monitored at Exec Team and QOC quarterly. Outpatient Programme Board leading and monitoring the improvements in outpatients identified in response to patient feedback. Monthly reports shared at clinic level with CMGs. End of Life Care and Palliative Care Committee monitors improvements to increase positive patients experience in relation to feeling involvement in care. The Trust seeks to ensure services develop in response to patient's feedback and therefore all "suggestions for improvement/complaints/areas that were lacking from the patients perception", referred to as Sff's, are triangulated allowing overall themes at Trust and CMG level to be derived. The CMGs are then able to demonstrate their response to this feedback. The Clinical Audit Team have streamlined this process facilitating the production of high level themes with minimum workload as it is acknowledged that understanding the themes from feedback from patients and monitoring CMG response to these themes is necessary to ensure patient led services and care. The areas for improvement identified by patients in the triangulation of feedback are the areas of focus identified in the Trust's Quality Commitment and overseen at PIPEEAC. Complaints Data report (Oct 2018): We have seen the number of formal complaints increase slightly this month and an overall PILS Activity increase of 4% when compared to the previous month. Performance for 10 day complaints has fallen slightly to 81% from 90%. 25 day performance has fallen to 80% from 91% and 45 day performance has improved significantly to 94% from 77% when compared to the previous month. Three PHSO cases were closed this month and all partially upheld. Independent Complaints Review Panel met in Oct and actions following this include a review of the Terms of Reference for the Independent Complaints Review Panel and the new ToR have been added to the revised Complaints Policy (approved in Oct 2018) in the appendices.	CQC comprehensive review in 2017/18 - inspectors have rated our Trust overall as Requires Improvement; rating us Good for being effective and caring, and Requires Improvement for being safe, responsive and well-led. CQC unannounced inspection 29.5.18 with written feedback provided. Internal Audit Programme 2018/19: Quality Commitment review – scheduled Q3. Internal Audit 2016/17: Risk management – medium risk (associated with CMG processes). Clinical Audit - medium risk (associated with CMG engagement).	Gaps Identified & Pending Actions Improving experience of care for patients in the outpatient facilities. As part of the Trust's Quality Commitment there is a Trust wide improvement plan and an Outpatient Group with representatives from all CMGs to drive this forward – QC priority 2018/19 – Reviewed at EQB quarterly (ACN). Improving patient involvement in care in ED. This is being taken forward through the End of Life Care Hospital Improvement Programme (ELCHIP) programme and monitored via the End of Life and Palliative Care Committee – QC priority 2018/19 – Reviewed at EQB quarterly (ACN).

	Internal Assurances
•	CFO's Financial Reports to EPB (monthly) key issues
	considered at the meeting for month 7 relate to
	delivering the revised planned deficit of £51.8m (exc PSF).
	The financial impact caused by the recent NHSI decision
	to not allow the LLP alongside a re-forecast of the year
	end position has been recognised within the monthly
	reporting. This was submitted as part of the Q2 reporting
	process and has been communicated to NHSI including
	compliance with the relevant governance processes.
•	The income position has over-preformed and a

- The income position has over-preformed and a corresponding overspend within non-pay has been seen. The pay bill (substantive) is overspent by £11.8m to plan (including £6.3m relating to A4C national pay award). Cost improvement plans show an under-performance to plan at month 7. Capital expenditure has under-spent within the year to date position and will not lead to an over spend within the programme. Cash flow and deficit funding has been received in line with the submitted plan.
- FIC Summary to Trust board (Monthly). Key issues are as described above and as reported to EPB. The Committee also reviewed the additional report detailing a more granular analysis of the Trust's cash position.
- Capital Monitoring and Investment Committee (monthly).
 A detailed review of month 6 capital expenditure was reviewed with key variances explored in the context of the overall capital programme.
- Revenue Investment Committee (monthly). The committee had a limited number of business cases for review. All actions are being progressed.
- Update on the Commercial Strategy. The Trust Board, at its last thinking day, has an agreed approach to ensure successful delivery of year 2 of the commercial strategy.
- Alliance Contract. This quarterly review was discussed and reviewed at the Executive Quality Board in May.

External Assurances External Audit of Financial Systems 2018/19:

Work programme for 2018/19 to be reviewed and approved at the relevant meeting of the Audit Committee.

Internal Audit 2018/19:

- Financial systems Q3 financial systems controls work to meet the requirements of External Audit and to address specific risks identified by management. Work will include data analysis on specific areas of risk in order to identify trends/ anomalies and to direct our controls-based work.
- Review of cost improvement programme Q2 - will review the adequacy of arrangements for delivery of the CIP and the robustness of planning for future years.
- NHSI Carter Corporate Service review: Carter
 Target for back office cost to be no more than 6%
 of turnover by March 2020. The Trust's Director of
 Efficiency and CIP is leading this initiative, as part
 of the overall review of Model Hospital, and
 engaging across the Corporate Teams to ensure
 robust plans are in place to achieve the 2020
 target.
- Four Eyes support is being deployed within the cross cutting theatre/elective pathway workstream and the cross cutting outpatient workscheme.
- NHSI increased scrutiny through monthly performance review meetings and specific Finance focused monthly meetings.

Gaps Identified & Pending Actions

Gap: Effectiveness of budget management and control at CMG and Corporate directorate levels.

Actions:

2018/19 planning requires the delivery of a deficit of £29.9m inclusive of a £51m CIP programme. Each CMG and Corporate Directorate has an allocated budget totalling £29.9m however due to the current work in progress with respect of demand and capacity modelling CMGs are yet to sign-off a fully phased month by month budgetary control position in line with the accountability framework. This process has concluded with MSS being finalised as part of month 5 reporting.

Within June the Trust received a revised Control Total offer from NHSI. This revised Control Total was subject to review and subsequent approval at a special Trust Board meeting held on 18 June 2018. As a response to this challenge a Financial Recovery Board has been created and is chaired by the CEO. The financial recovery board action plan currently had an identified gap of £11m and included the risk within the Cost Improvement Programme of £3.2m when compared to the target of £51m. The Financial Recovery Board meets fortnightly with each work-stream being sponsored by an Executive Director. As part of Q2 reporting the Trust has reported a revised forecast outturn for 2018/19. This includes the impact of not progressing with the FM LLP and recognition of a further deterioration of £8.7m. A revised deficit of £51.8m was submitted with a recovery action in place to address the remaining £3.2m financial challenge. This position remains for M7 reporting.

Star chamber process (led by CEO) reviewing the new investment requirements. There is a significant shortfall in available funding compared to the complete list of investment requirements with the Star Chamber prioritising and approving spend. The allocation of funds to investment requirements has been agreed but further scrutiny is required and forms part of the Financial Recovery Board.

The capital programme has been approved by CMIC and then further ratification by the Star Chamber. The relevant scheme holders are providing further analysis on a risk based assessment detailing the potential risks due to the limited availability of capital funds.

Cash flow and enhanced cash reporting continues to be reviewed and discussed at FIC. Cash for deficit funding has been received in line with planned levels. This planned level of cash excludes any additional working capital requirements that will be required as a result of the revised deficit position. An application for this additional cash has been made in October with cash received in November.

Information Governance IG Toolkit reported to AC – All	•	Inter
components of the IGT in relation to data quality were self-		\triangleright
assessed as the highest level 3 for 2017-18 – UHL is a trusted		
organisation as defined in the IG Toolkit. With the move from		
IGT to the Data Security and Protection Toolkit from April		
2018, specific requirements for management of Data Quality		
are still being finalised. We have contacts with NHS Digital as		\triangleright
well as good connections across a network of peer Data		
Quality leads at other regional Trusts.		
GDPR progress reported to Exec Team (EIM&T) and AC –		
GDPR Project Lead appointed in July 2018.		
Paperless hospital 2020 strategy reported to Exec Team and		
to Trust Board sub-committees on a regular basis - The pace		
of achievement of the Paperless Hospital 2020 is dependent		
on available resources to effect the changes and prioritisation		
of other demands on IT services.		
The Trust's avoidance of any significant impact from the		

WannaCry ransomware has highlighted the good standard of

room for complacency given the speed with which this threat

our processes related to cyber security, although with no

IM&T Capital Plan Briefing to PPPC.

Internal Audit 2018/19:

Information Governance – to perform validation work on the Information governance toolkit in line with the annual audit requirement – Audit review completed March 2018 – Medium Risk.

External Assurances

- IG / GDPR follow-up to review the adequacy of the Trust's information governance processes through 1) validation work on the new Data Security and Protection (DSP) Toolkit, which replaces the Information Governance toolkit from April 2018 and 2) Specific follow up work on the actions raised in the 2017/18 GDPR review Audit scheduled Q4 2018/19.
- Paperless 2020 programme review following an initial review of EPR 'Plan B' a follow up to assess how the programme is progressing using a diagnostic 'Twelve elements of programme management excellence' – Audit review completed May 2018 – High risk progress with actions tracked via the e-Hospital Board, delays against plan but expected to complete by Mar 19.
- Emergency Preparedness, Resilience and Response (EPRR) – to review a selection of the IM&T Disaster Recovery plans – Audit scheduled Q4 2018/19.
- ISO 27001:2013 The MBP maintains an accreditation (in 2017) – due for review in 2018/19.
- NHS digital Health Check cyber security audit Jan 2018 – remediation plan agreed.
- NHS IT Maturity Index Completed Q1 2018/19 scores for UHL higher on all domains than national average.

Gaps Identified & Pending Actions

- Project resource to finance the acceleration of the Trust's IT service including desktop replacement project Secure adequate resources to fund 18/19 IT strategy Financial plan confirmed by CIO July 18 for eMeds. Plan to recruit in progress. Project priorities resource plan to the end of Mar19 will be taken to eHospital Board Nov 18.
- eHospital engagement Deliver support to the quality commitment by identifying priority work that can be undertaken on existing systems, i.e. nervecentre or ICE as per the agreed UHL annual priorities. For 2018/19 will involve the following 5 areas (Responsible Officers MD & CIO):
 - Replacing old computing/mobile hardware- roll-out started Aug 18
 - Nervecentre- in progress, assessment forms being deployed Q3
 - PACS in progress go live due Nov18
 - ➤ ICE— in progress- Implement in Cardiology and ENT Dec 18
 - E-Prescribing in progress roll-out to start Oct 18
- Information Governance plan for implementation of GDPR gap analysis by Internal Auditors identified there are a number of gaps with regard to the new regulation commenced in May 2018. Mitigating actions include undertaking a Corporate Records Audit by Mar 2019 (CIO).
- Cyber security raising awareness to reduce risk of human factors and ongoing medical equipment challenges – IM&T awareness campaigns including IM&T newsletter and new GDPR training - Commenced Oct 18 (CIO).
- Cyber security Reducing risks are dependent on the roll-out of the eQuip hardware refresh programme and in particular replacement of PCs running old operating systems 12 month project commenced July 2018 and due July 2019. Additional 3 month resources purchased to accelerate the roll-out for eMeds from Nov 18
- CMGs Business Continuity Plans have been identified as a gap in control following the IM&T power failure downtime in Oct 18. Developing effective plans is included as part of the EPRR work programme in 2019/20 and actions assigned to CMGs to develop their plans for all IT systems.
- External IT supplier preparedness UHL to seek assurance from external providers about their system resilience arrangements. CIO linking with CMGs HoOs to request they liaise with their external providers (requested 06/08/18) Q2 2018/19 (CIO).

Internal Assurances	External Assurances	Gaps Identified & Pending Actions
 Risk Assessments identify significant risks are reviewed by E&F Senior Management Team on a quarterly basis, prior to being put onto the Trust Risk Register. Risk action plans/action notes are generated and monitored and reviewed in accordance with Trust risk management policy. Data from Backlog maintenance & maintainability (age & replacement parts), business continuity and condition surveys ensures highest identified risks are prioritised and considered for funding. For the Non-Statutory tasks (69%) completion of the monthly schedule is subject to the volume of reactive calls and the shortage of engineers to carry out tasks and administration personnel to close them down on the system. 	 Backlog maintenance – reported in the ERIC return to the Department of Health and benchmarked against other NHS Trusts annually. Premises Assurance Model – current rating: 'Steady State'. External audit for Piped Medical Gases carried out by an Independent Authorising Engineer, annually. Electrical Low Voltage, High Voltage and Lifts audited by an Independent Authorising Engineer, annually. Water audit carried out by an Independent Authorising Engineer, six monthly. External audit for Specialist Ventilation carried out by an Independent Authorising Engineer, annually. Patient-led Assessments of the Care Environment (PLACE) report benchmarking, Internal Audit 2017/18: Backlog maintenance – Audit action plan monitored and reviewed at UHL Audit Committee. Internal Audit 2019/20: Capital Programme (TBC) - a review of the prioritisation process for developing the capital programme, how resources are allocated across the key areas and the monitoring / reporting around the programme. 	 Insufficient funding allocated to fully implement the Sustainable Development Management Plan and reconfigure the estate inline with clinical and estates strategy. A five-year backlog maintenance reduction programme with Trust Board backing is required. Detailed build-up of capital costs to provide an overall 5 year capital programme to ensure appropriate finances are allocated to implement the changes required. A full asset list of all plant and equipment is required. LLR STP funding position to be updated for a 2019/20 bid and put forward to NHS Improvement and NHS England. This includes backlog and infrastructure investment. Confirmation of planning assumptions and service model which will lead to refinements in the proposed DCP design solutions – Further revision of the DCPs based the current level of information and forecasts. Identify appropriate level of upgrade works; to be informed by the latest condition survey and linked to the Galliford Try review. The review has been received and is being assessed by estates team (Oct update). Recruitment and retention of key operational and maintenance E&F staff challenges, resulting in gaps in service delivery and standards – DEF to review following a change in E&F trajectory as a result of not moving to the planned E&F Subsidiary model. Recruitment and Retention of Estates Specialist Services Authorised Person (AP) specialists identified as a potential threat to Capital Development schemes as AP support is key to quality & safety in the delivery of capital schemes – DEF to review 18/19.

October FINAL

	Internal Assurances	External Assurances	Gaps Identified & Pending Actions				
•	 Internal self-assessment reviews about the efficacy of the controls for this risk have been reported to ESB; Stakeholder meetings; Trust Board sub-committees and have identified gaps in active participation in several related STP work streams – this has been rectified from June 2018, with operations and strategy attendance at key STP meetings. 	working is limited at this point. This tells us that the current governance processes are not yet fit for purpose t and will not fully mitigate the risk as presented.	 First new Out of Hospital Board met in October 2018 but with limited progress made on action plan. DCOO attended for UHL. Action to review progress in November 2018 and escalate via SLT and CLG if required Gaps/Delays in the community services redesign process to be highlighted to SLT in November. 				
	 Multiple CMGs and services now involved in improving this system of care for frail and multi-morbid patients internally and with external partners. Positive engagement noted to date. 	 The work will be referenced in LLR escalation meetings with NHS England and NHS Improvement. New Out of Hospital Board formed, covering the duplicative work of the Integrated Locality Teams and th 					
	 Planned care: System wide LiA events for key specialties continue to take place. 5 have been completed so far, with working groups in place to inform transformed models of care for each specialty. 	Home First STP work streams. UHL fully engaged at strategic and operational level. Outcomes being aligned to those of the Frailty programme.					

Appendix 2 UHL Risk Register Dashboard (15+) as at 31 October 2018

		Appendix 2 UHL Risk Register Dashboard (15+) as at 31 October 2018	Current Risk	Target Risk
Risk ID	CMG	Risk Description	Score	Score
1149	CHUGGS	If there is an increase to cancer patients waiting times, caused by competing priorities between cancer targets, patient compliance, capacity and administration processes then we may breach waiting time targets resulting in delays in patient diagnosis and treatment.	20	9
2264	CHUGGS	If an effective solution for the nurse staffing shortages in CHUGGS at LGH and LRI is not found, then the safety and quality of care provided will be adversely impacted.	20	6
2565	CHUGGS	If capacity is not increased to meet demand, then delivery of national targets in General Surgery, Gastro and Urology will be compromised resulting in delays in patient treatment pathways.	20	9
3183	RRCV	If Cardiac Surgery is unable to operate on elective patients due to winter pressures and/or availability of ward and ITU beds, there is a risk that patients' conditions could deteriorate, resulting in a need for urgent admission or more complex surgery with greater risk of complications.	20	15
3186	RRCV	If the CMG fails to achieve the allocated financial control total then this could result in an deterioration in the Trust overall financial deficit.	20	9
2354	RRCV	If the capacity of the Clinical Decisions Unit is not expanded to meet the increase in demand, then will continue to experience overcrowding resulting in potential harm to patients.	20	9
2149	ESM	If we do not recruit and retain into the current Nursing vacancies within SM, then patient safety and quality of care may be compromised resulting in potential delayed care.	20	6
2804	ESM	If the on-going pressures in medical admissions continue, then Specialist Medicine CMG bed base will be insufficient thus resulting in the need to out lie into other speciality/CMG beds affecting quality and safety of patient care.	20	12
3222	ESM	If a member of the public is violent or aggressive outside ED, or in ED receptions/waiting rooms, then staff or members of the public may be harmed, equipment may be damaged.	20	10
3077	ESM	If there are delays in the availability of in-patient beds, then both Emergency Care performance and safety of patients within the Emergency Department at Leicester Royal Infirmary could be adversely affected, resulting in overcrowding in the Emergency Department and an inability to accept new patients from ambulances.	20	15
3114	ITAPS	If we are unsuccessful in recruiting ITU medical and nursing staff to agreed establishment, then we are at risk of not being able to deliver a safe and effective service, resulting in delay in treatment to patients and deterioration in performance.	20	6
3115	ITAPS	If there is an IT infrastructure failure or delay in accessing systems due to out of date and obsolete hardware and software in theatres and other clinical areas, then clinical teams will not be able to access essential patient information or imaging in a timely manner resulting in potential for patient harm.	20	4
3120	ITAPS	If there is a continued mismatch between capacity and demand for access to emergency theatres we are at risk of cat 2 and 3 patients not receiving surgery within the NCEPOD timeframes and increased requirement for out of hours working.	20	12
2333	ITAPS	If we do not recruit into the Paediatric Cardiac Anaesthetic vacancies, then we will not be able to maintain a WTD compliant rota resulting suboptimal patient treatment.	20	8
3113	ITAPS	If the infrastructure in our ITU's is not updated and expanded to meet current standards and demand, then clinical teams will not be able to provide safe care to all patients requiring level 2 or 3 care resulting in deterioration in clinical outcomes benchmarked against other centres (ICNARC).	20	8
3200	ITAPS	If the practices, workforce, estate and facilities in LRI ITU are not compliant to current standards and expectations, caused by staffing shortages, inadequate capacity for demand and an aging estate with suboptimal environment for critical care patients, then clinical teams will not be able to provide safe care to all patients requiring level 2/3 care due to an increased risk of cross contamination	20	10
3119	ITAPS	If there is a deterioration in our theatre staff vacancies and we are unsuccessful in recruiting ODP's to agreed establishment; then we are at risk of not being able to deliver a safe and effective service.	20	6
2777	Comms	If fundraising targets for the Charity fundraising campaign do not reach target charitable income If the Trust's Statutory and Mandatory Training data can no longer be verified on the new Learning Management System, HELM, then it is not possible to	20	8
3054	HR	confirm staff training compliance which could result in potential harm to patients, reputation impact, increased financial impact and non-compliance with agreed targets.	20	3
3148	Corporate Nursing	If the Trust does not recruit the appropriate nursing staff with the right skills in the right numbers then we may not be able to deliver safe, high quality, patient centred, efficient care and reduce our current nursing vacancy levels resulting in potential increased clinical risk to our patients and poor patient experience	20	12
2404	Corporate Nursing	If the process for identifying patients with a centrally placed vascular access (CVAD) device within the trust are not robust, and there is no oversight of all Vascular Access activity across UHL then this could result in increased morbidity and mortality.	20	16
3298	Corporate Nursing	If the outbreak of Carbapenem-resistant Organisms (CRO) continues, we are at risk of under achieve ment of key clinical standards and a decrease in bed capacity for emergency admissions so reducing our ability to continue to provide an acceptable level of health service resulting in potential harm to patients, adverse reputation and service delivery impact.	20	5
3325	RRCV	NEW: If we do not replace the entire lung function equipment there is an increasing risk of equipment failure and thus the inability to provide lung function tests for UHL patients. The current system is now over 13 years old and has served for longer than its life expectancy which is 7 to 10 years.	16	4
3109	RRCV	If additional capacity, resource and support are not provided for the Respiratory Consultant Pharmacist, then it may result in widespread delays with patient diagnosis or treatment, leading to potential for patient harm.	16	8
3181	RRCV	If the Prescribing Administration and Monitoring of Oxygen in Adults (B27/2010) Policy is to be adhered to, Then the e-obs system settings must be adjustable for Cardio-Respiratory patients, Resulting in in improved patient care or chronic hypoxic conditions and for patients who do not have Type 2 respiratory failure.	16	6
3040	RRCV	If there are insufficient medical trainees in Cardiology, then there may be an imbalance between service and education demands resulting in the inability to cover rotas and deliver safe, high quality patient care.	16	9
3297	RRCV	If there is no improvement in the number of cardiac surgery admin staff, and staff with the right admin skills, caused by long term and continued episodic sickness absence, then cardiac patients may experience delay in diagnosis or treatment resulting in potential harm to patients, service disruption, adverse reputation and financial loss.	16	9
2820	RRCV	If a timely VTE risk assessments is not undertaken on admission to CDU, then we will be breach of NICE CCG92 guidelines resulting patients being placed at risk of harm.	16	3
3233	RRCV	If VSU diagnostic ultrasound images and reports are not made available on the UHL PACS & CRIS systems Then patients are at an increased likelihood of potential harm due to the difficulties associated with not being able to access the relevant patient VSU diagnostic ultrasound images and reports, with associated quality & safety assurance risks for staff and the Trust.	16 ← 12	1
3198	ESM	If there is a Failure to administer insulin safely and monitor blood glucose levels accurately, in accordance with any prescriber's instructions and at suitable times then this may lead to patients not having their diabetes appropriately monitored/managed resulting in a risk of prolonged length of stay, severe harm	16	4
3203	ESM	If Dermatology is not adequately resourced, then we will be unable to provide high quality and timely care to our patients and recruitment of staff will be affected, resulting in threat of not meeting RTT and skin cancer targets.	16	4
3025	ESM	If there continues to be high levels of qualified nursing vacancies and issue with nursing skill mix across Emergency Medicine, then quality and safety of patient care could be compromised.	16	4
3121	ITAPS	If operating theatres' ventilation systems fail due to lack of maintenance, then the affected theatres cannot be used to provide patient care resulting in reduced theatre capacity and pressure on other theatres to meet demand and may lead to patient cancellations	16	9
2191	MSS	If workforce constraints within the ophthalmology service are not addressed, then backlogs and delays could result in serious patient harm - Elapsed	16	8
2989 2955	MSS CSI	If we do not recruit into the T&O Wards nursing vacancies, then patient safety and quality of care will be placed at risk If system faults attributed to EMRAD are not expediently resolved, then we will continue to expose patients to the risk of harm	16 16	4 4

Risk ID	D CMG Risk Description		Current Risk Score	Target Risk Score	
3205	CSI	If the breast screening round length is not reduced, caused by a multitude of factors including workforce gaps, implementation of new PACS EMRAD, lack of unit space and unplanned equipment downtime, then the PHE performance indicator may not be met leading to delays with patients three yearly breast screening appointments impacting early cancer diagnosis - Elapsed			
3320	CSI	NEW: If we are unsuccessful in controlling expenditure, finding additional efficiency savings over and above the Trust set target and maximising income within CSI CMG then the CMG is at risk of failing to achieve the breakeven financial target of breakeven.	16	4	
3129	CSI	If a 100% traceability (end fate) of blood components is not determined Then BSQR 2005 legal requirement of 100% traceability will not be met Resulting in legal implications and delay in providing blood and blood components	16	4	
3206	CSI	If staff are not appropriately trained on the usage of POC medical device equipment then this may lead to improper use that may result in inaccurate diagnostic test results affecting patient care and leading to potential harm to the patient.	16	6	
3286	CSI	If continual failure in meeting key performance indicators for urgent blood cancer diagnostic testing, caused by limited Consultant Immunologist availability then this will result in delayed diagnosis and treatment of acute leukaemia patients and withdrawal of weekend standby service	16	6	
3008	W&C	If the paediatric retrieval and repatriation teams are delayed mobilising to critically ill children due to inadequately commissioned & funded provision of a dedicated ambulance service, then this will result in failure to meet NHS England standards, delayed care, potential harm and inability to free-up PICU capacity.	16	5	
2153	W&C	If the high number of vacancies of qualified nurses working in the Children's Hospital is not addressed, then there will be a shortfall in the nurse to patient ratio which could impact on the quality of patient care	16	8	
3201	Comms	If the Mac desktop computers fail/break down or the shared server fails, then there is a loss of service to the Trust because photographers and/or graphics are unable to do their job and potential loss of work products that are saved/stored on there.	16	2	
2237	Corporate	If a standardised process for requesting and reporting inpatient and outpatient diagnostic tests is not implemented, then the timely review of diagnostic	16	8	
3138	Medical Estates & Facilities	tests will not occur. If there are insufficient management controls in place to meet Regulation 4 of the Control of Asbestos Regulations (CAR), then there is an increased risk of enforcement action by the HSE, resulting in prosecution, and/or significant financial impact and reputational damage.	16	4	
3140	Estates & Facilities	If sufficient downtime' for Planned Preventative Maintenance and corrective maintenance is not scheduled into the theatre annual programmes, then functional defects will emerge and evolve in specialist ventilation systems, resulting in potential risk of microbiological contamination in the theatre environment.	16	8	
3141	Estates & Facilities	If the integrity of fire compartmentation is compromised, then during a real fire event the rate of fire and/or smoke spread will accelerate through the building limiting the ability to utilise horizontal and/or vertical evacuation methods, resulting in potential life safety concerns and loss of areas / beds / services.n	16	8	
3143	Estates & Facilities	If sufficient capital funding is not committed to reduce backlog maintenance across the estate there will be an increasing risk of key/critical failures in buildings, building services and infrastructure impacting on service provision and patient care.	16	6	
3144	Estates & Facilities	if Estates & Facilities are unable to recruit and retain staff, or fund posts to deliver services to meet the Trust's expectations, then there is a risk of a service delays and interruption/failure to achieve required standards, resulting in adverse impacts to patient non-clinical services, environment, equipment and infrastructure.	16	9	
3145	Estates & Facilities	If there is not a significant investment to upgrade electrical infrastructure across the UHL, then there will be an increased risk of a loss of 'normal' electrical supply and potential failures in generator stand-by electrical supply leading to interruption to patient care, key electrical equipment breakdown, and provision of normal patient care and support services resulting in adverse impacts to patient care and non-clinical services.	16	6	
3137	Estates & Facilities	If calls made to the Switchboard via '2222' are not recorded, then there is a risk that vital/critical information passed verbally between caller and call handler cannot be verify if the emergency response is not appropriate for the reported situation.	16	4	
3191	IM&T	If the Trust is unable to demonstrate 95% compliance with IG training, then the Trust may lose level 2 IG accreditation, resulting in potential loss of research status and difficulties with forging future collaborative working arrangements with prospective business partners which could adversely impact on the delivering strategic aims.	16	12	
3180	IM&T	If fragility in the underlying UHL IM&T infrastructure is not addressed, then there may be limited or no access to Trust IM&T critical systems, resulting in service disruption and impacting provision of care	16	6	
3155	IM&T	If the PABX system falls then the telephone system will not work for a range of telephone numbers resulting in significant service disruption and potential patient harm — Elapsed	16	4	
2621	CHUGGS	If recruitment and retention to vacancies on Ward 22 at the LRI does not occur, then patients may be exposed to harm due to poor skill mix on the Ward.	15	6	
3312	RRCV	NEW: If recurrent funding is not provided to retain the 2 nursing posts (B6 and B3) for the LTBI programme current services then it may have to be withdrawn.	15	1	
3047	RRCV	If the service provisions for vascular access at GH are not adequately resourced to meet demands, then patients will experience significant delays for a	15	6	
3211	RRCV	PICC resulting in potential harm. If Additional appropriately trained sedationists are not provided in Angiocatheter suite. Then Patients undergoing cardiology procedures may receive an	15	8	
2837	ESM	inadequate level of monitoring during conscious sedation. If migration to an automated results monitoring system is not introduced, Then follow-up actions for patients with multiple sclerosis maybe delayed resulting	15	2	
3317	CSI	in potential harm. If breast care services are unable to consistently deliver the 2WW demand, due to high volumes of vacancies, lack of equipment and adequate space to house the service, then patients may experience delayed appointment time and treatment, resulting in harm - Elapsed	15	9	
2615	CSI	Integrity and capacity of containment level 3 laboratory facility in Clinical Microbiology	15	2	
2973	CSI	If the service delivery model for Adult Gastroenterology Medicine patients is not appropriately resourced, then the quality of care provided by nutrition and dietetic service will be suboptimal resulting in potential harm to patients.	15	6	
3262	CSI	If the pressure on the Cellular Pathology Urology service caused by the continuing increase in cases from external sources is not effectively matched with appropriate resources then the service will become unsustainable potentially leading to reporting errors and impacting on patient safety.	15	3	
2965	CSI	If we do not address Windsor pharmacy storage demands, then we may compromise clinical care and breach statutory duties	15	6	
3288	CSI	NEW: If no additional storage space can be identified in UHL pharmacy to stock essential filtration fluids, caused by robot rebuild starting summer 2018, then patients that clinically require Continuous Renal Replacement Therapy may experience delayed treatment or diagnosis, resulting in potential for suboptimal therapy, significant irreversible harm and increased LOS to AICU patient population	15	5	
3093	W&C	If there is insufficient Midwifery establishment to achieve the recommended Midwife to Birth ratio, in view of increased clinical acuity, then patient care may be delayed resulting in potential increase in maternal and fetal morbidity and mortality rates	15	6	
3023 3083	W&C W&C	There is a risk that the split site Maternity configuration leads to impaired quality of Maternity services at the LGH site When gaps on the Junior Doctor rota reach a critical level there are not enough Junior Doctors to staff the Neonatal Units at both the LRI and LGH; resulting in a substantial risk to patient care, quality of service and reputation to the unit and Trust. The number of gaps will vary but for July 2018 are at a critical level.	15 15 ← 20	6 3	
3084	W&C	critical level. Due to the current split site Consultant cover of the Neonatal Units at the LRI and LGH; there is a risk to patient care, quality of service and reputation to the unit and Trust. This may also result in the withdrawal of the neonatal service from the LGH site impacting significantly the Maternity Service.	15	5	
2394	Comms	If a service agreement to support the image storage software used for Clinical Photography is not in place, then we will not be able access clinical images in the event of a system failure.	15	3	

Risk ID	CMG	Risk Description		Target Risk Score
3079	Corporate Medical	If there is insufficient capacity with the administrative support for the Learning from Deaths Framework and the Specialty M&M Structured Judgment Review process which is not addressed and substantive funding is not identified for an additional Bereavement Support Nurses, then this will lead to a delay with screening all deaths, undertaking Structured Judgment Reviews, and speaking to bereaved relatives, resulting in failure to learn from deaths in a timely manner and non-compliance with the internal QC and external NHS England and Statutory Quality Account requirement	15	6
3172	IM&T	If systems and services provided by IM&T are not continuously maintained to ISO accredited standard, then our systems may be vulnerable to potential cyber attack resulting in in significant service disruption, harm to patients and financial loss	15	15
2434	IM&T	If computers operating on Windows XP are not upgraded, then we may experience significant service disruptions	15	6
1615	IM&T	If flooding occurs at the LRI, then the Servers and Network equipments in our Data Centre may become damaged resulting in Trust-wide service disruption and potential harm to patients.	15	6
3289	Operations	If the Trust fails to improve its emergency preparedness, resilience and response (EPRR) arrangements, caused by a lack of appropriate time and resources to develop them, then there is a risk that the Trust is not adequately prepared to respond to a business continuity, critical or major incident.	15	6
