

# Quality & Performance Report

Author: John Adler Sponsor: Chief Executive Date: PPPC + QOC 28<sup>th</sup> March 2019

## Executive Summary from CEO

### Context

It has been agreed that I will provide a summary of the issues within the Q&P Report that I feel should particularly be brought to the attention of EPB, PPPC and QOC. This complements the Exception Reports which are triggered automatically when identified thresholds are met.

### Questions

1. What are the issues that I wish to draw to the attention of the committee?
2. Is the action being taken/planned sufficient to address the issues identified? If not, what further action should be taken?

### Conclusion

**Good News:** **Mortality** – the latest published SHMI (period October 2017 to September 2018) is 99, slightly higher than previous SHMI however remains below expected. **Diagnostic 6 week wait** – standard achieved for 6 consecutive months. **52+ weeks wait** – has been compliant for 8 consecutive months. **Referral to Treatment** – our performance was below national standard however we achieved NHSI trajectory (which is the key performance measure for 18/19). **Delayed transfers of care** - remain within the tolerance. However, there are a range of other delays that do not appear in the count. **12 hour trolley wait** was 0 in February. **C DIFF** – was below threshold this month. **Pressure Ulcers** - 0 Grade 4 and 1 Grade 3 reported during February. **CAS alerts** – was compliant in February. **Inpatient and Day Case Patient Satisfaction (FFT)** achieved the Quality Commitment of 97%. **Fractured NOF** – remains compliant for the 7<sup>th</sup> consecutive month. **Cancelled operations and Patients rebooked within 28 days** – we continue to show improvement with our elective cancellations. **90% of Stay on a Stroke Unit** – 84.2% reported in January. **Annual Appraisal** is at 92.6% (rising trend).

**Bad News:** **UHL ED 4 hour performance** – was 76.1% for February, system performance (including LLR UCCs) was 82.6%. Further detail is in the Urgent Care report. **Ambulance Handover 60+ minutes (CAD+)** – performance at 4%. **MRSA** – 1 case reported this month. **Grade 2** was above threshold for the month. **Single Sex Accommodation Breaches** – 5 reported in February. **Moderate harms and above** – January (reported 1 month in arrears) was above threshold. **Cancer Two Week Wait** was 88.6% in January. **Cancer 31 day treatment** was 91.4% in January. **Cancer Symptomatic Breast** was 64.5% in January. **Cancer 62 day treatment** was not achieved in January – further detail of recovery actions in is the cancer recovery report. **Statutory and Mandatory Training** reported from HELM is at 89%. **TIA (high risk patients)** – 57.5% reported in February.

## Input Sought

I recommend that the Committee:

- Commends the positive achievements noted under Good News
- Note the areas of Bad News and consider if the actions being taken are sufficient.

## For Reference

Edit as appropriate:

1. The following **objectives** were considered when preparing this report:

Safe, high quality, patient centred healthcare	[Yes /No /Not applicable]
Effective, integrated emergency care	[Yes /No /Not applicable]
Consistently meeting national access standards	[Yes /No /Not applicable]
Integrated care in partnership with others	[Yes /No /Not applicable]
Enhanced delivery in research, innovation & ed'	[Yes /No /Not applicable]
A caring, professional, engaged workforce	[Yes /No /Not applicable]
Clinically sustainable services with excellent facilities	[Yes /No /Not applicable]
Financially sustainable NHS organisation	[Yes /No /Not applicable]
Enabled by excellent IM&T	[Yes /No /Not applicable]

2. This matter relates to the following **governance** initiatives:

Organisational Risk Register	[Yes /No /Not applicable]
Board Assurance Framework	[Yes /No /Not applicable]

3. Related **Patient and Public Involvement** actions taken, or to be taken: Not Applicable

4. Results of any **Equality Impact Assessment**, relating to this matter: Not Applicable

5. Scheduled date for the **next paper** on this topic: 25<sup>th</sup> April 2019

*Caring at its best*

**REPORT TO:** INTEGRATED FINANCE, PERFORMANCE AND INVESTMENT COMMITTEE  
QUALITY AND OUTCOMES COMMITTEE

**DATE:** 28<sup>th</sup> MARCH 2019

**REPORT BY:** ANDREW FURLONG, MEDICAL DIRECTOR  
REBECCA BROWN, CHIEF OPERATING OFFICER  
CAROLYN FOX, CHIEF NURSE  
HAZEL WYTON, DIRECTOR OF PEOPLE AND ORGANISATIONAL DEVELOPMENT  
DARRYN KERR, DIRECTOR OF ESTATES AND FACILITIES

**SUBJECT:** FEBRUARY 2019 QUALITY & PERFORMANCE SUMMARY REPORT

## **1.0 Introduction**

The following report provides an overview of performance for NHS Improvement (NHSI) and UHL key quality commitment/performance metrics. Escalation reports are included where applicable. The NHSI have recently published the 'Single Oversight Framework' which sets out NHSI's approach to overseeing both NHS Trusts and NHS Foundation Trusts and shaping the support that NHSI provide.

The NHS Single Oversight Framework sets out NHS Improvement's approach to overseeing and supporting NHS trusts and NHS foundation trusts under the Single Oversight Framework (SOF). It explains what the SOF is, how it is applied and how it relates to NHS Improvement's duties and strategic priorities.

The document helps providers to understand how NHS Improvement is monitoring their performance; how NHSI identify any support providers need to improve standards and outcomes; and how NHSI co-ordinate agreed support packages where relevant. It summarises the data and metrics regularly collected and reviewed for all providers, and the specific factors that will trigger more detailed investigation into a trust's performance and support needs.

NHSI have also made a small number of changes to the information and metrics used to assess providers' performance under each theme, and the indicators that trigger consideration of a potential support need. These updates reflect changes in national policy and standards, other regulatory frameworks and the quality of performance data, to ensure that the oversight activities are consistent and aligned.

## **2.0 Changes to Indicators/Thresholds**

# Summary Scorecard – YTD

The following table shows the Trust's current performance against the headline indicators within the Trust Summary Scorecard.

SAFE	CARING	WELL LED	EFFECTIVE	RESPONSIVE
Moderate Harm	FFT Inpatients & Daycase	Turnover Rate	Mortality (SHMI)	ED 4hr Wait UHL
Never Event	FFT A&E	Sickness Absence	Crude Mortality	ED 4hr Wait UHL+LLR UCC
Clostridium Difficile	FFT Outpatients	Annual Appraisal	#NOF's <36hrs	12hr Trolley Waits
MRSA Avoidable	FTT Maternity	Statutory & Mandatory Training	Stroke – 90% Stay	RTT Incompletes
Serious Incidents	Single Sex Breaches		TIA	RTT 52 Weeks Wait
Pressure Ulcers Grade 4			Readmissions <30 days	Diagnostic Waits
Pressure Ulcers Grade 3				DTOC
Pressure Ulcers Grade 2				Handover >60
Falls				Cancelled Ops
				Cancer 31 Day
				Cancer 62 Day

## SUCCESSES:

- FFT Inpatient/DC **97%**
- Crude Mortality **2.1%**
- DTOC **1.5%**
- Stroke 90% Stay **84.1%**
- RTT 52 Weeks Wait **0**
- Diagnostic Waits **0.9%**

## ISSUES:

- MRSA Avoidable **2**
- CDIFF **52**
- Never Event **6**
- Single Sex Accommodation Breaches **56**
- ED 4hr Wait UHL **77.2%**
- Cancer 62 Day **75.9%**

# Summary Scorecard – February 2019

The following table shows the Trust's current performance against the headline indicators within the Trust Summary Scorecard. The number of indicators changing RAG (RED, AMBER, GREEN) ratings from the previously reported period is also shown in the box to the right.

SAFE	CARING	WELL LED	EFFECTIVE	RESPONSIVE
Moderate Harm	FFT Inpatients & Daycase	Turnover Rate	Mortality (SHMI)	ED 4hr Wait UHL
Never Event	FFT A&E	Sickness Absence	Crude Mortality	ED 4hr Wait UHL+LLR UCC
Clostridium Difficile	FFT Outpatients	Annual Appraisal	#NOF's <36hrs	12hr Trolley Waits
MRSA Avoidable	FTT Maternity	Statutory & Mandatory Training	Stroke – 90% Stay	RTT Incompletes
Serious Incidents	Single Sex Breaches		Stroke TIA	RTT 52 Weeks Wait
Pressure Ulcers Grade 4			Readmissions <30 days	Diagnostic Waits
Pressure Ulcers Grade 3				DTOC
Pressure Ulcers Grade 2				Handover >60
Falls				Cancelled Ops
				Cancer 31 Day
				Cancer 62 Day

Key changes in indicators in the period:

**SUCCESSES: (Red to Green)**

- Stroke – 90% Stay

**Significant Improvement:**

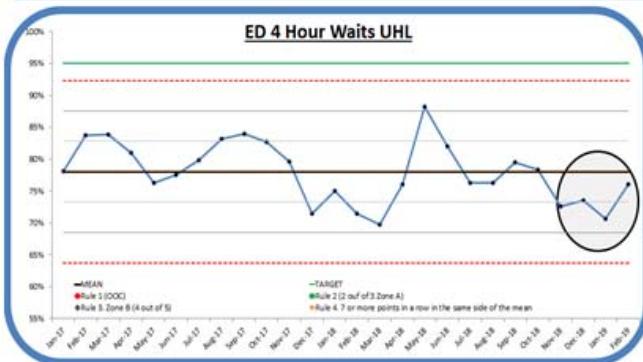

- Annual Appraisal
- RTT Incompletes

**ISSUES: (Green/Amber to Red)**

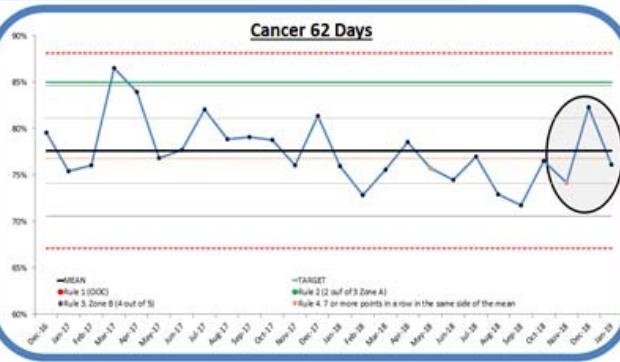

- MRSA
- Stroke TIA
- Cancer 31 Day
- HAPU G2
- Moderate Harm

One team shared values

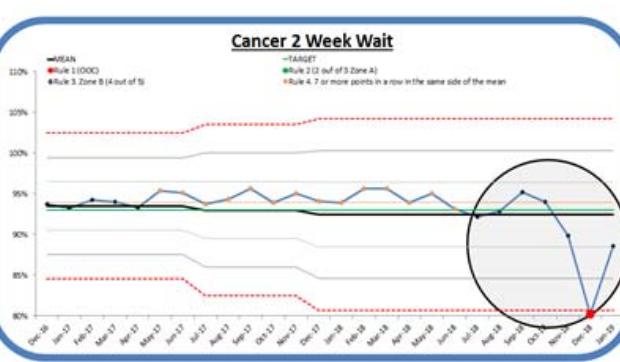

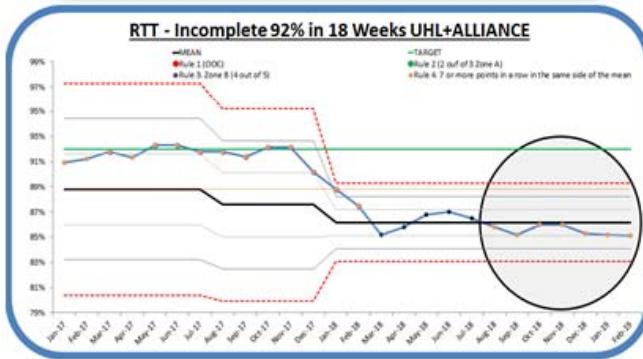

Drop in ED Performance however within expected range of variation.

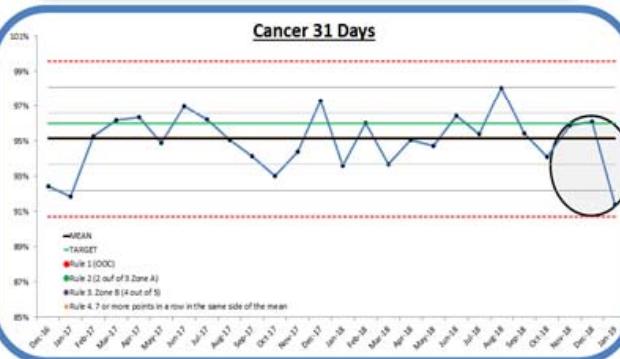

Cancer 62 days performance is trending upwards. Prior to December, the last 7 months fell below the mean.

Downward trend in performance. Performance in December fell outside the control limit.

Downward trend in RTT over last 12 months.

Cancer 31 days performance deteriorated this month.

No appreciable trend.

# Rules	Interpretation
1	A single point outside the control limits
2	Two of three points outside the two sigma limit
3	Four of Five points outside the one sigma limit
4	Seven or more points in a row on the same side of centerline

Points falling outside the control limits may be the result of a special cause that was corrected quickly, either intentionally or unintentionally. It may also point to an intermittent problem. If two out of three consecutive points on the same side of the average lie beyond the 2-sigma limits, the system is said to be unstable. When four out of five consecutive points lie beyond the 1-sigma limit on one side of the average, the system is declared unstable. When Seven or more points in a row lie on the same side of mean – this is indicative of a trend.

If data points drifts upward/downwards even though there is no group of seven points in a row going up/down. This pattern indicates a gradual change over time in the characteristic being measured.

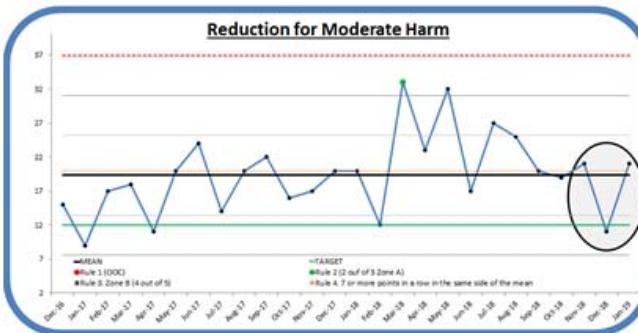

- TARGET
- ... MEDIAN
- Rule 1 (OOC)
- Rule 2 (2 out of 3 Zone A)
- Rule 3. Zone B (4 out of 5) UCL
- Rule 4. 7 or more points in a row in the same side of the mean

Emerging upward trend in performance however remains within threshold.

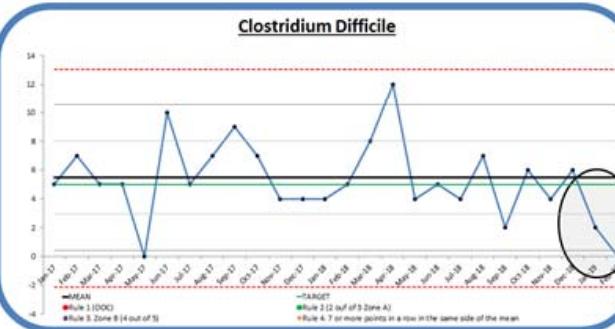

Emerging (deteriorating) trend in handover performance over last 6 months.

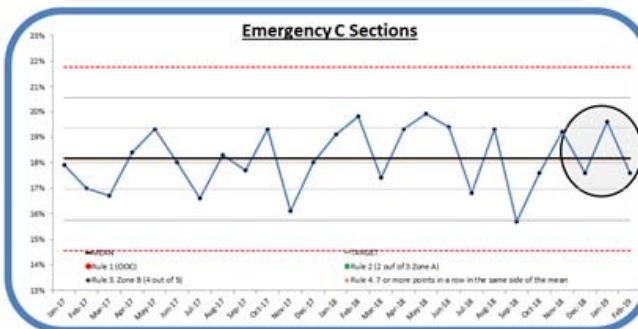

Emerging (downward) trend in moderate harm over last 9 months. December's position was within threshold.

Significant improvement (rising trend). Performance for the last 4 months were above the threshold.

Downward trend in C DIFF cases.

No appreciable change in performance.

# Rules	Interpretation
1	A single point outside the control limits
2	Two or three points outside the two sigma limit
3	Four or Five points outside the one sigma limit
4	Seven or more points in a row on the same side of centerline

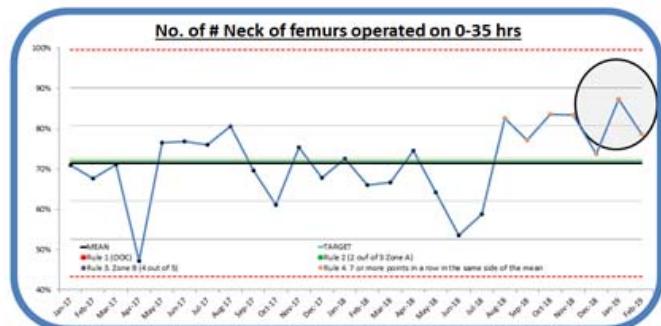

Points falling outside the control limits may be the result of a special cause that was corrected quickly, either intentionally or unintentionally. It may also point to an intermittent problem. If two out of three consecutive points on the same side of the average lie beyond the 2-sigma limits, the system is said to be unstable. When four out of five consecutive points lie beyond the 1-sigma limit on one side of the average, the system is declared unstable. When Seven or more points in a row lie on the same side of mean – this is indicative of a trend.

If data points drifts upward/downwards even though there is no group of seven points in a row going up/down. This pattern indicates a gradual change over time in the characteristic being measured.

**Legend:**

- TARGET
- ... MEDIAN
- Rule 1 (OOC)
- Rule 3. Zone B (4 out of 5) UCL
- Rule 2 (2 out of 3 Zone A)
- Rule 4. 7 or more points in a row in the same side of the mean

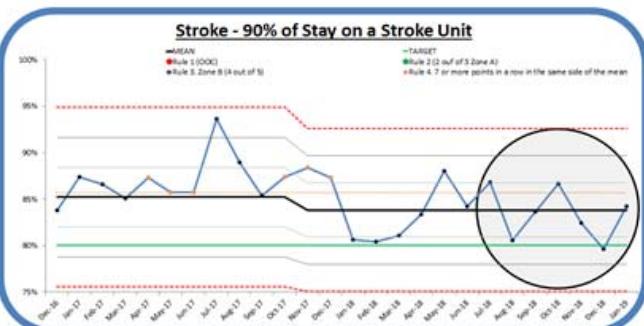

# SPC Analysis

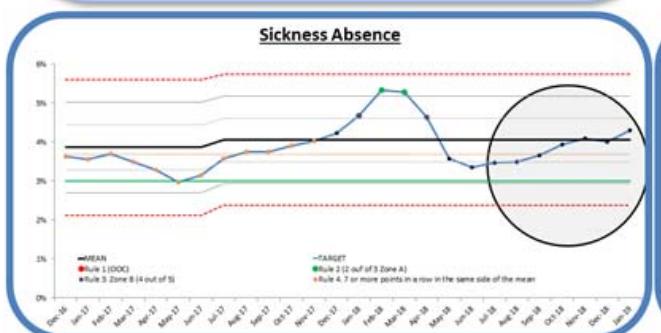

Upward trend in performance with significant improvement in the last 7 months.

Intermittent/irregular pattern in performance for Stroke TIA.

Emerging downward trend in performance however remains within threshold.

Upward trend in sickness rate as performance deteriorated and remains above the mean for the last 4 months.

Upwards trend in appraisal rate.

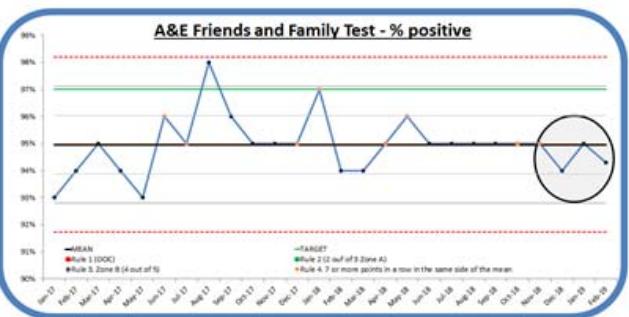

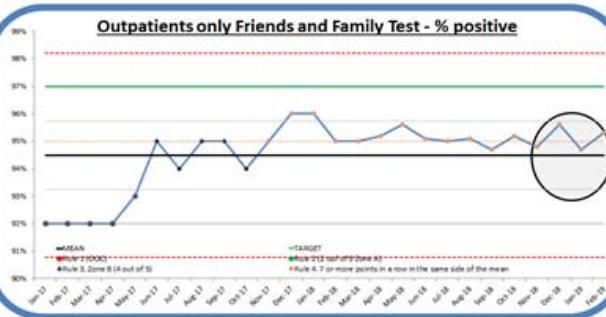

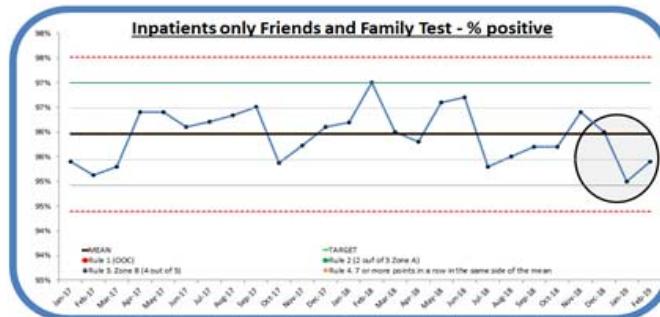

Single sex breaches trending downwards however variation over time remains high.

# Rules	Interpretation
1	A single point outside the control limits
2	Two of three points outside the two sigma limit
3	Four of Five points outside the one sigma limit
4	Seven or more points in a row on the same side of centerline

**Interpretation**  
Points falling outside the control limits may be the result of a special cause that was corrected quickly, either intentionally or unintentionally. It may also point to an intermittent problem.  
If two out of three consecutive points on the same side of the average lie beyond the 2-sigma limits, the system is said to be unstable.  
When four out of five consecutive points lie beyond the 1-sigma limit on one side of the average, the system is declared unstable.  
When Seven or more points in a row lie on the same side of mean – this is indicative of a trend.  
  
If data points drifts upward/downwards even though there is no group of seven points in a row going up/down. This pattern indicates a gradual change over time in the characteristic being measured.

**TARGET**  
● Rule 1 (OOC)  
● Rule 3. Zone B (4 out of 5) UCL

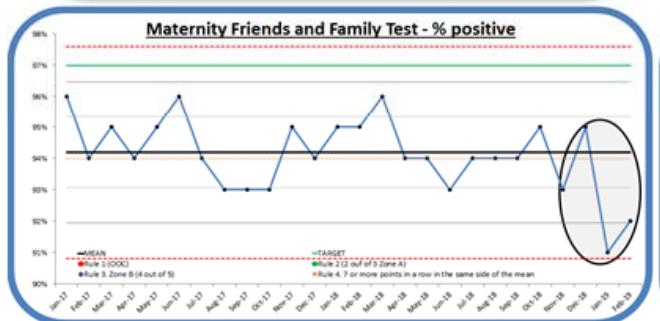

**MEDIAN**  
● Rule 2 (2 out of 3 Zone A)  
● Rule 4. 7 or more points in a row in the same side of the mean

Performance deteriorated over last 3 months.

Upwards trend in outpatient FFT.

Deterioration in ED FTT but remains within expected levels of variation.

Sharp drop in Maternity FFT performance over the last 2 months.

Performance remains static over the last 3 months.

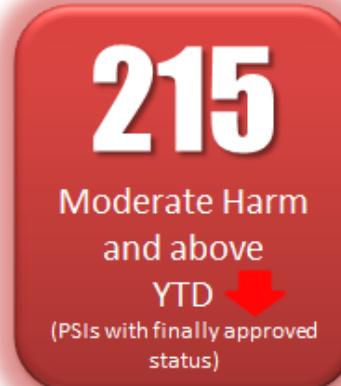

Downward trend in performance.

# Rules	Interpretation
1	A single point outside the control limits
2	Two or three points outside the two sigma limit
3	Four of Five points outside the one sigma limit
4	Seven or more points in a row on the same side of centerline

Points falling outside the control limits may be the result of a special cause that was corrected quickly, either intentionally or unintentionally. It may also point to an intermittent problem. If two out of three consecutive points on the same side of the average lie beyond the 2-sigma limits, the system is said to be unstable. When four out of five consecutive points lie beyond the 1-sigma limit on one side of the average, the system is declared unstable. When Seven or more points in a row lie on the same side of mean – this is indicative of a trend. If data points drifts upward/downwards even though there is no group of seven points in a row going up/down. This pattern indicates a gradual change over time in the characteristic being measured.

- Rule 3. Zone B (4 out of 5) UCL
- Rule 4. 7 or more points in a row in the same side of the mean

Arrows represent current month performance against previous month, upward arrow represents improvement; downward arrow represents deterioration.

## SUCCESSES

- Data for 2018/19 reflects strong performance against all EWS & sepsis indicators. Our focus for 2018/19 will be to maintain this position.
- Serious Incidents was within threshold for February.
- 0 cases of CDIFF this month.
- 0 Never events reported in February.

## ISSUES

- The EWS indicators are still on hold at present.
- Falls was above threshold this month.
- 1 MRSA reported this month.
- Moderate harms and above – above threshold.

## ACTIONS

- Escalation through CMG infection prevention meeting.
- Targeted education and training.
- Urgent reviews of risk register entry for the ITU environment at LRI.
- The EWS twice daily audit has stopped so we are currently reviewing how we report on these metrics going forward.

## SEPSIS

Patients with an Early Warning Score 3+ - % appropriate escalation

98%

Patients with EWS 3+ - % who are screened for sepsis

95%

ED - Patients who trigger with red flag sepsis - % that have their IV antibiotics within an hour

84%

Wards (including assessment units) Patients who trigger for Red Flag Sepsis - % that receive their antibiotics within an hour

83%

Arrows represent current month performance against previous month, upward arrow represents improvement, downward arrow represents deterioration.

## Friends and Family Test YTD % Positive

- Inpatients FFT **96%** ↑
- Day Case FFT **98%** ↓
- A&E FFT **95%** ↓
- Maternity FFT **94%** ↑
- Outpatients FFT **95%** ↑

## Staff FFT Quarter 3 2018/19 (Pulse Check)

**65.0%** of staff would recommend UHL as a place to receive treatment

### SUCCESSES

- Friends and family test (FFT) for Inpatient and Daycase care combined was 97% for February.

### ISSUES

- Single Sex Accommodation Breaches – 5 reported in February.
- Friends and family test (FFT) for maternity was 92% for February.

### ACTIONS

- Continue to ensure clear communication at GOLD Command to support staff in decision making at times of reduced capacity
- Discussions with commissioners to explore the same sex compliance requirements in Discharge Lounge facilities

## Single Sex Accommodation Breaches

# Domain – Well Led

Arrows represent current month performance against previous month, upward arrow represents improvement, downward arrow represents deterioration.

## Friends and Family FFT YTD % Coverage

Inpatients FFT **29.1%** ↑  
Day Case FFT **23.4%** ↑  
A&E FFT **8.1%** ↓  
Maternity FFT **39.8%** ↑  
Outpatients FFT **5.4%** ↑

### SUCCESSES

- Corporate Induction attendance for February was 98%.
- Significant improvement in appraisals at 92.6% (this excludes facilities staff that were transferred over from Interserve).

### ISSUES

- Statutory & Mandatory Training performance at 89%.

### ACTIONS

- Please see the HR update for more information.
- Whilst our scores remain high, we continue to try and increase our coverage.

## Staff FFT Quarter 3 2018/19 (Pulse Check)

**60.0%** of staff would recommend UHL as a place to work

consultants

# Domain – Effective

Arrows represent current month performance against previous month, upward arrow represents improvement, downward arrow represents deterioration.

## Mortality – Published SHMI

### Emergency Crude Mortality Rate

## Stroke TIA Clinic within 24hrs

### 30 Days Emergency Readmissions

## 80% of Patients Spending 90% Stay on Stoke Unit

### NoFs Operated on 0-35hrs

#### SUCCESSES

- Latest UHL's SHMI is 99. A recent in depth HED review of UHL mortality did not identify any additional areas of mortality by condition which needed action that we did not already have reviews or action plans in place for.
- Emergency Crude Mortality Rate for February was 2.4%.
- Fractured NoF for February was 78.7%.
- 90% of Stay on a Stroke Unit for January was 84.2%

#### ISSUES

- 30 Days Emergency Readmissions for January was 8.8%.
- Stroke TIA Clinic within 24 Hours for this month was 57.5%.

#### ACTIONS

- Meeting with REDs team to ensure turnaround of theatre equipment in a timely manner.
- Additional sessions sourced when able.
- Pilot in CDU of Integrated Clinical Response Team following up all discharged patients by telephone.
- Integrated Discharge Team to build into their Standard Operating Procedures how to deal with patients at high risk of readmission using the PARR30 score.

# Domain – Responsive

Arrows represent current month performance against previous month, upward arrow represents improvement, downward arrow represents deterioration.

## RTT - Incomplete

**92% in 18 Weeks**

**85.1%**

As at Feb

## RTT 52 week wait incompletes

**0**

As at Feb

**77.2%**

YTD

A&E

**83.3%**

YTD

## Cancelled Operations UHL

## ED 4Hr Waits UHL

## ED 4Hr Waits UHL+LLR

UCC

## Ambulance Handovers

**4%** > 60mins

**8%** 30-60mins

YTD

## **SUCCESSES**

- 0 Trolley breaches for February.
- DTOC was 1.5% for February.
- 0 patient waiting over 52+ weeks.
- Diagnostic 6 week wait standard achieved this month.
- RTT waiting list size trajectory achieved with circa 50 fewer patients on the waiting list than planned.

## **ISSUES**

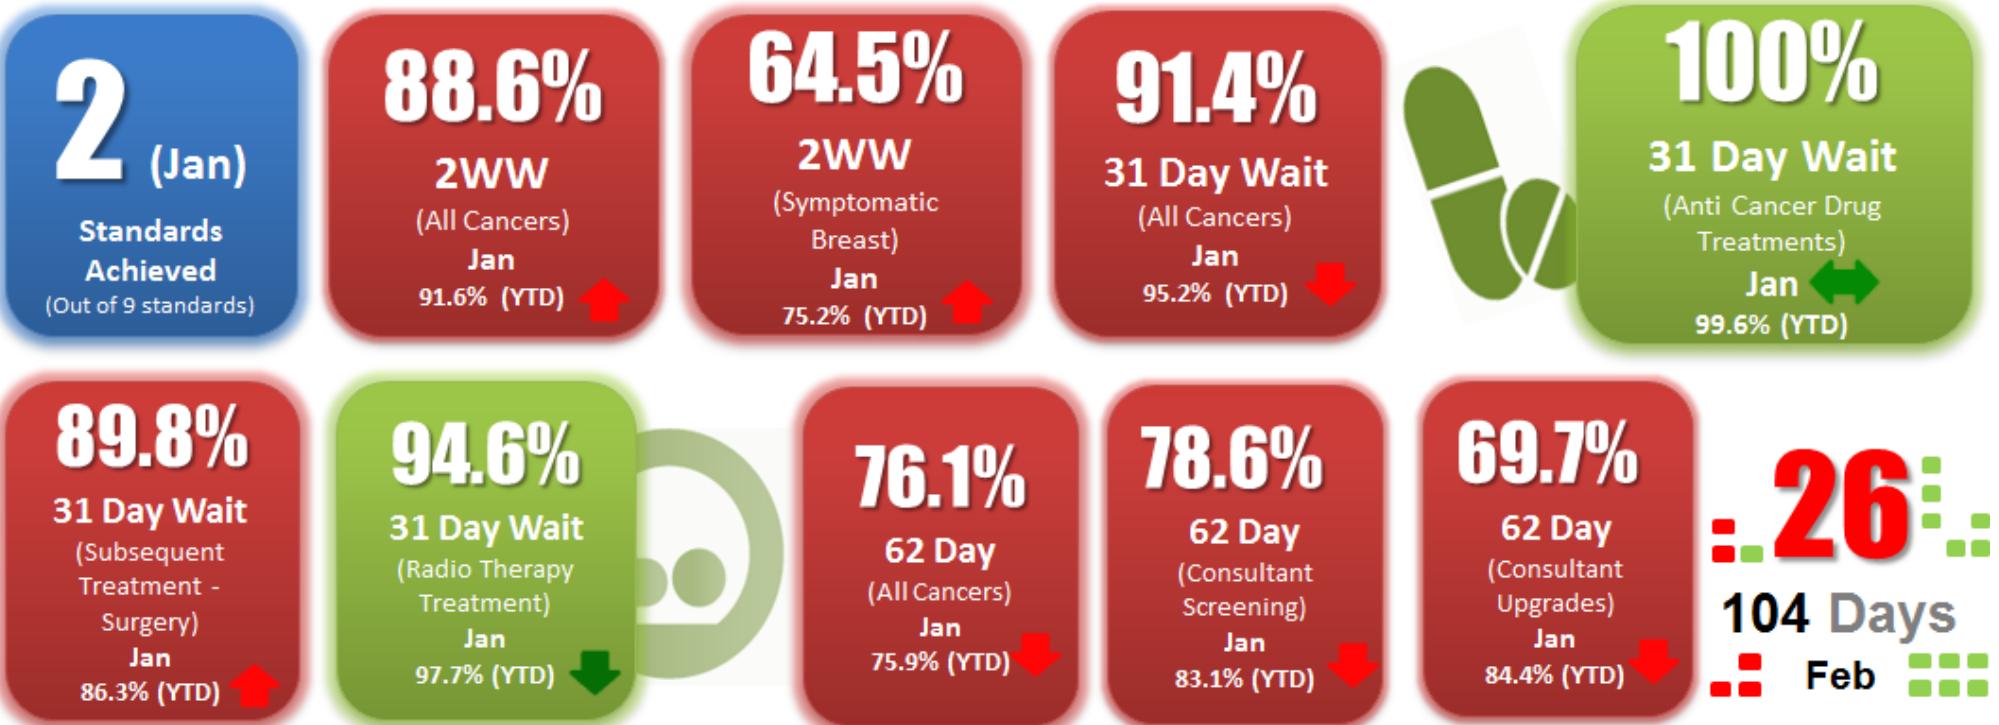

- ED 4Hr Waits UHL – February performance was 76.1%. LLR performance was 82.6% against a trajectory of 90%.
- Cancelled operations – performance was 1.2% this month.

## **ACTIONS**

- For ED 4hour wait and Ambulance Handovers please refer to Urgent Care Report.
- Significant additional imaging capacity has been put in please see detailed diagnostic report

# Cancer – Performance Summary

Arrows represent YTD Trend, upward arrow represents improvement, downward arrow represents deterioration.

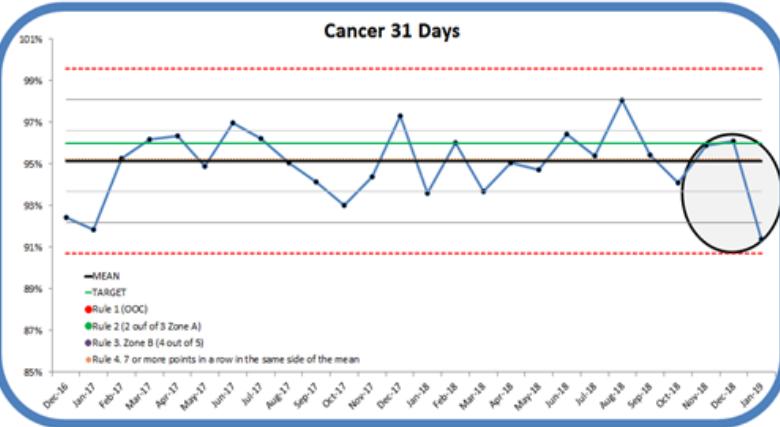

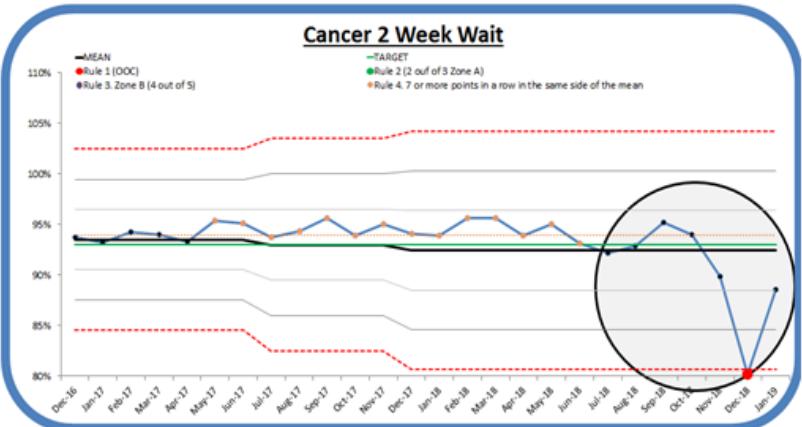

## Highlights

- Out of the 9 standards, UHL achieved 2 in January – 31 Day Anti Cancer Drug, and 31 Day Radiotherapy.
- 62 Day performance in January was 76.1% - 6.2% deterioration from December. Of the 15 tumour groups, 7 delivered the standard (Brain, Breast, Children's, Head & Neck, Skin, Testicular & Rares).
- Backlog – increased in January with Urology making up 45% of our total backlog.
- Urology, although remains within expected levels of variation, continue to be the biggest concern holding the largest backlog across all standards, specifically noting the long waiters over 104 Days. Late tertiary referrals continue to have a significant impact in this Tumour Site.

# Domain – Responsive Cancer

Arrows represent current month performance against previous month, upward arrow represents improvement, downward arrow represents deterioration.

## 31 Day Backlog

42

Feb 19 ↓

## 62 Day Backlog

99

Feb 19 ↑

### SUCCESSES

- Cancer performance is reported 1 month in arrears.
- 31 day wait drugs was achieved in January.

### ISSUES

- Cancer Two Week Wait was not achieved in December.
- 31 day wait was not achieved in January.
- Cancer 62 day treatment – performance deteriorated in January.
- Increase in backlogs for 31 Day, 62 Day and 104+ Day.
- Increased activity in Breast, Skin, and urology
- Previous Organisational focus on Urgent Care, which has resulted in cancer cancelations.

### ACTIONS

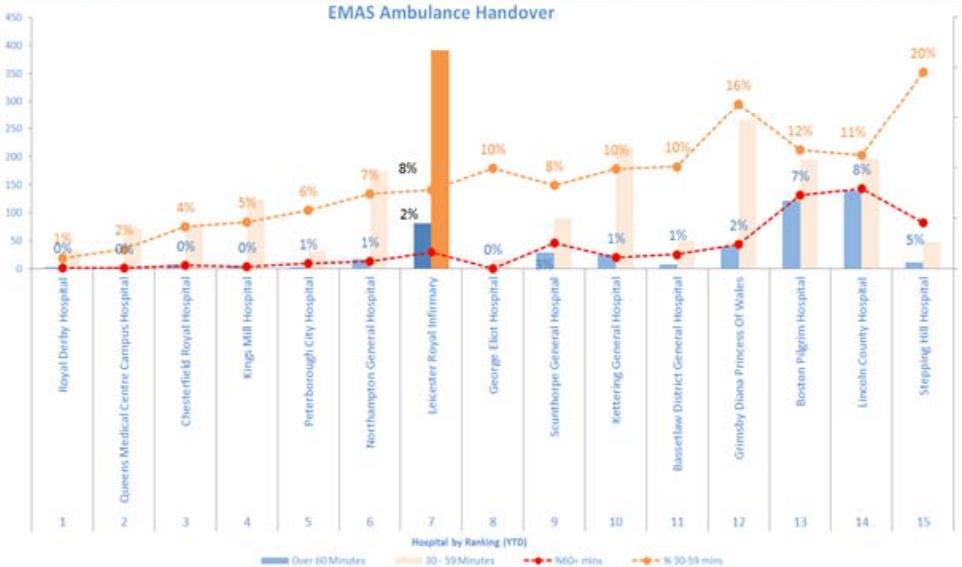

- Working with the clinical teams, the East Midlands Cancer Alliance Expert Clinical Advisory Groups and with the CCG to streamline pathways and ensure flexible capacity throughout the year.
- COO is committed to Cancer as a priority for the organisation. This has been communicated to the organisation.
- We have taken the decision to do less routine elective work to ensure we have beds for Urgent and cancer patients.

## 62 Day Adjusted Backlog

## Highlights

- CAD+ data used in performance analysis (84% coverage of all arrivals at LRI).
- LRI had the highest number of arrivals (via CAD+).
- LRI had the most handovers and highest % within 15mins in the region.
- Feb19 had 4% more handovers compared to the same period last year.
- 52% of handovers were completed within 15 mins - a 15% improvement from Jan19 and 23% better than Feb18 last year.
- 655 hours were lost in Feb19, a 64% decrease from Jan19 and 51% lower than Feb18 last year.
- The equivalent of 54 ambulance shifts (12 hours) lost.

**UHL**

**Alliance**

**Combined**

**M11: WL  
Size  
65,307**

-148 under target

**RTT: 84.3%**

**RTT: 90.1%**

**RTT: 85.1%**

#### **Current Position:**

UHL achieved Februarys RTT waiting list size trajectory, with 148 fewer patients on the waiting list size than planned. The overall RTT position moved to 85.1% which was expected, with an increase of 42 patients waiting over 18 weeks for treatment compared to the end of January. The overall waiting list reduced by 431 since the end of January.

Changes to GP referral patterns including higher number of 2WW transfers has resulted in changed waiting list profile. Whilst referrals patterns remain, the RTT percentage will not improve to 92.0%. UHL will continue to meet the waiting list size targets which is the key measure for this standard during 18/19.

**Forecast performance for next reporting period:** It is forecasted that for March 2019 UHL will achieve the waiting list trajectory size. Risks continue to remain to overall RTT performance:

- Reduced elective capacity due to emergency pressures
- Increased cancer backlogs prioritising capacity over routine elective RTT
- Commissioner request to stop further transfers via IPT to the independent sector

## Current Position:

UHL achieved Month 11's waiting list trajectory size. This continues on the progress made since July as the Trust maintains on target to delivery the 2018/19 planning guidance of a lower waiting list at the end of March 2019 than at the end of March 2018. RTT performance for February was 85.1%.

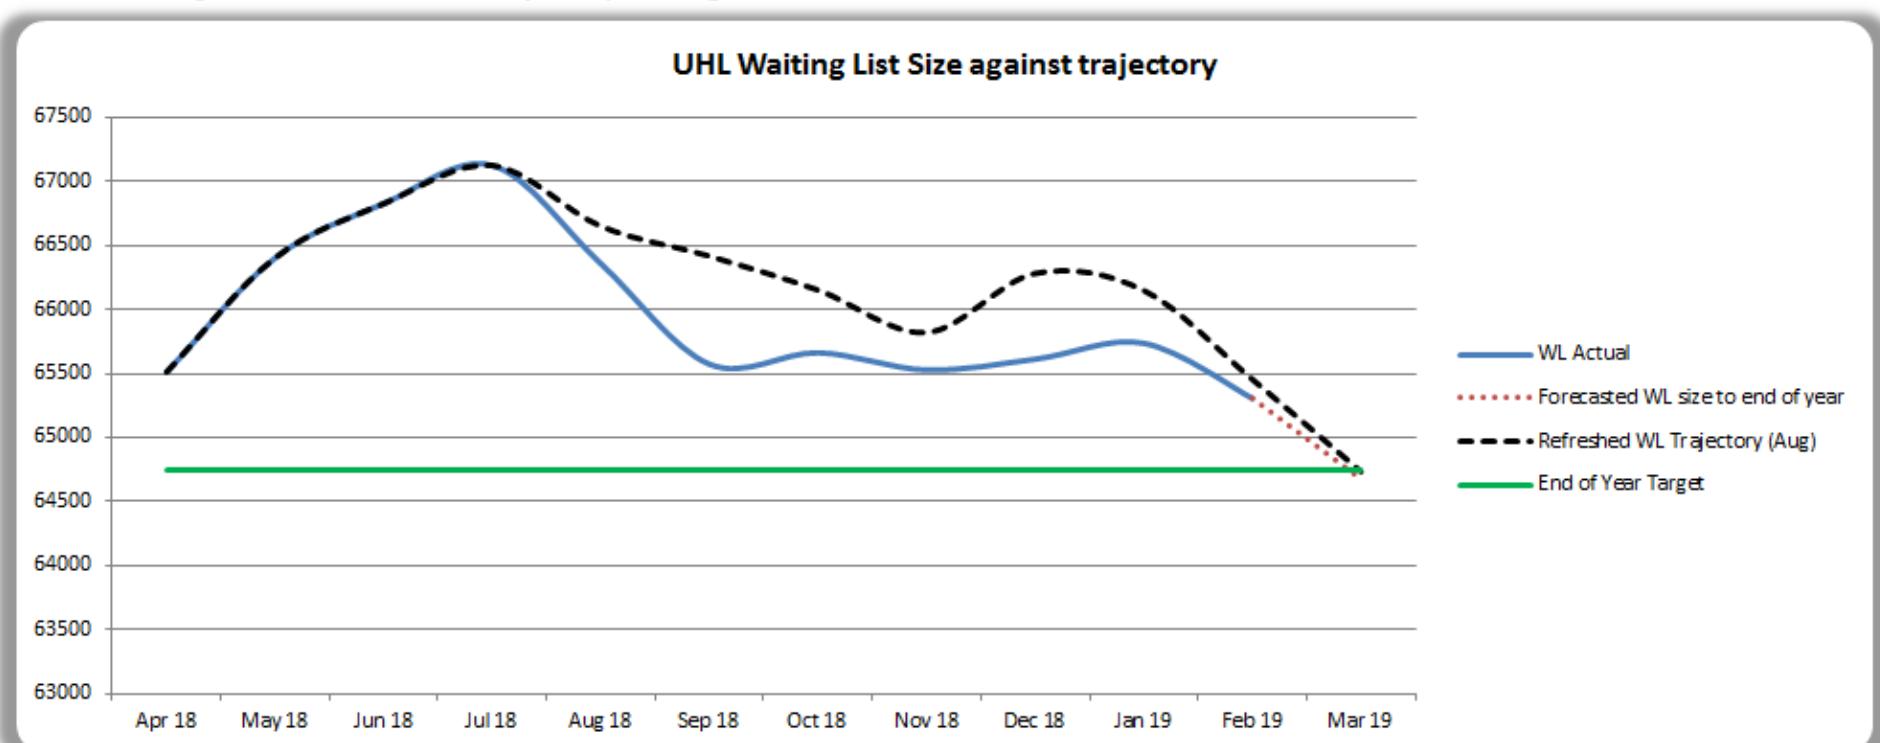

## Key Drivers:

- Increased admitted activity / reduction in cancellations
- Continued validation of the waiting list

## Key Actions

- Working with NHS England to use capacity alerts on eRS for key services with the aim to inform to divert referrals to other centres that have indicated higher levels of capacity
- Reduced cancellations via escalation policy and winter bed plan

UHL is forecasting to remain below the trajectory waiting list size for March.

The overall combined UHL and Alliance WL size has reduced by 431 since the end of January. UHL remains on track to deliver the waiting list trajectory for March.

The 10 largest waiting list size reductions and increases are highlighted in the table opposite. The largest overall waiting list size increases were within Maxillofacial Surgery, Cardiology and Ophthalmology.

Large reductions were seen in General Surgery, Gastroenterology and ENT.

4 out of the 7 UHL CMG's achieved a reduction in their waiting list size, contributing to achieving the month 11 trajectory.

Early March has already seen further reductions in the waiting list size, which is expected to continue for the remainder of the month.

## 10 Largest Waiting List Size Reductions in month

- General Surgery -444
- Gastroenterology -115
- ENT -114

The longest waits for patients remain those awaiting an admitted procedure. Whilst theatre capacity is available prior to the winter period, services have prioritised admitted clinical activity over outpatients, which has resulted in a reduction in the patient waits for this area.

### Key Actions Required:

- Right sizing bed capacity to increase the number of admitted patients able to receive treatment.
- Improving ACPL through reduction in cancellations and increased theatre throughput.
- Demand reduction with primary care as a key priority to achieving on-going performance for our patients to receive treatment in a timely manner.
- Utilising available external capacity in the Independent Sector.
- Utilising clinical resources for non admitted activity during winter when there will be reduced admitted capacity.

# 52 Week Breaches

# Zero

0  
Change

### **Current Position:**

At the end February there were zero patients with an incomplete pathway at more than 52 weeks. There were 9 in month 52 week breaches.

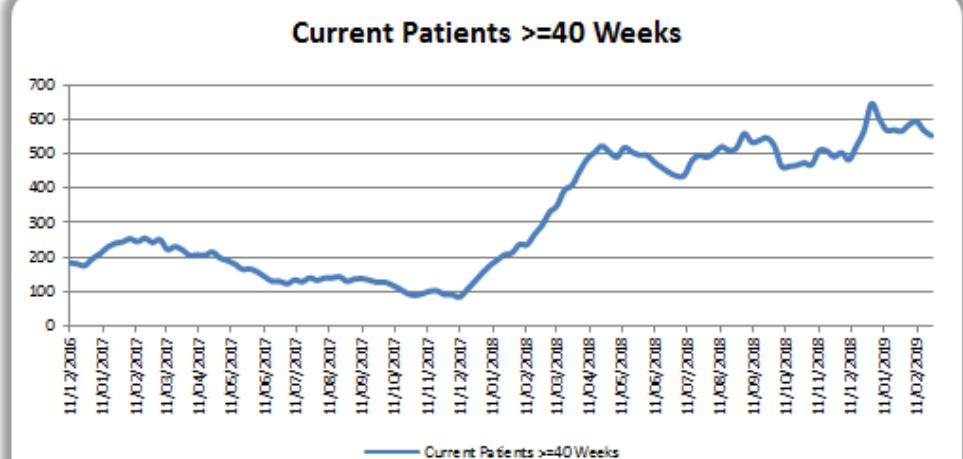

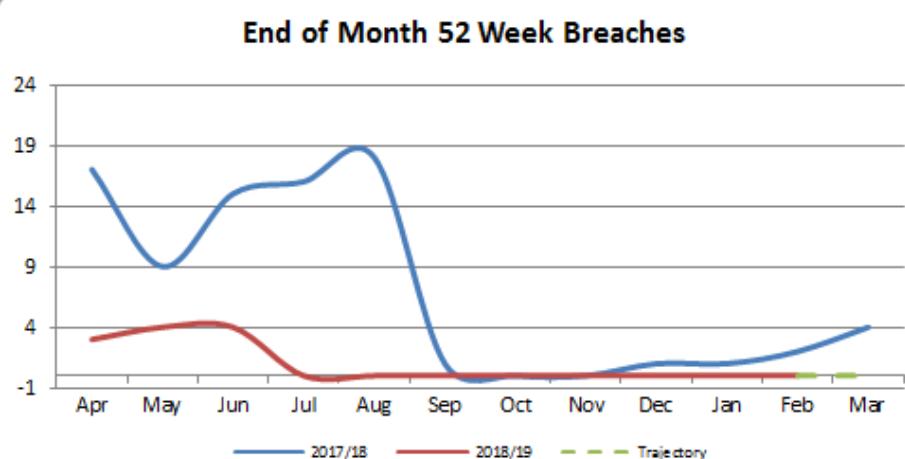

### **Key Drivers:**

- Despite the increased number of long waiting patients, UHL's current 52 week breach performance remains significantly better than 2017/18, with fewer 52 week breaches year to date. UHL remains ranked joint 1<sup>st</sup> amongst our peer group of 18 acute trusts.

## **Key Actions**

- A daily escalation of the patients at risk is followed including Service Managers, General Managers, Head and Deputy Head of Operations. The Deputy Chief Operating Officer is personally involved daily for any patients who are at risk of breaching 52 weeks. A daily TCI list for any long waiting patients over 48 weeks is sent to the operational command distribution list to highlight the patients and avoid a cancellation, with escalation to COO as required.
  - Continued use of the Independent Sector capacity where clinically appropriate and patients agree for a transfer of care.

UHL is forecasting zero 52 week breaches at the end of March. Achieving zero remains a risk due to emergency pressures and the potential risk of cancellation from both the hospital and patient choice.

#### Current Position:

UHL has achieved the DM01 standard for February, with 13 fewer breaches than required to meet the standard. This maintains UHL's diagnostic performance by achieving the standard for the 6<sup>th</sup> consecutive month after the initial capacity constraints at the start of 2018/19.

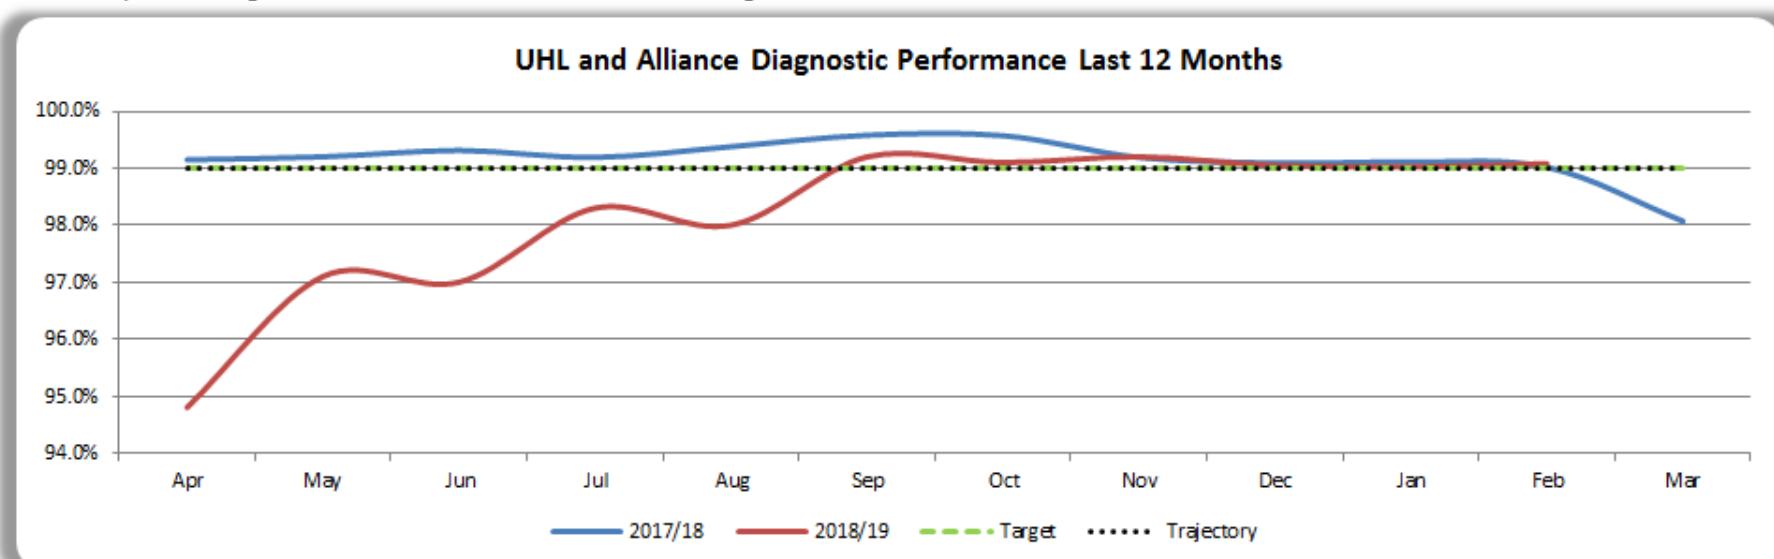

#### Key Drivers:

- An increase in 2WW endoscopy referrals resulted in an increase in conversion from routine diagnostic capacity and an increase in endoscopy breaches in February
- Increased cardiac CT demand due to changes in NICE guidance

#### Key Actions:

- Endoscopy to continue to insource capacity via Medinet with additional lists in March
- All specialties have been set a maximum breach target and with their performance monitored daily
- Imaging insourced extra MRI capacity via mobile van and business case in development for additional CT capacity

UHL is currently forecasting to remain above 99.0% for March continuing to deliver the DM01 standard.

## Current Position:

February's cancelled operations performance for UHL and the Alliance combined was 1.13%. There were 123 non clinical hospital cancellations (123 UHL 1.23% and 0 Alliance 0.0%). This is the 7<sup>th</sup> consecutive month showing year on year reductions in cancelled operations. Year to date within UHL there has been 116 fewer cancellation a 9.2% reduction compared 2017/18.

19 patients did not receive their operation within 28 days of a non-clinical cancellation, 19 from UHL and 0 from the Alliance. This continues on the improvements made throughout the year with the Trust now recording a year to date improvement of 63 fewer 28 day breaches.

## Key Drivers:

- Capacity constraints resulted in 62 (50.4%) hospital non clinical cancellations. Of this 11 were within Paediatrics.
- 26 cancellations were due to lack of theatre time / list overrun. Contextual information indicates other patients on the theatre list becoming more complex and late starts due to awaiting beds are causational factors.
- 22 cancellations were due staff sickness in a mixture of surgical, anaesthetic and theatre workforce.

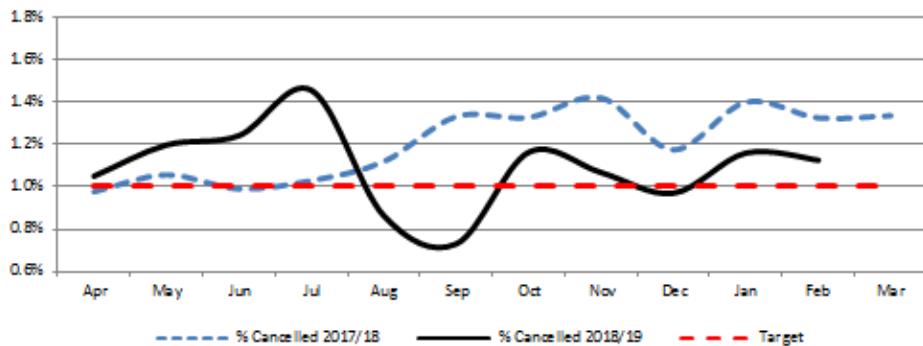

## Key Actions:

- The Theatre Programme Board, along side Four Eyes Insight are focusing on 4 work streams that will positively impact on hospital cancellations: Preoperative Assessment, Optimal Scheduling, Reducing Cancellations and Starting on time.
- Increased reporting of the 28 day re-books exception report, increasing visibility of potential breaches.
- 28 Day Performance monitored at the Weekly Access Meeting

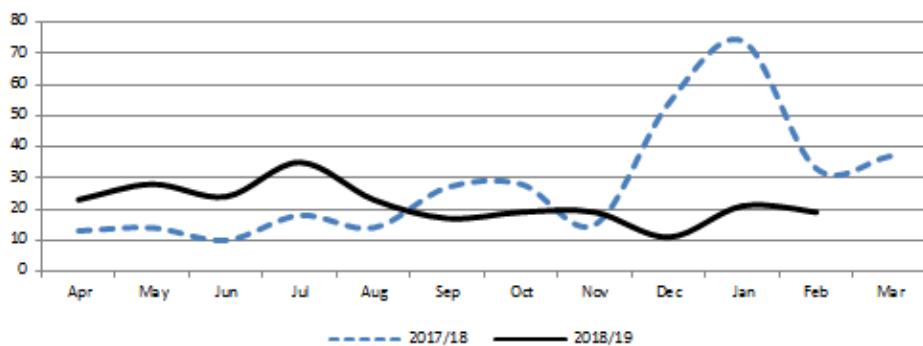

It is forecasted achieving March's performance will continue to deliver year on year improvements. Combined performance for the Trust is currently on track to deliver below 1.0% cancellations in March. Continued improvement is expected for 28 breaches.

Indicator 1: % Operations cancelled for non-clinical reasons on or after the day of admission UHL + ALLIANCE

Indicator 2: The number of patients cancelled who are not offered another date within 28 days of the cancellation

# Out Patient Transformation Programme

## GP Referrals via ERS

## Reduction of long term FU

## Patients seen within 15 mins

## Patients seen within 30 mins

## % Clinic summary letters sent within 7 days

## % appointment letters printed via outsourced provider

## SUCCESSES

- Patient cancellations managed via the Booking Centre on track for Delivery in August
- Bookwise business case approved. Programme under development to improve clinic utilization.
- Recording or waiting times in OP commenced in Speciality Medicine and ENT.
- Plans to address waiting times in ENT clinics developed.
- Increased appointment letters sent out via CfH with CIP opportunity.

## ISSUES

- Currently not on track to meet FFT rating of 97% recommended by March 2019.
- OP Clinic Room utilisation (CSI managed services) has deteriorated.
- Waiting times in OP clinics only captured for 16% clinics
- Clinic cancellations remain high in ENT
- Ability to turn around clinic outcome letters in 7 days will remain a challenge throughout 2018/19
- TAL and ASI rates remain high
- Increase in number of long term follow ups

## ACTIONS

- All Specialities to record waiting times in OP clinics wef: 1<sup>st</sup> August
- Commence targeted work in ENT to reduce hospital cancellations
- Initiate DictateIT transcription pilot in 3 Specialities
- Agree scope of works to incrementally move to a centralised model for OP
- Implement 6,4,2 system for improving OP clinic utilisation.
- Develop financial recovery plan – DNAs and outsourcing via CfH

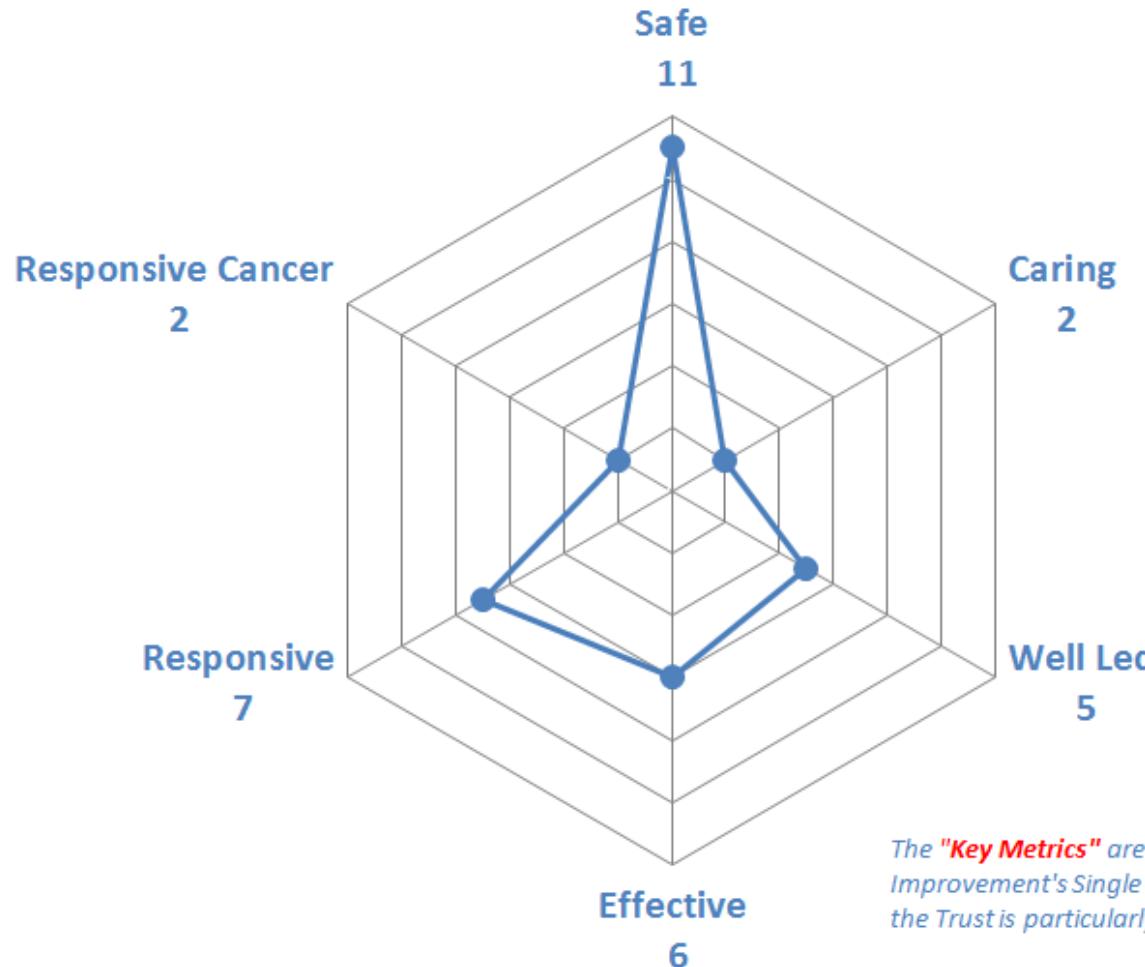

## Room Utilisation

# APPENDICES

## APPENDIX J: Estates and Facilities

### Estates and Facilities - Cleanliness

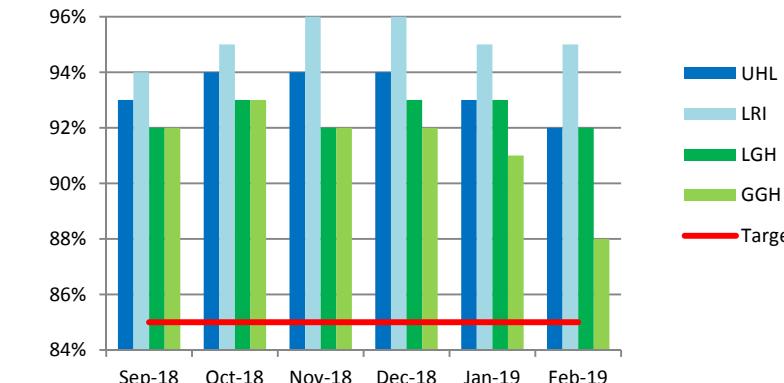

Cleanliness Audit Scores by Risk Category - Very High

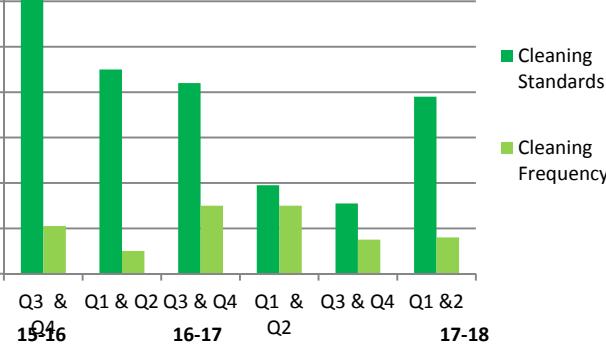

Cleanliness Audit Scores by Risk Category - High

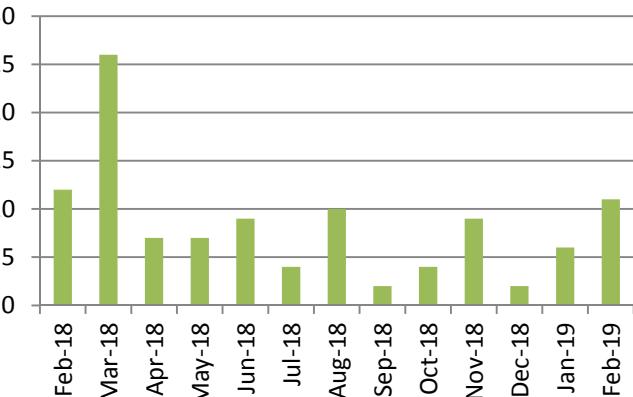

Cleanliness Audit Scores by Risk Category - Significant

Triangulation Data - Cleaning

Number of Datix Incidents Logged - Cleaning

### Cleanliness Report

#### Explanatory Notes

The above charts show average audit scores for the whole Trust and by hospital site for the last 6 months. Each chart covers specific risk categories:-

- Very High – e.g. Operating Theatres, ITUs, A&E - Target Score 98%
- High – Wards e.g. Sterile supplies, Public Toilets – Target Score 95%
- Significant – e.g. Outpatient Departments, Pathology labs – Target Score 85%

Cleanliness audits are undertaken jointly involving both ward staff as well as members of the Facilities Team

The triangulation data is collected by the Trust from numerous patient sources including Message to Matron, Friends and Family Test, Complaints, online sources and Message to volunteer or Carer. This is collated collectively as 'Suggestions for Improvement' previously on a quarterly basis however this has now changed to bi-annually going forward.

#### Notes on Performance

Very high-risk areas have overall dropped by 1% to 95%. Whilst the LRI remains the same as last month at 96%, both the LGH and GH have dropped 1% to 95%. All 3 sites continue to remain slightly behind target.

High-risk audit scores have dropped to 93% overall - the lowest score over the last 6 months, with LGH and GH dropping to 92% and the LRI dropping to 94%. Significant risk areas whilst continuing to exceed the 85% target also are at their lowest compared to the last 6 months.

The number of Datix incidents logged for February, has seen an increase from 6 in January to 11 in February – which is not significantly out of line with the usual level of variability, however it is the highest recorded over the last 11 months.

Cover for absences and vacant posts have been pushed down to a minimum level due to extended spending controls. The performance figures clearly reflect this situation. Plans are being worked up for a full scale review of the cleaning service from the point of view of methods, resources and productivity, management and IP requirements. Progress will be detailed as part of this regular report

## Estates and Facilities – Patient Catering

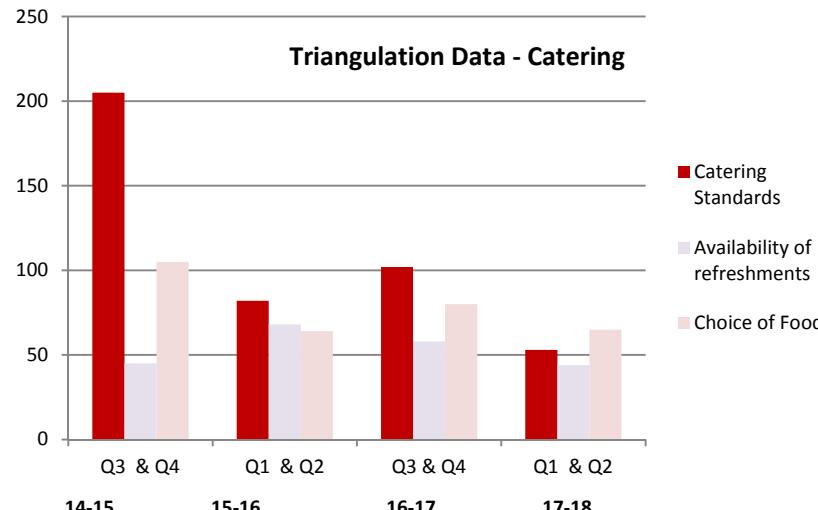

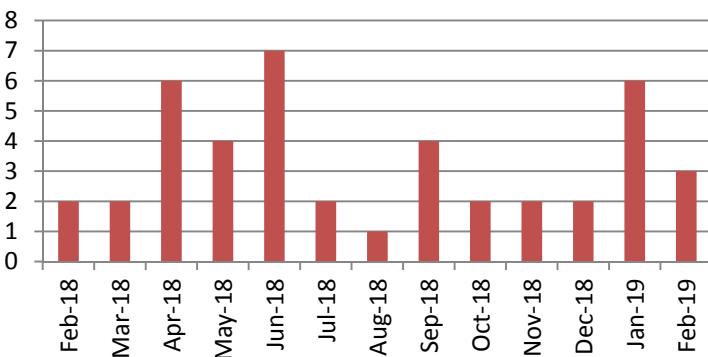

Patient Catering Survey – December 2018		Percentage 'OK or Good'	
		Jan-19	Feb-19
Did you enjoy your food?		82%	95%
Did you feel the menu has a good choice of food?		92%	95%
Did you get the meal that you ordered?		96%	95%
Were you given enough to eat?		96%	100%
<b>90 – 100%</b>		<b>80 – 90%</b>	<b>&lt;80%</b>

Number of Patient Meals Served				
Month	LRI	LGH	GGH	UHL
December	68,437	22,175	28,213	118,825
January	72,643	24,430	33,131	130,204
February	65,604	21,745	29,139	119,173

Patient Meals Served On Time (%)				
Month	LRI	LGH	GGH	UHL
December	100%	100%	100%	100%
January	100%	100%	100%	100%
February	100%	100%	100%	100%

**97 – 100%**    **95 – 97%**    **<95%**

### Number of Datix Incidents Logged -Patient Catering

### Patient Catering Report

Survey numbers remain down with the scores being based on 20 returns. We are meeting with the hospital volunteers to see if they can help us reach our target of 100 surveys a month whilst an electronic solution is worked on.

Survey scores this month have improved with all areas hitting the required target. Comment data collected continues to show no discernible trends.

In terms of ensuring patients are fed on time this continues to perform well.

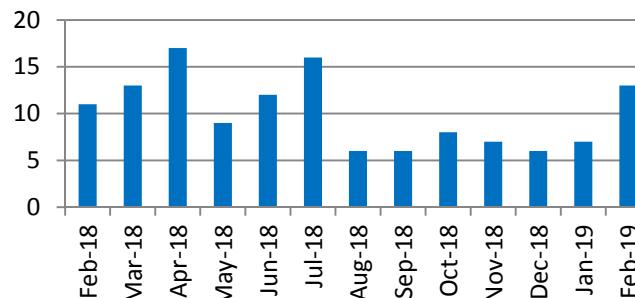

Datix incidents have halved from 6 in January to 3 in February, remaining relatively low given the volume meals served by the catering team.

## Estates and Facilities - Portering

Reactive Portering Tasks in Target					
Site	Task (Urgent 15min, Routine 30min)	Month			
		December	January	February	
GH	Overall	94%	92%	92%	
	Routine	93%	91%	91%	
	Urgent	99%	97%	97%	
LGH	Overall	92%	95%	93%	
	Routine	90%	94%	94%	
	Urgent	99%	98%	98%	
LRI	Overall	91%	92%	91%	
	Routine	90%	91%	91%	
	Urgent	97%	97%	98%	
95 – 100%		90 – 94%	<90%		

Average Portering Task Response Times		
Category	Time	No of tasks
Urgent	00:14:12	2,157
Routine	00:25:19	14,888
Total		17,045

Number of Datix Incidents Logged - Portering

## Estates & Facilities – Planned Maintenance

Statutory Maintenance Tasks Against Schedule					
UHL Trust Wide	Month	Fail	Pass	Total	%
	December	24	136	160	85%
	January	29	128	157	82%
	February	4	103	107	96%
99 – 100%		97 – 99%	<97%		

## Estates Planned Maintenance Report

For February we achieved 96% in the delivery of Emergency Lighting PPM's at the LRI that missed their SLA by an average of 0 / days.

For the Non-Statutory tasks, completion of the monthly schedule is subject to the volume of reactive calls and the shortage of engineers to carry out tasks and administration personnel to close them down on the system.

Discussions are being held regarding our sub- contractors attaining licenses to access systems to electronically record when maintenance tasks are completed.

Non-Statutory Maintenance Tasks Against Schedule					
UHL Trust Wide	Month	Fail	Pass	Total	%
	December	1027	1718	2745	63%
	January	863	1324	2187	61%
	February	570	1377	1947	71%
95 – 100%		80 – 95%	<80%		

## Portering Report

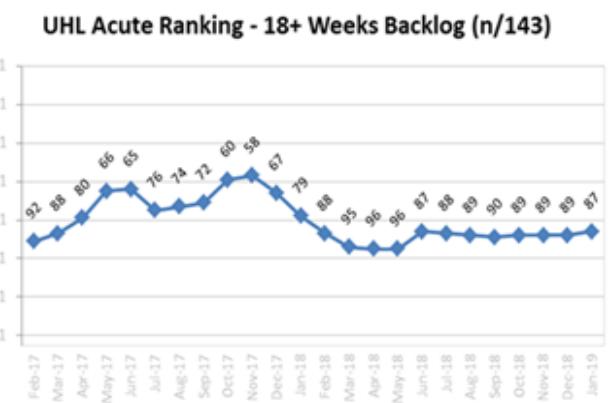

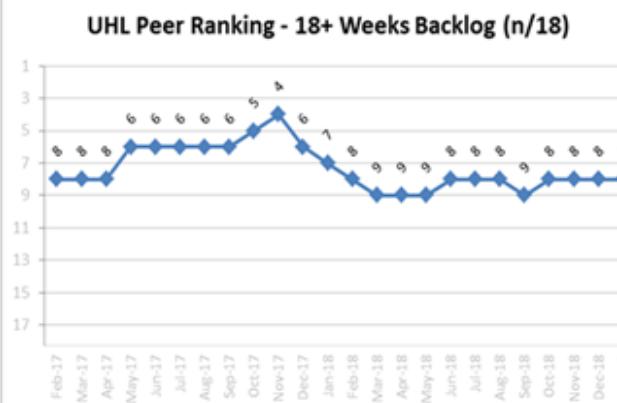

February's performance figures remain similar to those seen in January. The challenges presented by some sickness and absence issues that the portering services at the LRI are currently experiencing have increased due to financial controls impacting on levels of cover. This has led to an increase in Datix's particularly with some delays experienced with scanning radiology patients.

Additional work has been required as a result of the situation with our clinical waste contractor and the restrictions relating to sharps collections. The portering team are working well to contain the situation and at present there have been no issues reported. The storage capacity is sufficient for immediate needs, but plans are in place to increase this should it become necessary.

# Funnel Plot Benchmarking

Nationally, 13.5% of all acute providers were within the control limit, 45.9% above the upper control limit (99.8%) and 40.6% below the lower control limit (95%).

UHL's performance for February 2019 was below the national average and below the expected level of normal variation.

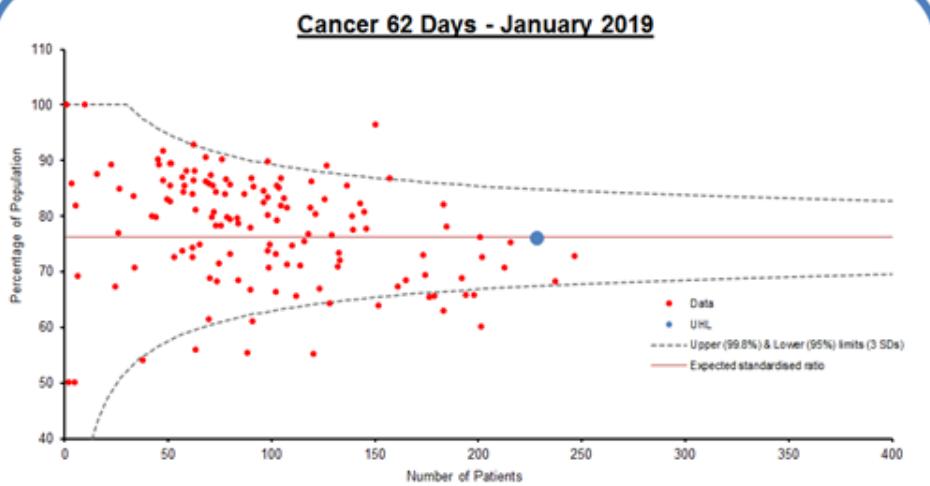

14 providers had similar levels of ED attendances to UHL - 6 providers including UHL sit within the lower control limit. 6 providers are above the upper control limit

Nationally, 1.5% of all acute providers were within the control limit, 58.6% above the upper control limit (99.8%) and 39.8% below the lower control limit (95%).

UHL's performance for January 2019 was below the national average and below the expected level of normal variation.

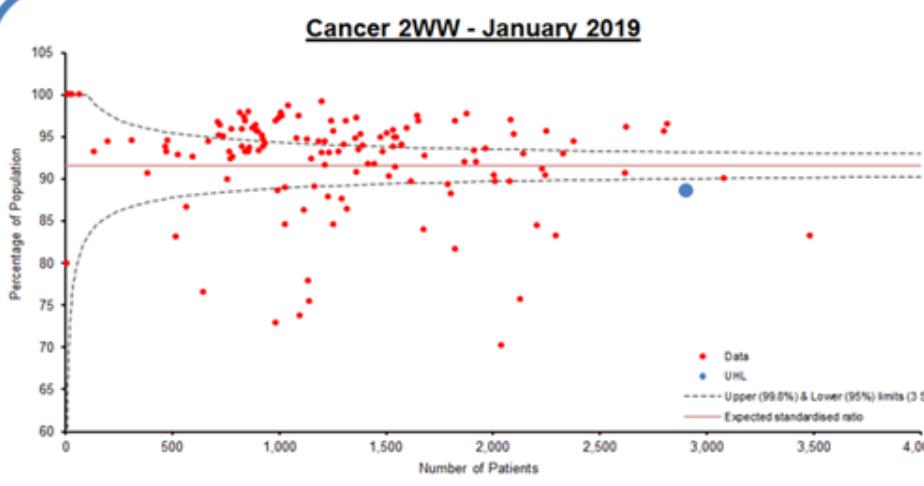

Only 6 providers with comparable activity levels to UHL - 2 providers including UHL sits within the lower control limit. 4 providers are above the upper control limit

Nationally, 86.6% of all acute providers were within the control limit, 3.5% above the upper control limit (99.8%) and 9.9% below the lower control limit (95%).

UHL's performance for January 2019 was below the national average and within the expected level of normal variation.

Only 2 providers had comparable level of activity to UHL - The 2 providers including UHL sit within the control limit

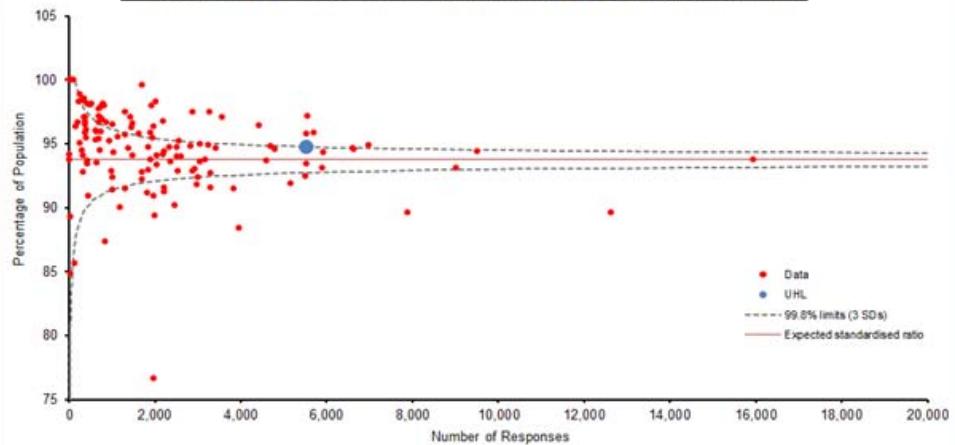

Nationally, 41.4% of all acute providers were within the control limit, 38.6% above the upper control limit (99.8%) and 20.0% below the lower control limit (95%).

UHL's performance for January 2019 was below the national average and below the expected level of normal variation.

Only 2 providers with comparable level of activity to UHL - All 2 providers including UHL sit within the lower control limit

# Funnel Plot Benchmarking

**Outpatients Friends and Family Test (FFT) - January 2019**

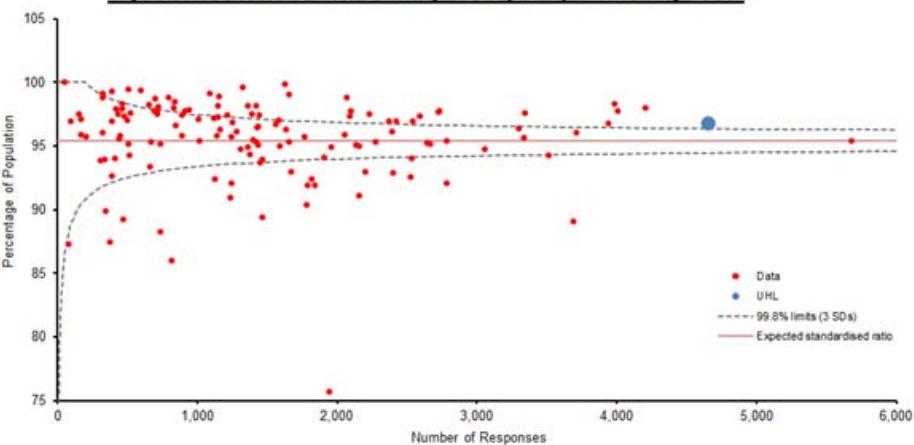

Nationally, 56.5% of all acute providers were within the control limit, 27.2% above the upper control limit (99.8%) and 16.3% below the lower control limit (95%).

UHL's performance for January 2019 was above the national average and within the expected level of normal variation.

15 providers had similar levels of FFT responses to UHL - 8 providers including UHL sit within the control limit. 5 providers are above the upper control limit

**Inpatient Friends and Family Test (FFT) - January 2019**

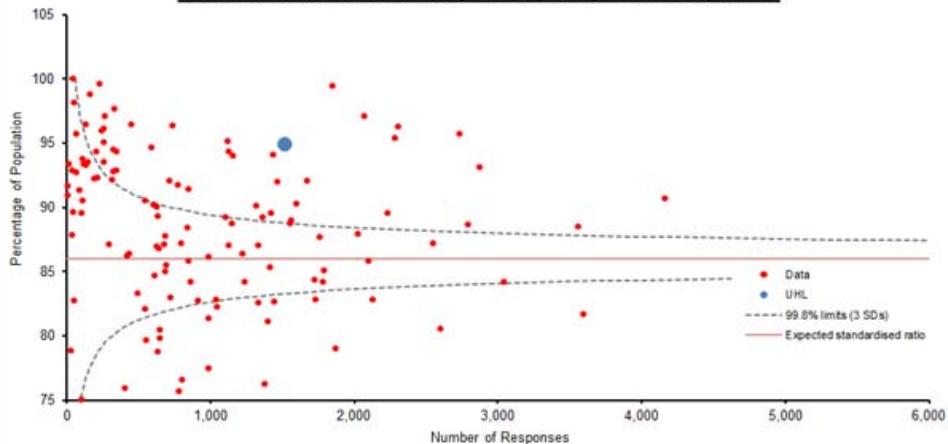

Nationally, 53.1% of all acute providers were within the control limit, 27.9% above the upper control limit (99.8%) and 19.0% below the lower control limit (95%).

UHL's performance for January 2019 was above the national average and above the expected level of normal variation.

Only 2 providers had similar levels of FFT responses to UHL - 1 providers including UHL are above the upper control limit

**A&E Friends and Family Test (FFT) - January 2019**

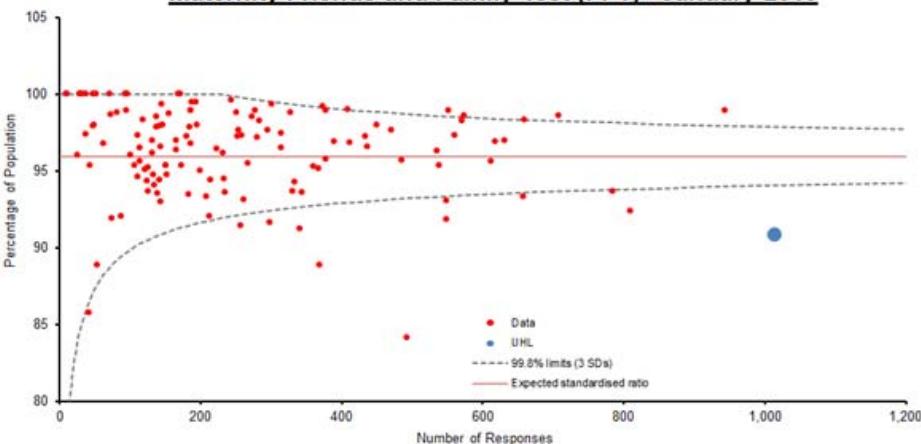

Nationally, 46.7% of all acute providers were within the control limit, 31.9% above the upper control limit (99.8%) and 21.5% below the lower control limit (95%).

UHL's performance for January 2019 was above the national average and above the expected level of normal variation.

33 providers had similar levels of FFT responses to UHL - 14 providers including UHL are above the upper control limit

**Maternity Friends and Family Test (FFT) - January 2019**

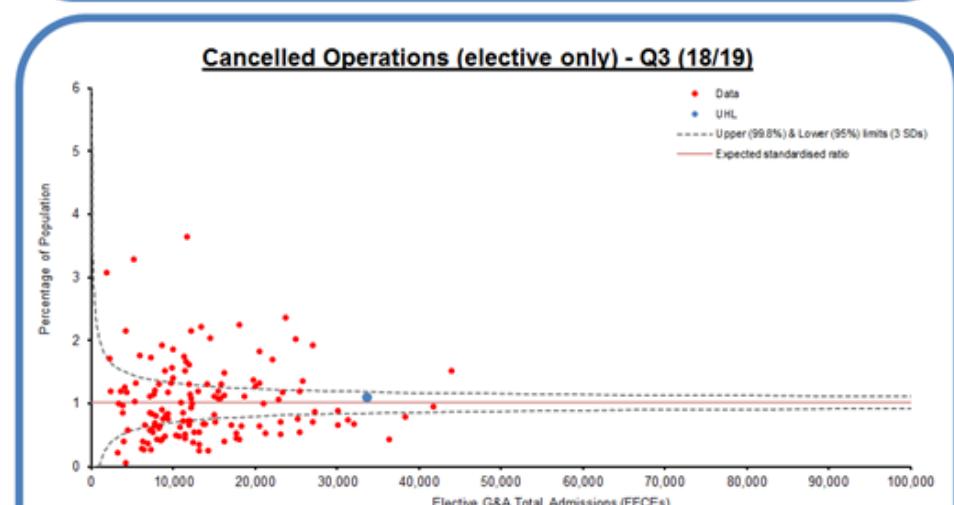

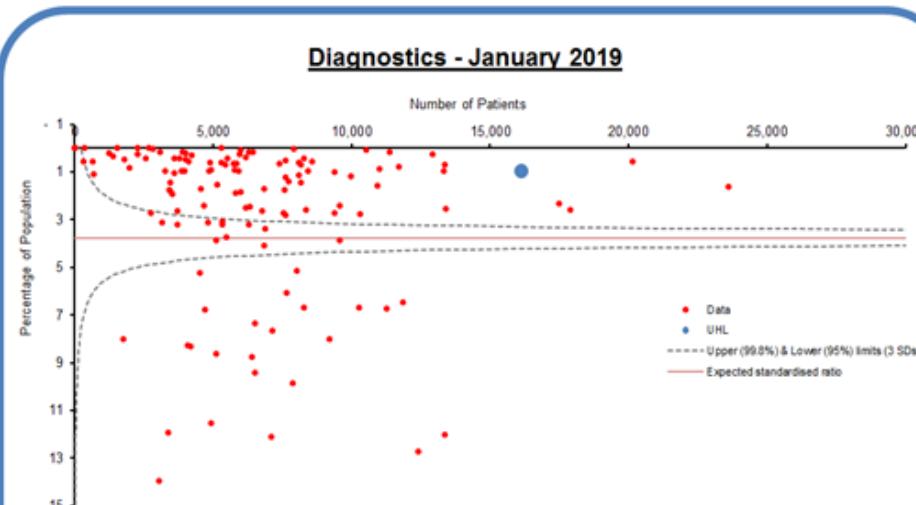

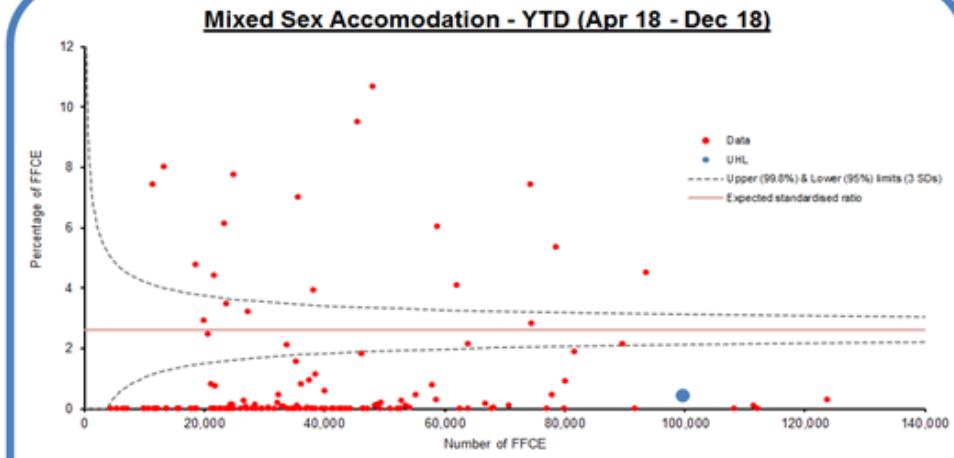

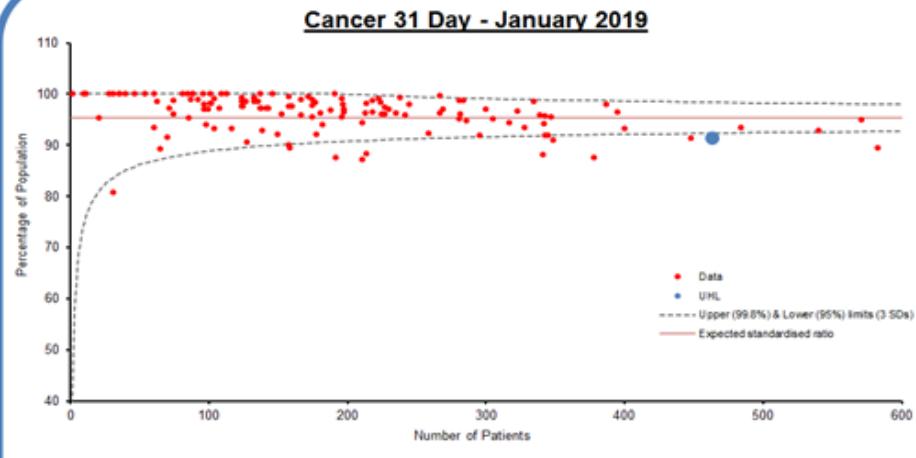

Nationally, 85.4% of all acute providers were within the control limit, 5.4% above the upper control limit (99.8%) and 9.2% below the lower control limit (95%).

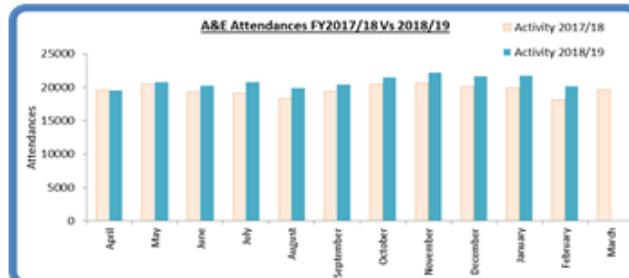

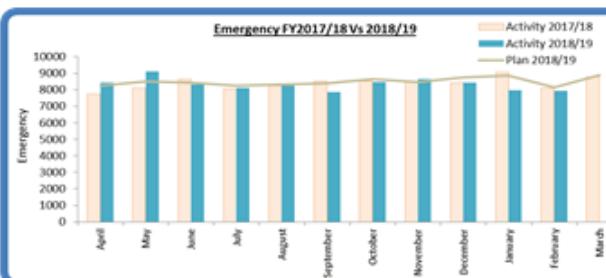

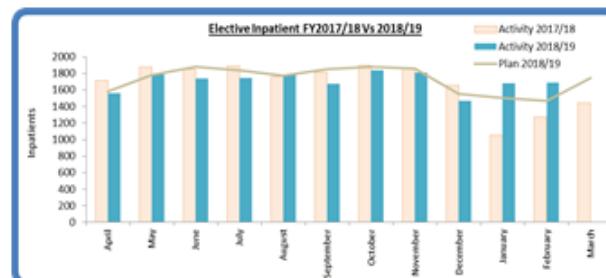

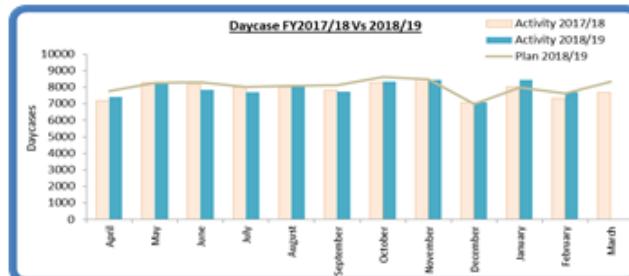

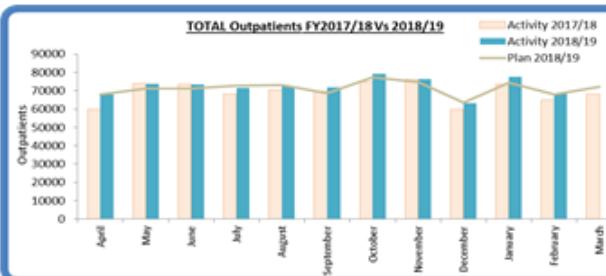

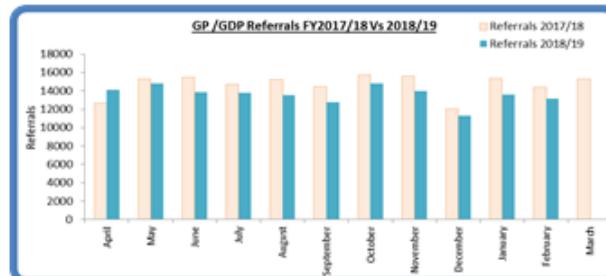

UHL's performance for January 2019 was below the national average and below the expected level of normal variation.

UHL had the highest level of FFT responses.

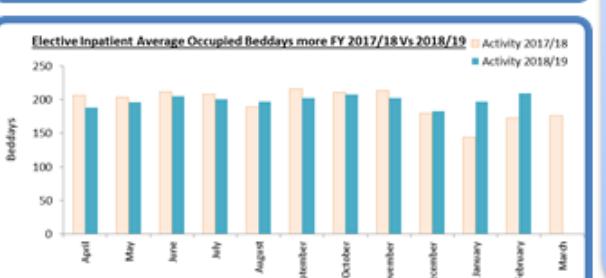

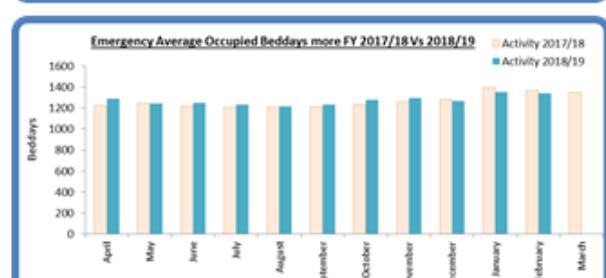

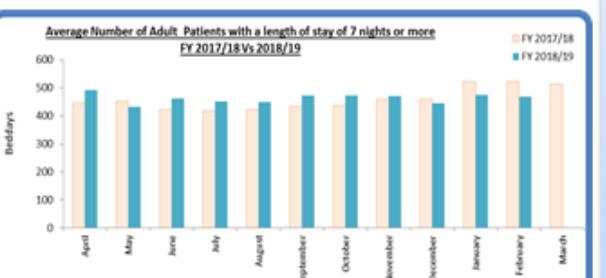

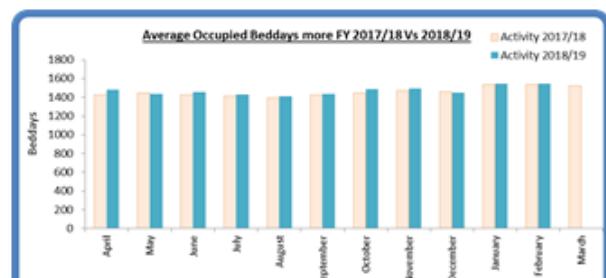

# Funnel Plot Benchmarking

# UHL Activity Trends

# UHL Bed Occupancy

- **GP referrals (Excludes Physio referrals)** in February was lower in comparison to the same period last year. YTD referrals is 6.8% lower than the same period last year.
- **Outpatients** - Dermatology, Thoracic Medicine, Gastroenterology, Haematology and Medical Oncology significantly higher than plan.
- **Daycase** - Growth in Clinical Oncology, Gastroenterology and BMT against plan. Ophthalmology, Orthopaedic Surgery and Urology Significantly lower than plan.
- **Elective Inpatient** - Urology, Orthopaedic Surgery, General Surgery, HPB and Haematology lower than plan.
- **Emergency Admissions** - Activity in ENT, Cardiology, General Surgery and Geriatric Medicine are higher than the plan.
- **Midnight G&A bed occupancy** was similar to the same period last year.
- **The number of patients staying in beds 7 nights or more** in February has reduced significantly compared to the same period last year.
- A reduction in **Emergency occupied bed days** compared to same period last year.
- **YTD Bed occupied** is higher compared to the same period last year.
